This book offers global perspectives from Mediterranean, Asian, Australian, and American cultures on sacred sites and their related stories in regional history. Contemporary society witnesses many travelers visiting sacred sites (temples, mountains, castles, churches, houses) throughout the world. These visits often involve discovery of new historical facts through the origin stories of the associated tribe, region, or nation. The transmission of oral tradition and myth carries on the significant meaning of those religious sites. This volume unveils multi-angle perspectives of symbolic and mystical places. The contributors describe the religio-political experiences of each regional case, and analyze the religiosity of local people as a lens through which readers can re-examine the concept of iconography, syncretism, and materialism. In addition, contributors interpret the growth of new religions as the alternative perspectives of anti-traditional religions. This new approach offers significant insight into comprehending the practical agony and sorrow of regional people in the context of contemporary history.

Now in a thoroughly updated edition, *Resistant Islands* offers the first comprehensive overview of Okinawan history from earliest times to the present, focusing especially on the recent period of colonization by Japan, its disastrous fate during World War II, and its current status as a glorified US military base. The base is a hot-button issue in Japan and has become more widely known in the wake of Japan's 2011 natural disasters and the US military role in emergency relief. Okinawa rejects the base-dominated role allocated it by the US and Japanese governments under which priority attaches to its military functions, as a kind of stationary aircraft carrier. The result has been to throw US-Japan relations into crisis, bringing down one prime minister who tried to stop construction of yet another base on the island and threatening the incumbent if he is unable to deliver Okinawan approval of the new base. Okinawa thus has become a template for reassessing the troubled US-Japan relationship—indeed, the geopolitics of the US empire of bases in the Pacific.

**INTERNATIONAL BESTSELLER** • A bestselling dystopian novel that tackles surveillance, privacy and the frightening intrusions of technology in our lives—a “compulsively readable parable for the 21st century” (Vanity Fair). When Mae Holland is hired to work for the Circle, the world’s most powerful internet company, she feels she’s been given the opportunity of a lifetime. The Circle, run out of a sprawling California campus, links users’ personal emails, social media, banking, and purchasing with their universal operating system, resulting in one online identity and a new age of civility and transparency. As Mae tours the open-plan office spaces, the towering glass dining facilities, the cozy dorms for those who spend nights at work, she is thrilled with the company’s modernity and activity. There are parties that last through the night, there are famous musicians playing on the lawn, there are athletic activities and clubs and brunches, and even an aquarium of rare fish retrieved from the Marianas Trench by the CEO. Mae can’t believe her luck, her great fortune to work for the most influential company in the world—even as life beyond the campus grows distant, even as a strange encounter with a colleague leaves her shaken, even as her role at the Circle becomes increasingly public. What begins as the captivating story of one woman’s ambition and idealism soon becomes a heart-racing novel of suspense, raising questions about memory, history, privacy, democracy, and the limits of human knowledge.

Most, if not all of the global biogeochemical cycles on the earth have been broken or are at dangerous tipping points. These broken cycles have expressed themselves in various forms as soil degradation and depletion, ocean acidification, global warming and climate change. The best proposal for an organic solution to fixing the myriad broken cycles is a deliberate investment in solutions that first acknowledge the historic roles played by both the subjugated peoples, and the economic beneficiaries of the environmental exploitations of the past. Ever since Europeans made contact with the West, a series of global circumstances including the genocide of the indigenous people of the Americas, the enslavement and global subjugation of Africans, and the emergence of Western concepts of trade dominance and capitalism, have led to deleterious impacts on the global biogeochemical cycles. Addressing the broken biogeochemical cycles should be done with a clear understanding that it was not only human subjects which were subjugated, but also land, water, and air. These three global stores must be replenished from the ideological position that poverty is not simply the absence of money, but is also the lack of access to non-polluting energy sources, to clean air devoid of runaway greenhouse gasses, and to local conditions devoid of climate change instabilities. With this in mind, the global powerbrokers can enter into a new deal with developing nations, shifting the paradigm toward a new ecological approach that rewards good behavior and sets new standards of worldwide relations based on ecologic inclusivity rather than the exclusive economic arrangements currently in order. Harnessing a forward thinking approach to analyzing the current global environmental crisis, this book will be of great interest to students and scholars of sustainable development, political ecology, sustainable agriculture, climate change and environmental justice.
