Knocking on Heaven's

Door Harper Collins

The first book by a respected journalist on Nearing Death Awareness—similar to Nearing Death Experience—this “fascinating” (Kirkus Reviews) exploration brings

“humor, sympathy, and keen critical intelligence to a topic that is all too often off-limits” (Ptolemy Tompkins, collaborator with Eben Alexander on Proof of Heaven). People everywhere carry with them extraordinary, deeply comforting experiences that arrived at the moment when they most needed relief: when they lost a loved one. These experiences can include clear messages from beyond, profound and vividly beautiful visions, mysterious connections and spiritual

awareness, foreknowledge of a loved one’s passing—all of which evade explanation by science and logic. Most people keep these transcendent experiences secret for fear they will be discounted by hyper-rational scrutiny. Yet these very common occurrences have the power to console, comfort, and even transform our understanding of life and death. Prompted by her family’s surprising, profound experiences around the death of her father and her sister, reporter Patricia Pearson sets

out on an open-minded inquiry, a rare journalistic investigation of Nearing Death Awareness, which Anne Rice praises as “substantive, eloquent, and worthwhile.” Opening Heaven’s Door offers deeply affecting stories of messages from the dying and the dead in a fascinating work of investigative journalism, pointing to new scientific explanations that give these luminous moments the importance felt by those who experience them. Pearson also delves into out-of-body

and near-death experiences, examining stories and research to make sense of these related but distinct categories. Challenging current assumptions about what we know and what we are still unable to explain, Opening Heaven’s Door will forever alter your perceptions of the nature of life and death. From one of Time magazine's 100 most influential people in the world, a rousing defense of the role of science in our lives
The latest developments in physics have the potential to radically revise our understanding of the world: its makeup, its evolution, and the fundamental forces that drive its operation. Knocking on

Heaven's Door is an exhilarating and accessible overview of these developments and an impassioned argument for the significance of science. There could be no better guide than Lisa Randall. The bestselling author of *Warped Passages* is an expert in both particle physics (the study of the smallest objects we know of) and cosmology (the study of the largest). In *Knocking on Heaven's Door*, she explores how we decide which scientific questions to study and how we go about answering them. She examines the role of risk, creativity, uncertainty, beauty, and truth in scientific thinking

through provocative conversations with leading figures in other fields (such as the chef David Chang, the forecaster Nate Silver, and the screenwriter Scott Derrickson), and she explains with wit and clarity the latest ideas in physics and cosmology. Randall describes the nature and goals of the largest machine ever built: the Large Hadron Collider, the enormous particle accelerator below the border of France and Switzerland—as well as recent ideas underlying cosmology and current dark matter experiments. The most sweeping and exciting science book in years, *Knocking on*

Heaven's Door makes clear the biggest scientific questions we face and reveals how answering them could ultimately tell us who we are and where we came from. [Heaven's Door](#) Simon and Schuster
A groundbreaking, authoritative exploration—rich with powerful personal stories and convincing research—of the many ways the living can and do accompany the dying on their journey into the afterlife. In 2000, end-of-life therapist William Peters was volunteering at the Zen

Hospice Project in San Francisco when he had an extraordinary experience as he was reading aloud to a patient: he suddenly felt himself floating in midair, completely out of his body. The patient, who was also aloft, looked at him and smiled. The next moment, Peters felt himself return to his body...but the patient never regained consciousness and died. Perplexed and stunned by what had happened, Peters began searching for other people who 'd shared similar

experiences. He would spend the next twenty years gathering and meticulously categorizing their stories to identify key patterns and features of what is now known as the “ shared crossing ” experience. The similarities, which cut across continents and cultures and include awe-inspiring visual and sensory effects, and powerful emotional after-effects, were impossible to ignore. Long whispered about in the hospice and medical communities, these extraordinary moments of

final passage are openly discussed and explained in *At Heaven ' s Door*. The book is filled with powerful tales of spouses on departing this earth after decades together and bereaved parents who share their children ' s entry into the afterlife. Applying rigorous research, Peters digs into the effect these shared crossing experiences impart—liberation at the sight of a loved one finding joy, a sense of reconciliation if the relationship was fraught—and explores questions like: What can

explain these shared death experiences? How can we increase our likelihood of having one? What do these experiences tell us about what lies beyond? And, most importantly, how can they help take away the sting of death and better prepare us for our own final moments? How can we have both a better life and a better death? *Being Mortal* Wm. B. Eerdmans Publishing #1 New York Times Bestseller In *Being Mortal*, bestselling author Atul Gawande tackles the hardest challenge of his

profession: how medicine can not only improve life but also the process of its ending. Medicine has triumphed in modern times, transforming birth, injury, and infectious disease from harrowing to manageable. But in the inevitable condition of aging and death, the goals of medicine seem too frequently to run counter to the interest of the human spirit. Nursing homes, preoccupied with safety, pin patients into railed beds and wheelchairs. Hospitals isolate the dying, checking for vital signs long after the goals of cure have become moot.

Doctors, committed to extending life, continue to carry out devastating procedures that in the end extend suffering. Gawande, a practicing surgeon, addresses his profession's ultimate limitation, arguing that quality of life is the desired goal for patients and families. Gawande offers examples of freer, more socially fulfilling models for assisting the infirm and dependent elderly, and he explores the varieties of hospice care to demonstrate that a person's last weeks or months may be rich and dignified. Full of eye-opening research and riveting storytelling, *Being*

Mortal asserts that medicine can comfort and enhance our experience even to the end, providing not only a good life but also a good end. The Material Gene Penguin Victoria Sweet's new book, **SLOW MEDICINE**, is on sale now! For readers of Paul Kalanithi 's *When Breath Becomes Air*, a medical "page-turner" that traces one doctor 's "remarkable journey to the essence of medicine" (The San Francisco Chronicle). San Francisco 's Laguna Honda Hospital is the last

almshouse in the country, a descendant of the H ô tel-Dieu (God ' s hotel) that cared for the sick in the Middle Ages. Ballet dancers and rock musicians, professors and thieves— " anyone who had fallen, or, often, leapt, onto hard times " and needed extended medical care—ended up here. So did Victoria Sweet, who came for two months and stayed for twenty years. Laguna Honda, relatively low-tech but human-paced, gave Sweet the opportunity to practice a

kind of attentive medicine that has almost vanished. Gradually, the place transformed the way she understood her work. Alongside the modern view of the body as a machine to be fixed, her extraordinary patients evoked an older idea, of the body as a garden to be tended. God ' s Hotel tells their story and the story of the hospital itself, which, as efficiency experts, politicians, and architects descended, determined to turn it into a modern " health care facility, " revealed its own

surprising truths about the essence, cost, and value of caring for the body and the soul.

Last Gasp

A piercing portrait of the struggles and triumphs of one of America's renowned Jewish neighborhoods in the wake of unspeakable tragedy that highlights the hopes, fears, and tensions all Americans must confront on the road to healing. Squirrel Hill, Pittsburgh, is one of the oldest Jewish neighborhoods in the country, known for its tight-knit community and the profusion of multigenerational

families. On October 27, 2018, a gunman killed eleven Jews who were worshipping at the Tree of Life synagogue in Squirrel Hill--the most deadly anti-Semitic attack in American history. Many neighborhoods would be understandably subsumed by despair and recrimination after such an event, but not this one. Mark Oppenheimer poignantly shifts the focus away from the criminal and his crime, and instead presents the historic, spirited community at the center of this heartbreak. He speaks with residents and nonresidents, Jews and gentiles, survivors and witnesses, teenagers and seniors, activists and historians. Together, these stories provide a kaleidoscopic and nuanced account of collective grief, love, support, and revival. But Oppenheimer also details the difficult dialogue and messy confrontations that Squirrel Hill had to face in the process of healing, and that are a necessary part of true growth and understanding in any community. He has reverently captured the vibrancy and caring that still characterize Squirrel Hill, and it is this phenomenal resilience that can provide inspiration to any place

burdened with discrimination and hate.

This “ comforting...thoughtful ” (The Washington Post) guide to

maintaining a high quality of life—from resilient old age to the

first inklings of a serious illness to the final breath—by the New

York Times bestselling author of Knocking on Heaven ’ s Door is a

“ roadmap to the end that combines medical, practical, and

spiritual guidance ” (The Boston Globe). “ A common sense path

to define what a ‘ good ’ death looks like ” (USA TODAY), The

Art of Dying Well is about living as well as possible for as long as possible and adapting successfully to change. Packed with extraordinarily helpful insights and inspiring true stories, award-winning journalist Katy Butler shows how to thrive in later life (even when coping with a chronic medical condition), how to get the best from our health system, and how to make your own “good death” more likely. Butler explains how to successfully age in place, why to pick a younger doctor and how to have an honest conversation with them, when not to call 911, and how to make your death a sacred rite of passage rather than a medical event. This handbook of

preparations—practical, communal, physical, and spiritual—will help you make the most of your remaining time, be it decades, years, or months. Based on Butler’s experience caring for aging parents, and hundreds of interviews with people who have successfully navigated our fragmented health system and helped their loved ones have good deaths, *The Art of Dying Well* also draws on the expertise of national leaders in family medicine, palliative care, geriatrics, oncology, and hospice. This “empowering guide clearly outlines the steps necessary to prepare for a beautiful death without fear” (Shelf Awareness). [Knocking on Heaven's Door](#)

An urgent, resounding call to protect 50 percent of the earth's land by 2050—thereby saving millions of its species—and a candid assessment of the health of our planet and our role in conserving it, from the award-winning author of *The Experience of Place* and veteran *New Yorker* staff writer. "An upbeat and engaging account of the remarkable progress being made to preserve vast wild spaces for animals to roam." —The Wall Street Journal

Beginning in the vast North American Boreal Forest that stretches through Canada, and roving across the continent, from the Northern Sierra to Alabama's Paint Rock Forest, from the Appalachian Trail to a ranch in Mexico, Tony Hiss sets out on a journey to take stock of the "superorganism" that is the earth: its land, its elements, its plants and animals, its greatest threats--and what we can do to keep it, and ourselves, alive. Hiss not only invites us to understand the scope and

gravity of the problems we face, but also makes the case for why protecting half the land is the way to fix those problems. He highlights the important work of the many groups already involved in this fight, such as the Indigenous Leadership Initiative, the Yellowstone to Yukon Conservation Initiative, and the global animal tracking project ICARUS. And he introduces us to the engineers, geologists, biologists, botanists, oceanographers, ecologists, and other "Half

Earthers" like Hiss himself who are allied in their dedication to the unifying, essential cause of saving our own planet from ourselves. Tender, impassioned, curious, and above all else inspiring, *Rescuing the Planet* is a work that promises to make all of us better citizens of the earth.
