Craig's Daguerreian Registry: Photographer biographies Hove Books

This volume honours the work and writings of Professor Sir John Baker over the past fifty years, presenting a collection of essays by leading scholars on topics relating to the sources of English legal

history, the study of which Sir John has so much advanced. The essays range from the twelfth century to the nineteenth, considering courts (central and local), the professions (both common law and civilian), legal doctrine, learning, practice, and language, and the cataloguing of legal manuscripts. The sources addressed include court records, reports of litigation (in print and in manuscript), abridgements, fee books and accounts, conveyances and legal images. The volume advances understanding of the history of the common law and its sources, and by bringing together essays on a range of topics, approaches and periods, underlines the richness of material available for the study of the history of English law and indicates avenues for future research.

Updated, expanded, and covering the latest software, this new edition of the bestselling Digital Landscape Photography brings the amazing techniques pioneered by Ansel Adams and his contemporaries to every digital photographer. Ansel Adams' imagery - especially his iconic vision of the American National Parks - is widely published and instantly recognisable. Many photographers will have heard of his

renowned Zone System, but that is just the tip of the iceberg; his unparalleled attention to detail, which once required hours in the darkroom with specialist tools, is finally accessible to all. Michael Frye's own photography provides many stunning examples of the results that can be achieved, and as one of Adams' natural successors in the field, he is well placed to analyse the many inspirational shots from the great masters of landscape photography. Combining the cutting edge of today's digital work with some of the best-known photos ever taken, this book a must-read for any landscape or nature photographer.

The novel *The Island of the Elyms* is set in a village of Sicily. It touches four generations of a well-to-do family and relates the tragic and humorous occurrences in the life of each member of that family. The story is narrated by a young girl, Marianna, whose romantic ideals and openness are often in conflict

with the secretive and reserved nature of her family. Marianna loves the more salubrious and rustic lifestyle of the land-workers as opposed to the refined and sophisticated lifestyle of her aristocratic family. She feels the former to be an honest way of life and the latter a pretentious and artificial one. Marianna, with the exuberance of youth, would like to see a radical change in the way her family deals with certain issues. She herself represents a slowly changing society. However, the people whose beliefs have been forged and impressed into their very soul by generations of tumultuous historical events, are resistant to change. Eventually, Marianna learns to appreciate the island's cultural richness and its paradox. A sense of history and mythology, superstition and religion, in fact, often exist alongside one another and are portrayed in the novel. The novel touches also on both the First and Second World Wars because two members of Marianna's family, her grandfather and father, fought in each war respectively. It depicts every human emotion by means of adopting humor and tragedy throughout. One might say that in the novel *The Island of the Elyms* there is a book within the book as the lives of Marianna's great grandparents and grandparents emerge. The former being read by Nonna from her mother's memoirs and the latter narrated by Nonna herself. When finally Marianna is comfortable with who she is - different from the rest of her family, she is torn away from her birthplace for the great unknown which happens to be Australia. The story ends with the uprooting of the girl by the family, who, in turn, has to forfeit and abandon every dream, and thus becoming the innocent victim of the tragedy of emigration.

The deadliest strike will come from outer space When America develops the most powerful defense system in history, will it be used to protect the nation—or will it be used to force universal domination? This question must be answered in the stillness of outer space and the corridors of the White House. The United States has just unleashed the most powerful weapon in history—a missile-launching satellite called Thor's Hammer that can strike anywhere on the planet in seconds. Now the United States stands unchecked in military dominance. Or does it? The world's other major superpowers, Russia and China, are rocked by America's development, and they scramble to respond by gaining control of the seas. When terrorists hijack Pakistani missiles and fire them at Indian cities, U.S. president Joseph Gardner has only one option: to use the untested Thor's Hammer. But something goes awry and the

Hammer misses one of its targets, killing thousands of Pakistani civilians. In retaliation, Pakistan and the Middle East decide to give China strategic naval advantage by granting it access to Middle Eastern ports. To make matters worse, days after the crisis, Somali pirates board a Chinese freighter off the coast of Mogadishu and slaughter the crew. China responds by brutally attacking and then occupying Somalia, quickly setting up missile pads that can target U.S. naval ships across vital sea-lanes in the Indian Ocean and the Gulf of Aden, as well as any ships transiting the Suez Canal. Now the U.S. high command is on red alert and the country's security is in total jeopardy. . . . Another flash point quickly emerges—in Earth's orbit. When Chinese and Russian spacecraft surround an American space station, the threat is clear: negotiate and compromise, or China and Russia will cripple the U.S. Navy with ballistic missiles. Retired Air Force lieutenant general Patrick McLanahan returns to assist the commander of the U.S. Space Defense Force, Kai Raydon. But can McLanahan and Raydon stop the Chinese and Russian spaceships? Or will the world's superpowers be plunged into a full-scale war? All the while, President Gardner must face threats from within when his own vice president begins to challenge his decisions—and maybe even his job. With *Executive Intent*, the New York Times bestselling master thriller-writer Dale Brown crafts an action-packed tale of intrigue and technological weaponry that pits the world's superpowers in a contest for Earth's oceans and ultimate high ground—space.
