"Charley Ellis has written a magnificent portrait, capturing the indomitable spirit of Joe Wilson and his instinctive understanding of the need for and commercial usefulness of a transforming imaging technology. Joe Wilson and his extraordinary team, which I had the good fortune to first meet in 1960, epitomized the wonderful observation of George Bernard Shaw who said, 'Some look at things that are, and ask why? I dream of things that never were and ask why not?' Xerox and xerography are not only a part of our vocabulary, but part of our everyday life. Charley Ellis gives the reader a

poignant understanding of just how this happened through the life, adventures, critical business decisions, and dreams of Joseph Wilson and a cadre of remarkable individuals. This book will surely join the library of memorable biographies that capture the building of America into a risk-tolerant, technologically sophisticated, idea-oriented society that thrives by understanding what Charles Darwin really said: 'Survival will be neither to the strongest of the species, nor to the most intelligent, but to those most adaptable to change.'" —Frederick Frank, Vice Chairman,

The first plain-paper office copier -- which was introduced in 1960 and has been called the most successful product ever marketed in America -- is unusual among major high-technology inventions in that its central process was conceived by a single person. David Owen's fascinating narrative tells the story of the machine nobody thought we needed but now we can't live without. Chester Carlson grew up in unspeakable poverty, worked his way through junior college and the California Institute of Technology, and made his discovery in solitude in the depths of the Great Depression. He offered his big idea to two dozen major corporations -- among them IBM, RCA, and General Electric -- all of which turned him down. So persistent was this failure of capitalist vision that by the time the Xerox 914 was manufactured by an obscure photographic-supply company in Rochester, New York, Carlson's original patent had expired. Xerography was so unusual and nonintuitive that it conceivably could have been overlooked entirely. Scientists who visited the drafty warehouses where the first machines were built sometimes doubted that Carlson's invention was even theoretically feasible. Drawing on interviews, Xerox company archives, and the private papers of the Carlson family, David Owen has woven together a fascinating and instructive story about persistence, courage, and technological innovation -- a story that has never before been fully told.

In this scholarly yet highly accessible work, Eva Hemmungs Wirtén traces three main themes within the scope of cultural ownership: authorship as one of the basic features of print culture, the use of intellectual property rights as a privileged instrument of control, and finally globalization as a pre-condition under which both operate. Underwritten by rapid technological change and increased global interdependence, intellectual property rights are designed to protect a production that is no longer industrial, but informational. No Trespassing tells the story of a century of profound change in cultural ownership. It begins with late nineteenth-century Europe, exploring cultural ownership in a number of settings across both spatial and temporal divides, and concludes in today's global, knowledge-based society. Wirtén takes an interdisciplinary and international approach, using a wide array of material from court cases to novels for her purposes. From Victor Hugo and the 1886 Berne Convention, to the

translation of Peter Høeg's bestseller *Smilla's Sense of Snow*, Wirtén charts a history of Intellectual property rights and regulations. She addresses the relationship between author and translator, looks at the challenges to intellectual property by the arrival of the photocopier, takes into account the media conglomerate's search for content as a key asset since the 1960s, and considers how a Western legal framework interacts with attempts to protect traditional knowledge and folklore. *No Trespassing* is essential reading for all who care about culture and the future regulatory structures of access to it.
