In 2001, the consequences of almost three decades of neoliberalismo made Argentina collapse. Out of the ashes of the ensuing social convulsion arose many different attempts by people to take the future into their own hands.

Among them were the workers who started to put bankrupt, abandoned factories to work again in spite of the skepticism of

politicians and part of society. Their successful stories surprised those who had expected them to fail and encouraged others to follow their example. In 2003, Esteban Magnani worked for Avi Lewis and Naomi Klein on a documentary on the phenomenon called The Take and wrote a book on recovered factories which is now being reprinted with an update for English speakers.

Reviews a great number of novels by Anglo-Irish

women novelists that - with few exceptions - have attracted little attention from contemporary and modern literary critics. The main focus is on the literature and its society. The disposition of this study reflects the areas of contention experienced by the Anglo-Irish of the period. Chapter 1, Land and Politics, deals with the Anglo-Irish landlords and their families. Chapter 2 is devoted to different aspects of religion. Chapter 3, Race, discusses the Celt and his presumed characteristics. The 'other' race, the English, will get some

attention, as will the Protestant Anglo-Irish themselves. Chapter 4 focuses on this new ruling class, 'the new Irish'. A brief conclusion follows. Empire of Enchantment Springer Science & Business Media  
This unique and encyclopedic reference work describes the evolution of the physics of modern shock wave and detonation from the earlier and classical percussion. The history of this complex process is first reviewed in a general survey. Subsequently, the subject is treated in more detail

and the book is richly illustrated in the form of a picture gallery. This book is ideal for everyone professionally interested in shock wave phenomena. Protestant Women Novelists and Irish Society 1879-1922 CRC Press

In recent years, landscape has become increasingly recognised as a topic of central importance to a wide variety of disciplines. To a large degree this recognition has been based upon an expanding appreciation of the political aspects of landscape, its ideological character and effects. Landscapes and Politics is an innovative cross-disciplinary volume of new writing which brings

together, in a strategic and productive encounter, a broad variety of critical work currently being done in this field. With 28 papers and five photo essays. Landscapes and Politics presents material by scholars and practitioners from anthropology, archaeology, architecture, art history, cultural studies, English and American literature, film studies, fine art, geography, history, landscape architecture, philosophy, political

science, and religious studies. As an important marker of current methodologies, research and practice across these different disciplinary areas Landscapes and Politics is an invaluable resource. It will be of interest to all those concerned with current discourses and debates on landscape and its representation. 160 b/w illustrations

Now recognized as one of the giants of postwar American fiction, William

Gaddis (1922 – 98) shunned the spotlight during his life, which makes this collection of his letters a revelation. Beginning in 1930 when Gaddis was at boarding-school and ending in September 1998, a few months before his death, these letters function as a kind of autobiography, and are all the more valuable because Gaddis was not an autobiographical writer. Here we see him forging his first novel *The Recognitions* (1955) while living in Mexico, fighting in a revolution in Costa Rica, and working in Spain, France, and North Africa.

Over the next twenty years he struggles to find time to write the National Book Award-winning *J R* (1975) amid the complications of work and family; deals with divorce and disillusionment before reviving his career with *Carpenter's Gothic* (1985); then teaches himself enough about the law to indite *A Frolic of His Own* (1994), which earned him another NBA. Returning to a topic he first wrote about in the 1940s, he finishes his last novel *Agape Agape* as he lay dying.

The untold human story of  
a massacre of Korean  
civilians by American  
soldiers in the early days of  
the Korean War, by the  
Pulitzer Prize-winning  
journalists who uncovered  
it In the fall of 1999, a team  
of Associated Press  
investigative reporters  
broke the news that U.S.  
troops had massacred a  
large group of South  
Korean civilians early in  
the Korean War. On the eve  
of that pivotal war's 50th  
anniversary, their reports

brought to light a story that  
had been suppressed for  
decades, confirming  
allegations the U.S. military  
had sought to dismiss. It  
made headlines around the  
world. In *The Bridge at No  
Gun Ri*, the team tells the  
larger, human story behind  
the incident through the  
eyes of the people who  
survived it: on the American  
side, the green recruits of  
the "good time" U.S.  
occupation army in Japan  
made up of teenagers who  
viewed unarmed farmers as  
enemies and generals who  
had never led men into  
battle; on the Korean side,  
the peasant families forced

to flee their ancestral village  
caught between the invading  
North Koreans and the U.S.  
Army. The narrative looks  
at victims both Korean and  
American; at the ordinary  
lives and high-level  
decisions that led to the  
fatal encounter; at the  
terror of the three-day  
slaughter; at the memories  
and ghosts that forever  
haunted the survivors. The  
story of *No Gun Ri* also  
illuminates the larger story  
of the Korean War-also  
known as the *Forgotten War*-  
and how an arbitrary  
decision to divide the  
country in 1945 led to the  
first armed conflict of the

Product sales, especially  
for new products, are  
influenced by many  
factors. These factors  
are both internal and  
external to the selling  
organization, and are both  
controllable and

uncontrollable. Due to the  
enormous complexity of  
such factors, it is not  
surprising that product  
failure rates are relatively  
high. Indeed, new product  
failure rates have  
variously been reported  
as between 40 and 90  
percent. Despite this  
multitude of factors,  
marketing researchers  
have not been deterred  
from developing and  
designing techniques to  
predict or explain the  
levels of new product  
sales over time. The  
proliferation of the

internet, the necessity of  
developing a road map to  
plan the launch and exit  
times of various  
generations of a product,  
and the shortening of  
product life cycles are  
challenging firms to  
investigate market  
penetration, or innovation  
diffusion, models. These  
models not only provide  
information on new  
product sales over time  
but also provide insight  
on the speed with which a  
new product is being  
accepted by various  
buying groups, such as

---

those identified as innovators, early adopters, early majority, late majority, and laggards. *New Product Diffusion Models* aims to distill, synthesize, and integrate the best thinking that is currently available on the theory and practice of new product diffusion models. This state-of-the-art assessment includes contributions by individuals who have been at the forefront of developing and applying these models in industry.

The book's twelve chapters are written by a combined total of thirty-two experts who together represent twenty-five different universities and other organizations in Australia, Europe, Hong Kong, Israel, and the United States. The book will be useful for researchers and students in marketing and technological forecasting, as well as those in other allied disciplines who study relevant aspects of innovation diffusion. Practitioners in high-tech

and consumer durable industries should also gain new insights from *New Product Diffusion Models*. The book is divided into five parts: I. Overview; II. Strategic, Global, and Digital Environments for Diffusion Analysis; III. Diffusion Models; IV. Estimation and V. Applications and Software. The final section includes a PC-based software program developed by Gary L. Lilien and Arvind Rangaswamy (1998) to

---

implement the Bass diffusion model. A case on high-definition television is included to illustrate the various features of the software. A free, 15-day trial access period for the updated software can be downloaded from <http://www.mktgeng.com/diffusionbook>. Among the book's many highlights are chapters addressing the implications posed by the internet, globalization, and production policies upon diffusion of new products and technologies in the

population.

The integration of technological innovations, such as In-Memory Analytics, Cloud Computing, Mobile Connectivity, and Social Media, with business practice can enable significant competitive advantage. In order to embrace recent challenges and changes in the governance of IT strategies, SAP and its think tank - the Business Transformation Academy

(BTA) - have jointly developed the Digital Capability Framework (DCF). Digital Enterprise Transformation: A Business-Driven Approach to Leveraging Innovative IT by Axel Uhl and Lars Alexander Gollenia outlines the DCF which comprises six specific capabilities: Innovation Management, Transformation Management, IT Excellence, Customer Centricity, Effective Knowledge Worker, and Operational Excellence. In cooperation with the University of Applied Sciences and Arts Northwestern Switzerland,

---

University of St. Gallen (Switzerland), Queensland University of Technology (Australia), University of Liechtenstein (Principality of Liechtenstein), and Karlsruhe Institute of Technology (Germany), SAP and the BTA have been validating each capability and the corresponding maturity models based on analyzing several 'lighthouse' case studies comprising: SAMSUNG, IBM, Finanz Informatik, The Walt Disney Company, Google Inc., HILTI AG. Digital Enterprise Transformation presents how these

companies take advantage of innovative IT and how they develop their digital capabilities. On top the authors also develop and present a range of novel yet hands-on Digital Use Cases for a number of different industries which have emerged from innovative technological trends such as: Big Data, Cloud Computing, 3D Printing and Internet of Things. Diffusion of Technologies and Social Behavior Springer Science & Business Media Wee felt it before in sense; but now wee know

it by science. Edward Misselden (1623) The collective effort reported in this volume is the outcome of the diffusion of the idea of diffusion as a fundamental process in society. The considerable number of disciplines represented here indicates the weight of the problem area. The editors are to be congratulated for their initiative in drawing together present thinking at a vivid meeting, now also in print. An old timer in the business has not

---

much to add. But maybe some things, bearing in mind that a Preface is a celebration and not a review. As always with ideas it is hard to identify those who first gave shape to the idea of diffusion. In a general sense it is probably an observation as old as human self-reflection that groups of populations exchange ideas and copy habits and implements from each other. Sometimes it has even been recommended, as a Chinese proverb

suggested millenia ago, "If you want to become a good farmer, look at your neighbor" .
