In this scholarly yet highly accessible work, Eva Hemmungs Wirtén traces three main themes within the scope of cultural ownership: authorship as one of the basic features of print culture, the use of intellectual property rights as a privileged instrument of control, and finally globalization as a pre-condition under which both operate. Underwritten by rapid technological change and increased global interdependence, intellectual property rights are designed to protect a production that is no longer industrial, but informational. *No Trespassing* tells the story of a century of profound change in cultural ownership. It begins with late nineteenth-century Europe, exploring cultural ownership in a number of settings across both spatial and temporal divides, and concludes in today's global, knowledge-based society. Wirtén takes an interdisciplinary and international approach, using a wide array of material from court cases to novels for her purposes. From Victor Hugo and the 1886 Berne Convention, to the translation of Peter Høeg's bestseller *Smilla's Sense of Snow*, Wirtén charts a history of Intellectual property rights and regulations. She addresses the relationship between author and translator, looks at the challenges to intellectual property by the arrival of the photocopier, takes into account the media conglomerate's search for content as a key asset since the 1960s, and considers how a Western legal framework interacts with attempts to protect traditional knowledge and folklore. *No Trespassing* is essential reading for all who care about culture and the future regulatory structures of access to it.

Expand Raspberry Pi capabilities with fundamental engineering principles Exploring Raspberry Pi is the innovators guide to bringing Raspberry Pi to life. This book favors

engineering principles over a 'recipe' approach to give you the skills you need to design and build your own projects. You'll understand the fundamental principles in a way that transfers to any type of electronics, electronic modules, or external peripherals, using a "learning by doing" approach that caters to both beginners and experts. The book begins with basic Linux and programming skills, and helps you stock your inventory with common parts and supplies. Next, you'll learn how to make parts work together to achieve the goals of your project, no matter what type of components you use. The companion website provides a full repository that structures all of the code and scripts, along with links to video tutorials and supplementary content that takes you deeper into your project. The Raspberry Pi's most famous feature is its adaptability. It can be used for thousands of electronic applications, and using the Linux OS expands the functionality even more. This book helps you get the most from your Raspberry Pi, but it also gives you the fundamental engineering skills you need to incorporate any electronics into any project. Develop the Linux and programming skills you need to build basic applications Build your inventory of parts so you can always "make it work" Understand interfacing, controlling, and communicating with almost any component Explore advanced applications with video, audio, real-world interactions, and more Be free to adapt and create with Exploring Raspberry Pi.

"Charley Ellis has written a magnificent portrait, capturing the indomitable spirit of Joe Wilson and his instinctive understanding of the need for and commercial usefulness of a transforming imaging technology. Joe Wilson and his extraordinary team, which I had the good fortune to first meet in 1960, epitomized the wonderful observation of George Bernard Shaw who said, 'Some look at things that are, and ask why? I dream of things that never were and ask why not?' Xerox and xerography are not only a part of our vocabulary, but part of our everyday life. Charley Ellis gives the reader a poignant understanding of just how this happened through the life, adventures, critical business decisions, and dreams of Joseph Wilson and a cadre of remarkable individuals. This book will surely join the library of memorable biographies that capture the building of America into a risk-tolerant, technologically sophisticated, idea-oriented society that thrives by understanding what Charles Darwin really said: 'Survival will be neither to the strongest of the species, nor to the most intelligent, but to those most adaptable to change.'" —Frederick Frank, Vice Chairman, Lehman Brothers Inc.
