Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. This is an astonishingly candid insight into the world of Billie Piper.

Famous since the age of 15 - first as the face of Smash Hits, then as a pop singer with three No.1 hits in less than three years - Billie Piper has won over the critics and the British public for a second time by re-inventing herself as an actress in BBC productions of Much Ado About Nothing, The Canterbury Tales and, of course, Doctor Who. And that's just the

professional Billie. In this book, for the first time, she talks honestly about her whirlwind romance and marriage to Chris Evans, about her battles with anorexia and the dark side of teen fame. Moving, funny and honest, this is a page-turning read by one of the nation's favourite stars.

It's been said that, with smartphones, everyone is a photographer. There is a snide implication with that statement—that camera phones aren't "real" cameras and that the people who use them aren't "real" photographers. In this book, Robert Fisher proves that today's Android devices offer cameras that are remarkably powerful and more than capable of producing images that rival those made with more "serious" equipment. In this book, Fisher guides readers through the menus of the Android operating system, helping them to understand how to choose and use out-of-the-box controls for better images. Next, he covers add-on accessories and applications designed to enhance the devices' capabilities. While the photographic capabilities of the "base" camera are pretty terrific and will meet with rave reviews from many users, the camera really produces images that sing when suited up with DSLR functions, filters, and postproduction effects—all of which Fisher covers with prowess and technical skill.

Portelli offers a new and challenging approach to oral history, with an interdisciplinary and multicultural perspective. Examining cultural conflict and communication between social groups and classes in industrial societies, he identifies the way individuals strive to create memories in order to make sense of their lives, and evaluates the impact of the fieldwork experience on the consciousness of the researcher. By recovering the value of the story-telling experience, Portelli's work makes delightful reading for the specialist and non-specialist alike. Alessandro Portelli is Professor of American Literature at the University of Rome "La Sapienza."

In a story that is both of its time and timeless, Evan I. Schwartz tells a tale of genius versus greed, innocence versus deceit, and independent brilliance versus corporate arrogance. Many men have laid claim to the title "father of television," but Philo T. Farnsworth is the true genius behind what may be the most influential invention of our time. Driven by his obsession to demonstrate his idea, by the age of twenty Farnsworth was operating his own laboratory above a garage in San Francisco and filing for patents. The resulting publicity caught the attention of RCA tycoon David Sarnoff, who became determined to control television in the same way he monopolized radio. Based on original research, including interviews with Farnsworth family members, *The Last Lone Inventor* is the story of the epic struggle between two equally passionate adversaries whose clash symbolized a turning point in the culture of creativity.

When George H. W. Bush asked Doro to write this memoir, she contacted hundreds of his friends and associates; conducted scores of interviews with dignitaries including Bill Clinton, Mikhail Gorbachev, and General Colin Powell; tapped the memories of family members, including her mother, her four brothers, and of course, her father himself; and collected information from the former president's never-before-released files. "Now for the first time, a complete portrait of George H. W. Bush emerges. Doro reveals her father as a young man courting his future wife, Barbara, and how the death of their first daughter brought them closer. Doro tells how they raised five children through much of her father's long and storied career in public service, and offers details about this tenures as head of the Republican National Committee during Watergate, ambassador to the U.N., America's liaison to China, and vice president for eight years under Ronald Reagan." "Doro also provides an insider's look at how the 41st president dealt with crises and challenges, all while keeping his humor and personality intact, and how he still does so while aiding victims of the 2004 tsunami and Hurricane Katrina. She shows how he felt when two of his sons entered politics - and when his eldest made it to the top - and sheds new light on his friendship with former rival Bill Clinton."--BOOK JACKET.
