Canon Powershot G15 "O'Reilly Media, Inc." Media philosopher Vil é m Flusser proposed a revolutionary new way of thinking about photography. An analysis of the medium in terms of aesthetics, science and politics provided him with new ways of understanding both the cultural crises of the past and the new social forms nascent within them. Flusser showed how the transformation of textual into visual culture (from the linearity of history into the two-dimensionality of magic) and of industrial into post-industrial society (from work into leisure) went hand in hand, and how photography allows us to read and interpret these

changes with particular clarity.

I discovered very quickly that the Pentax 645 was much easier to use than the

Hasselblad 500c. I got more photos per roll, too, even though they were smaller than the 6-by-6cm of the 500c. The were/are 6-by-4.5cm, which is where the "645" comes from in the name. One thing I did notice was the clarity and sharpness of that prime lens. To my eyes, it was just as good if not a tiny bit better than the renowned Carl Zeiss Planar 80mm f/2.8 prime lens. I started shooting with the Pentax 645 a lot because unlike the 500c and the two Mamiyas, it isn't a pain to use. It acts a lot like a 35mm SLR or even a DSLR, much more so than my three other medium-format cameras.
