Fresh off the whirlwind winter-vacation romance with ski-god and would-be boyfriend, Wade Walker -- Boone was certain that saying goodbye would be the hardest part. He'd survived the unconventional way in which they came together, proven himself somewhat worthy to Wade's hometown of Summit City, and felt certain the self-imposed, six month boy-buffer would prove one thing - their fate was to be forever entwined. Once real life settles in, Boone suffers the realization that no one ever actually said love was easy and that even after you fall, you can still break. As their two worlds collide, he begins to understand that if he can navigate the landscape of life in fusion, he just might get that happily-ever-after -- after all.

Sharpening The Warrior's Edge is the first text which examines survival and combat performance from a scientific perspective. Author Bruce K. Siddle methodically brings together one hundred years of research which identifies the relationship between survival stress, the heart rate and combat performance. Beyond mere theory, the text explains ... why combat performance and reaction time deteriorates under the effects of survival stress, why and how perceptual and visual narrowing occurs during combat, an insight into Survival Stress Management techniques designed for combat, how to develop a training methodology which combines educational psychology, neurobiology, principles of learning and motor learning research. Most importantly, Siddle explores the psychological and spiritual components which establish the warrior mindset. This pioneering text is a must read for present -day warriors, or anyone involved in use of force, combat or martial arts training.
