This volume is aimed at those who are concerned about Chinese medicine - how it works, what its current state is and, most important, how to make full use of it. The audience therefore includes clinicians who want to serve their patients better and patients who are eager to supplement their own conventional treatment. The authors of the book belong to three different fields, modern medicine, Chinese medicine and pharmacology. They provide information from their areas of expertise and concern, attempting to make it comprehensive for users. The approach is macroscopic and philosophical; readers convinced of the philosophy are to seek specific assistance.

First published in 1964, Psychology and Social Problems looks at a changing society and research into problems of the time. Many of the themes in the book, such as delinquency, mental health and racial conflict, are still familiar and current topics of discussion today. Social scientists had carried out extensive research into problems of urgent public concern, yet their findings were not widely known or understood and they had often been diffident in advocating policies based on their conclusions. Michael Argyle discussed the recent psychological and social research bearing on the origins of aggression, delinquency, mental disorder, racial and international prejudice, and industrial discontent; he went on to consider the implications of these studies for prevention and control and for the guidance of social change. This sophisticated and well-documented critique is presented with such lucidity and verve that it will appeal equally to laymen and to students and professional workers and can now be enjoyed in its historical context.

Archaeological research in Sweden and Denmark has uncovered a startling array of evidence over the last 150 years, but until now there has been no comprehensive synthesis and interpretation of the material. An Ethnography of the Neolithic bridges this gap, giving an accessible and up-to-date analysis of a wide range of evidence, from landscapes to monumental tombs to portable artifacts. Christopher Tilley also uses this material as a basis for a provocative and novel reconstruction of late Mesolithic and earlier Neolithic societies in southern Scandinavia, over a period of 3,000 years. His skilful integration of archaeological evidence with new anthropological approaches makes this book an original contribution to an important topic, whose significance stretches outside Scandinavia, and beyond the Neolithic.

Several modern interpretations of Paul's letter to the Galatians claim to uncover an underlying attitude of anti-Judaism. Michael Bachmann refutes those claims with his own detailed exegesis and astute examination of comparative material from the religious environment of that day, revealing instead how Paul embraces both Jews and Gentiles. Bachmann holds that, in the determination of meaning, the literary context of Galatians should be considered over historical background. / Nonetheless, he does engage parallels in Qumran material and archaeology as secondary methods to confirm his exegetical arguments. Through his rigorous examination, Bachmann shows that Galatians exhibits evidence of anti-Judaism not in itself, but only in its reception. / Rich in scholarship and sound exegesis, Anti-Judaism in Galatians? is an ideal text for scholars and students seeking the whole truth about Paul.

Marxist theory has been an undercurrent in western social science since the late nineteenth century. It came into prominence in the social sciences in the 1960s and 1970s and has had a profound effect on history, sociology and anthropology. This book represents an attempt to gather together Marxist perspectives in archaeology and to examine whether indeed they represent advances in archaeological theory. The papers in this volume look forward to the growing use of Marxist theory by archaeologists; as well as enriching archaeology as a discipline they have important implications for sociology and anthropology through the addition of a long-term, historical perspective. This is a book primarily for undergraduates and research students and their teachers in departments of archaeology and anthropology but it should also be of interest to historians, sociologists and geographers.

Our relationship with money is one that lasts a lifetime, yet traditionally books on the subject tend to take one of two routes: a) how to get more, or b) how to deal with less. John Armstrong turns these approaches upside down, and looks not at money itself, but at how we relate to it and the meaning we attach to it. How does it drive us and frighten us? Can it change the world for the better? And how much do we actually need? Offering surprising and helpful new insights, this book will encourage you to redefine your feelings about money, and ultimately enable you to discover what is really important to you in life. One in the new series of books from The School of Life, launched May 2012: How to Stay Sane by Philippa Perry How to Find Fulfilling Work by Roman Krznaric How to Worry Less About Money by John Armstrong How to Change the World by John-Paul Flintoff How to Thrive in the Digital Age by Tom Chatfield How to Think More About Sex by Alain de Botton
