This monograph is the outcome of 15 years experience of working with satellite images with the funding from IRPA RM7, ESCAP NASDA, Science Fund and several short term grants. It introduces a new methodology and algorithms for water and air quality monitoring by using conventional digital camera as a sensor to provide multi-spectral remote sensing data. The image is either captured by a digital camera mounted in an unman aircraft vehicle (UAV) or directly captured from a light air-craft. New algorithms were developed to correlate the pollutant concentration with the digital images. The algorithms can also generate a map of the pollutant concentration of the studied area. Pollutant information is very important for survey information, tourism information, development assessment, coastal preservation and area development planning. This new methodology allows images to be captured below the cloud level. Thus, with this method and the algorithms, cloud cover problem of satellite and airborne images can be overcome. They also overcome the problems of time, money, and resources wasted in collecting in-situ data for algorithm calibration of cloud cover satellite images. Furthermore, they provide real-time, high accuracy information. Universiti Sains Malaysia, Penerbit Universiti Sains Malaysia

The Portrait Sterling Publishing Company, Inc.
Entrepreneurs and small business owners are urged to avoid the two biggest branding mistakes they can make—first, investing in building their brand in ways that copycat big-name companies, and second, struggling to build a brand sensitive to everyone and anyone, rather than focusing on those who are spending with them. Led by Dan S. Kennedy, with the support of Forrest Walden and Jim Cavale, the co-founders of Iron Tribe Fitness, and other marketing/branding vets including Bill Gough, the number-one marketing adviser to Allstate agents; Steve Adams, CEO of a chain of 21 retail stores and an e-commerce business, and Nick Nanton, of the Dicks-Nanton Celebrity Branding Agency, entrepreneurs learn how to develop and gain profit from their personal or business brand—without corporate-sized investment. Mastering Kennedy's branding truths and utilizing proven direct-response advertising and marketing methods, entrepreneurs create their own brand tribe—customers who believe in, buy, and promote their brand. Truths and tactics are illustrated with case studies, examples and insights from other well-known brands.

The Bare Bones Camera Course for Film and Video Rocky Nook, Inc.
In 1888, the Eastman Dry Plate and Film Company offered the first portable camera that allowed users to conveniently take photos, using leisure travel as a primary marketing feature to promote it. The combination of portability, ease of use, and mass advertising fed into a national trend of popular photography that drew on Americans' increasing mobility and leisure time. The Kodak Company and the first generation of tourist photographers established new standards for personal archiving that amplified the individual's role in authoring the national narrative. But not everyone had equal access to travel and tourism, and many members of the African American, Native American, and gay and lesbian communities used the camera to counter the racism, homophobia, and classism that shaped

public spaces. In this groundbreaking history, Tammy S. Gordon tells the story of the camera's emerging centrality in leisure travel across the late nineteenth and early twentieth centuries and its role in "the mass production of memory," a process in which users crafted a visual archive attesting to their experiences, values, and circumstances, setting the stage for the customizable visual culture of the digital age.
