On the northern slope of the island of Serendipity is a small, wonderful kingdom called the Land of Later. In this kingdom there lived a young, beautiful princess who everyone simply called Princess. The castle was

governed by the king's simple rules. One of those rules was that when you woke in the morning, you cleaned your room and made your bed. Princess hated rules. Most of all, she hated doing anything at any time unless it was much, much later. This morning, as on others, she awoke, got dressed, and went outside and took a walk instead of cleaning her room. Princess walked into the forest near the castle. "I should start back before I get lost," she whispered to a bunny on the path. Then she laughed, "I will go back but just, just a little later!" It was on the journey that Princess met a unicorn called Morgan. And it was on this journey, with the help of Morgan, that she learned that doing things now is always much better than later.

Applying Machiavellian precepts to such modern corporations as General

Motors, Apple Computer, and Microsoft, Jay discovers self-contained states with courtiers and diplomats, orthodoxy and heresy lurking under their smooth corporate veneers. Though humorous, Jay's message is clear. To understand the workings of corporation or states, you must understand the nature and behavior of their leaders. And that hasn't changed since the Middle Ages.

The Internet is the most remarkable thing human beings have built since the Pyramids. John Naughton's book intersperses wonderful personal stories with an authoritative account of where the Net actually came from, who invented it and why and where it might be taking us. Most of us have no idea how the Internet works, or who created it. Even fewer have any idea what it means for society and the future. In a cynical age, John Naughton has not lost his capacity for wonder. He examines the nature of his own enthusiasm for technology and traces its roots in his lonely childhood and in his relationship with his father. A Brief History of the Future is an intensely personal celebration of vision and altruism, ingenuity and determination and, above all, of the power of ideas, passionately felt, to change the world.
