Motor Vehicle Technology for Mechanics World Bank Publications

“ This book gives a voice to English language teachers faced with the challenges posed by English language curriculum change. As a core component of national state system curricula in virtually every country in the world, there has nevertheless been little research exploring how the millions

of English teachers worldwide navigate the challenges posed by such curriculum changes. This volume includes eleven stories from teachers based across every continent, providing a global glimpse of how national English curriculum change projects have been experienced by classroom teachers who are commonly (if erroneously) viewed as mostly responsible for its implementation success or failure. The final chapter synthesises these experiences and suggests wider implications for the development of curriculum change planning processes, and how they might better support teachers' attempts to achieve curriculum goals. Edited and authored by leading experts in the field, this ground-breaking collection will be of interest to students and scholars of English language teaching, teacher education, curriculum change and education policy. "

The Kenya Education Directory WIT Press

This book explores the ways in which women in Africa utilize Information and Communication Technologies to facilitate their empowerment; whether through the mobile village phone business, through internet use, or through new career and ICT employment opportunities. Based on the outcome of an extensive research project, this timely book features chapters based on original primary field research undertaken by academics and activists who have investigated situations within their own communities and countries. The discussion includes such issues as the notion of ICTs for empowerment and as agents of change, ICTs in the fight against gender-based violence, and how ICTs could be used to re-conceptualize public and private spaces.

Pocket Fact Book on Education in Eastern Africa Region Springer

An introductory text providing explanations of motor vehicle technology. Each chapter in the book takes the reader through the details of each component system, and also includes checklists for fault finding and maintenance, and a number of practical projects.

Finance LAP Lambert Academic Publishing

The book covers the state-of-the-art treatment in modelling and experimental investigation of the mechanical behaviour of cellular and porous materials. Starting from the continuum mechanical modelling, to the numerical simulation, several important questions related to applications such as the fracture and impact behaviour are covered.

Toward a Knowledge Society for African Development East African Publishers

The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.

This book sets out to bring voices of the South to the debate on localization of education and makes the case that it should be considered a right in education. Despite all the scientifically-based evidence on the improved quality of education through the use of a local language and local knowledge, English as a language of instruction and "Western" knowledge based curriculum continue to be used at all educational levels in many developing nations. This means that in many African countries, the goal of rights to education is becoming increasingly remote, let alone that of rights in education. With this understanding and with the awareness of the education challenges of millions of children throughout Africa, the authors argue that local curriculum through local languages needs to be valued and to be preserved, and that children need to be prepared for the world in a language that promotes understanding. The authors make a clear case that policy makers are in a position to work towards a quality education for all as part of a more comprehensive right-based approach. We owe it to the children of the South to offer the best quality education possible in order to achieve social

justice.

Kenya National Assembly Official Record (Hansard) Springer Science & Business Media

This volume emphasizes the role of chemical education for development and, in particular, for sustainable development in Africa, by sharing experiences among specialists across the African continent and with specialists from other continents. It considers all areas and levels of chemistry education, gives specific attention to known major challenges and encourages explorations of novel approaches. The chapters in this book describe new teaching approaches, approach-explorations and in-class activities, analyse educational challenges and possible ways of addressing them and explore cross-discipline possibilities and their potential benefits for chemistry education. This makes the volume an up to date compendium for chemistry educators and educational researchers worldwide.

The Essence of Africa's New Woman IGI Global

For many scholars, the study of community and community development is at a crossroads. Previously dynamic theories appear not to have kept pace with the major social changes of our day. Given our constantly shifting social reality we need new ideas and research that pushes the boundaries of our extant community theories. Theory, Practice, and Community Development stretches the traditional boundaries and applications of well-established community development theory, and establishes new theoretical approaches rooted in new disciplines and new perspectives on community development. Expanded from a special issue of the journal Community Development, Theory, Practice, and Community Development collects previously published and widely cited essays, as well as new theoretical and empirical research in community development. Compiled by the editors of Community Development, the essays feature topics as varied as placemaking, democratic theory and rural organizing. Theory, Practice, and Community Development is vital for scholars and practitioners coming to grips with the rapidly changing definition of community.

Nature

This title explores an area of tertiary education that is currently understudied; this is the extent and nature of differentiation and articulation in African tertiary education systems. The overall finding is that the binary system is dominant, characterised by universities and polytechnics as distinct types of institutions. Differentiation is clearly evident in Africa. However, though varied in nature and extent, the differentiation is mostly horizontal as opposed to vertical. Articulation, on the other hand, seems to be in its infancy as some universities, in their admission requirements, d.

Creating New Spaces with Technology

A main staple of today's world that has played a key role in the development of society is education and institutions of higher learning. An ongoing concern, however, has been the lack of access and resources to superior teaching in developing areas of the world. Student engagement and learning environments are just a few elements that play into the success of colleges in areas like the Coast Region of Kenya. Research must be done in understanding the correlation between the tools that these institutions are equipped with and the educational results of their students. Effects of Engagement and Resources on Learning Outcomes in Vocational Colleges: Emerging Research and Opportunities is an essential reference source that discusses the relationship between college resources and students' learning outcomes as well as contributing factors in promoting quality education and training. Featuring research on topics such as research philosophies, teaching workloads, and student engagement, this book is ideally designed for teachers, deans, researchers, education professionals, administrators, policymakers, government officials, and academicians seeking coverage on the methods of acquiring and maintaining quality education in developing countries.

Becoming Somebody in Teacher Education

Becoming Somebody in Teacher Education explores the realities of contemporary teacher education in Kenya. Based on a long-term ethnographic fieldwork, it views the teacher training institution as a space to grow, become and be shaped as teachers in complex moral worlds. Drawing on a rich conceptual and theoretical vocabulary, the book shows how students in these teacher education institutions constantly negotiate and confront the complex constructions of ethnicity, gender and class, as well as moral, religious and academic issues and a lack of resources encountered in the different institutional cultures. It outlines a complex array of concerns affecting student teachers that shape

what professional becoming means in a stratified and diverse culture. This story of the process of growing up and becoming a professional teacher in an African setting will appeal to researchers, academics and students in the fields of teacher education, organizational studies, international education and development, social anthropology and ethnography.

The graduates from Technology education institutions (Technical Training Institutes and national Polytechnics) have contributed a lot to the industrial growth and the 'Jua kali' sectors. The diploma and certificates which are awarded by Kenya National Examinations Council (KNEC) have increased the number of graduates who have acquired skills and knowledge that is in high demand in the world of work, both in informal and formal sectors. But many of these young men and women who have desired to join others in developing this nation have been stopped on the way or discouraged or delayed in acquiring their diploma in Mechanical Engineering based areas. Many candidates don't pass Mechanical Technology subject. Therefore this study set to investigate the poor performance of candidates in mechanical technology subject in Technical training institutions.
