Odyssey to Ushuaia Haynes Manuals N. America, Incorporated

"This book, a polished, winding meditation on the theory and fractiousness of motorcycles, celebrates both their eccentric history and the wary pleasures of touring."—The New Yorker In a book that is "a must for anyone who has loved a motorcycle" (Oliver Sacks), Melissa Pierson captures in vivid, writerly prose the mysterious attractions of motorcycling. She sifts through myth and hyperbole: misrepresentations about danger, about the type of people who ride and why they do so. The Perfect Vehicle is not a mere recitation of facts, nor is it a polemic or apologia. Its vivid historical accounts—the beginnings of the machine, the often hidden tradition of women who ride, the tale of the defiant ones who taunt death on the racetrack—are intertwined with Pierson's own story, which, in itself, shows that although you may think you know what kind of person rides a motorcycle, you probably don't.

How to Survive the End of the World as We Know It Haynes Manuals N. America, Incorporated

Suspension is probably the most misunderstood aspect of motorcycle performance. This book,

by America 's premier suspension specialist, makes the art and science of suspension tuning

accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede 's

wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to

make their bike, or their kid 's, handle like a pro 's. Thede gives a clear account of the three

forces of suspension that you must understand to make accurate assessments of your

suspension 's condition. He outlines testing procedures that will help you gauge how well

you 're improving your suspension, along with your riding. And, if you 're inclined to perfect

your bike 's handling, he even explains the black art of chassis geometry. Finally, step-by-step

photos of suspension disassembly and assembly help you rebuild your forks and shocks for

optimum performance. The book even provides detailed troubleshooting guides for dirt, street,

and supermoto--promising a solution to virtually any handling problem.

Kawasaki AR125 Owners Workshop Manual Haynes Publishing UK

In 1982, at the age of just twenty-three and halfway through her architecture studies, Elspeth Beard left her family and friends in London and set off on a 35,000-mile solo adventure around the world on her 1974 BMW R60/6. Reeling from a recent breakup and with only limited savings from her pub job, a tent, a few clothes and some tools, all packed on the back of her bike, she was determined to prove herself. She had ridden bikes since her teens and was well travelled. But nothing could prepare her for what lay ahead.

When she returned to London nearly two and a half years later she was stones lighter and decades wiser.

She'd ridden through unforgiving landscapes and countries ravaged by war, witnessed civil uprisings that

forced her to fake documents, and fended off sexual attacks, biker gangs and corrupt police convinced

she was trafficking drugs. She'd survived life-threatening illnesses, personal loss and brutal accidents that

had left permanent scars and a black hole in her memory. And she'd fallen in love with two very different

men. In an age before email, the internet, mobile phones, satnavs and, in some parts of the world, readily

available and reliable maps, Elspeth achieved something that would still seem remarkable today. Told

with honesty and wit, this is the extraordinary and moving story of a unique and life-changing adventure.
