Marxist theory has been an undercurrent in western social science since the late nineteenth century. It came into prominence in the social sciences in the 1960s and 1970s and has had a profound effect on history, sociology and anthropology. This book represents an attempt to gather together Marxist perspectives in archaeology and to examine whether indeed they represent advances in archaeological theory. The papers in this volume look forward to the growing use of Marxist theory by archaeologists; as well as enriching archaeology as a discipline they have important implications for sociology and anthropology through the addition of a long-term, historical perspective. This is a book primarily for undergraduates and research students and their teachers in departments of archaeology and anthropology but it should also be of interest to historians, sociologists and geographers.

Marxist Perspectives in Archaeology Gale Cengage
During recent years a great deal of interest has been devoted to large scale computing applications. This has occurred in great part because of the introduction of advanced high performance computer architectures. The book contains survey articles as well as chapters on specific research applications, development and analysis of numerical algorithms, and performance evaluation of algorithms on advanced architectures. The effect of specialized architectural features on the performance of large scale computation is also considered by several authors. Several areas of applications are represented, including the numerical solution of partial differential equations, iterative techniques for large structured problems, the numerical solution of boundary value problems for ordinary differential equations, numerical optimization, and numerical quadrature. Mathematical issues in computer architecture are also presented, including the description of grey codes for generalized hypercubes. The results presented in this volume

give, in our opinion, a representative picture of today's state of the art in several aspects of large scale computing.

Observations on the Advantages of Introducing Capital, and Promoting Emigration Into the Seignories of Lower Canada Princeton University Press

Learning to argue and persuade in a highly competitive environment is only one aspect of life on a high-school debate team. Teenage debaters also participate in a distinct cultural world--complete with its own jargon and status system--in which they must negotiate complicated relationships with teammates, competitors, coaches, and parents as well as classmates outside the debating circuit. In *Gifted Tongues*, Gary Alan Fine offers a rich description of this world as a testing ground for both intellectual and emotional development, while seeking to understand adolescents as social actors. Considering the benefits and drawbacks of the debating experience, he also recommends ways of reshaping programs so that more high schools can use them to boost academic performance and foster specific skills in citizenship. Fine analyzes the training of debaters in rapid-fire speech, rules of logical argumentation, and the strategic use of evidence, and how this training instills the core values of such American institutions as law and politics. Debates, however, sometimes veer quickly from fine displays of logic to acts of immaturity--a reflection of the tensions experienced by young people learning to think as adults. Fine contributes to our understanding of teenage years by encouraging us not to view them as a distinct stage of development but rather a time in which young people draw from a toolkit of both childlike and adult behaviors. A well-designed debate program, he concludes, nurtures the intellect while providing a setting in which teens learn to make better behavioral choices, ones that will shape relationships in their personal, professional, and civic lives.

• The guide is meant for those with all levels of experience in hunting. This includes those who are simply looking into the prospect of archery hunting to seasoned hunters who are looking to look elsewhere for new hunting practices. • Starting things off the guide will go over everything a good hunter will need in order to properly hunt the elusive whitetail deer. Since there are so many manufacturers out there today, the guide goes over the major differences in different equipment; from compound bows and recurves to the several styles of tree stands. It is an extensive look at the major components. • Equipment is not enough to make a good hunter as the guide then goes into an extensive collection of tips and tricks one would need to successfully hunt a whitetail deer. This includes how to walk into the wood, selecting the right spot, and the proper way to setup. • The guide follows through all the way to the shot and the aftermath. Hunters will learn the proper way to track the deer after the shot and how to field dress it when it is properly found. • Ending, hunters will learn how to bring that deer from the woods to the dinner plate. Tips and tricks are available to properly skin and quarter the deer to harvest the choice piece of meat. About the Expert The author has been practicing archery for over twenty years, starting back on his fifth birthday. Seven years later, he began archery hunting with his father, a seasoned hunter of thirty-plus years. The two belonged to an organization that is contracted by the local county in Pennsylvania to go into the parks to help handle the overgrowing whitetail deer population. The author also works with the organization to process the deer taken out of the parks for a local food bank. On average the group manages to process over two thousand pounds of deer

meat during the hunting season. HowExpert publishes quick 'how to' guides on all topics from A to Z by everyday experts.

Nineteenth-Century Literature Criticism assembles critical responses to the works of 19th-century authors of all sorts--novelists, poets, playwrights, journalists, philosophers, political leaders, scientists, mathematicians and writers from other genres--from every region of the world. Each of the more than 300 volumes in this long-standing series profiles approximately 3-6 novelists, poets, playwrights, journalists, philosophers or other creative and nonfiction writers by providing full-text or excerpted criticism reproduced from books, magazines, literary reviews, newspapers and scholarly journals. Clear, accessible introductory essays followed by carefully selected critical responses allow end-users to engage with a variety of scholarly views and conversations about authors, works and literary topics. Introductory essays are written and entries compiled by professional literature researchers and other subject matter experts; many include an author portrait. A full citation and annotation precede each of the approximately 50 essays per volume. The series currently covers nearly 600 authors and also includes numerous entries focusing on literary topics and individual works. Students writing papers or class presentations, instructors preparing their syllabi, or anyone seeking a deeper understanding of the 19th century will find this a highly useful resource.

The critically acclaimed author of *Crossing Myself* tells the next chapter of his personal story as he reflects on issues of discernment, discipleship, and vocation that should matter to everyone. How can you live faithfully when you're not quite sure where life is taking you? How do you find joy and purpose in the midst of the uncertain, the unfinished, the uneasy? Inspired and comforted by Thomas Merton's famous prayer that begins, "My Lord God, I have no idea where I am going," award-winning writer and teacher Greg Garrett looks back at his own recent journey and tells stories from his life that will speak to anyone who has ever felt that sense of being lost along the way. Deeply honest and fully engaging, these reflections on discernment, discipleship, relationship, and vocation will inspire readers to reflect on their own journeys and discover surprising ways that God may be moving in their own lives.
