China's Christianity Morgan Kaufmann

In *Developing Mission*, Joseph W. Ho offers a transnational cultural history of US and Chinese communities framed by missionary lenses through time and space—tracing the lives and afterlives of images, cameras, and visual imaginations from before the Second Sino-Japanese War through the first years of the People's Republic of China. When American Protestant and Catholic missionaries entered interwar China, they did so with cameras in hand. Missions principally aimed at the conversion of souls and the modernization of East Asia, became, by virtue of the still and moving images recorded, quasi-anthropological ventures that shaped popular understandings of and formal foreign policy toward China. Portable photographic technologies changed the very nature of missionary experience, while images that missionaries circulated between China and the United States affected cross-cultural encounters in times of peace and war. Ho illuminates the centrality of visual practices in the American missionary enterprise in modern China, even as intersecting modernities and changing Sino-US relations radically transformed lives behind and in front of those lenses. In doing so, *Developing Mission* reconstructs the almost-lost histories of transnational image makers, subjects, and viewers across twentieth-century China and the United States.

"Like Brazilian society, documentary filmmaking is undergoing transformation, becoming an increasingly inclusive and diverse field, intervening in the ongoing struggle for social justice and equal distribution of power. As the first English-language monograph to focus on this body of work, this book examines the ways in which contemporary documentaries explore the borders between centers and margins, visibilities and invisibilities, silences and speech,

and forms of authority and their contestation. Centered on an eclectic cluster of documentaries -from ethnographic documentaries and indigenous videos to films concerned with social and criminal justice, including first-person, essayistic films - this book brings into view the transformations of both Brazilian society and filmmaking, ultimately examining the genre's preoccupation with archival content"--

Excerpt from *Picture Taking and Picture Making* This little volume will not tell everything about photography. It will trouble the reader with few technicalities and no theories. In it we shall simply endeavor to start the amateur in the right direction. His own ambitions, tastes and energies will guide him afterwards. Frankly, we shall recommend our own goods in the chapters on apparatus, etc., which are to follow. Years of experience have given us ideas as to how a camera should be made so that it will be best adapted to the amateur's use. In these pages we give to you the results of that experience; in our work shop we build Kodaks in accordance with the ideas this experience has given us. This book and our manufactures are, therefore, in perfect harmony. We do not, however, confine ourselves to goods of our own make, full directions, for instance, being given for working the Platinum, Carbon, Gum Bi-chromate and plain paper processes, none of which use our goods. The other directions for the use of standard goods apply to those of other manufacturers as well as our own. Some of the instructions herein given will already have been read in our manuals by the Kodak owners, yet it is necessary to repeat them for the benefit of those who have not yet made a photographic start, but at the same time the book will contain much information not to be obtained from a mere manual. A beautifully illustrated look at the vogue for night landscapes amid the social, political, and technological changes of modern America The turn of the 20th century witnessed a surge in the creation and popularity of nocturnes and night landscapes in American art. In this original and thought-provoking book, Hélène Valance investigates why artists and viewers of the era were so captivated by the night. Nocturne examines works by artists such as James McNeill Whistler, Childe Hassam, Winslow Homer, Frederic Remington, Edward Steichen, and Henry Ossawa Tanner through the lens of the scientific developments and social issues that dominated the period. Valance argues that the success of the genre is connected to the resonance between the night and the many forces that affected the era, including technological advances that expanded the realm of the visible, such as electric lighting and photography; Jim Crow—era race relations; America's closing frontier and imperialism abroad; and growing anxiety about identity and social values amid rapid urbanization. This absorbing study features 150 illustrations encompassing paintings, photographs, prints, scientific illustration, advertising, and popular media to explore the predilection for night imagery as a sign of the times.

At the end of the nineteenth century, print media dominated British popular culture, produced in greater variety and on a larger scale than ever before. Within decades, new visual and auditory media had ushered in a mechanized milieu, displacing print from its position at the heart of cultural life. During this period of intense change, illustrated magazines maintained a central position in the media landscape by transforming their letterpress orientation into a visual and multimodal one. Ultimately, this transformation was important for the new media cultures of the twentieth and twenty-first centuries. Making Pictorial Print recovers this chapter in the history of new media, applying concepts from media theory and the digital humanities to analyse four popular late-Victorian magazines – the *Illustrated London News*, the *Graphic*, *Pearson's Magazine*, and the *Strand* – and the scrapbook media that appropriated them. Using the concept of media literacy, these case studies demonstrate the ways in which periodical design aesthetics affected the terms of engagement presented to readers, creating opportunities for them to participate in and even contribute to popular culture. Shaped by publishers, advertisers, and readers themselves, the pages of these periodicals document the emergence of modern mass culture as we know it and offer insight into the new media of our digital present.

Petersen's Photographic Magazine Rowman & Littlefield

Coeditors Elizabeth Patton and Mimi Choi argue that an in-depth examination of media images of housework from the mid-nineteenth century to the early twenty-first century is long overdue. Modern depictions often imply that certain concerns can be resolved through excessive domesticity, reflecting some of the complicated and unfinished issues of second-wave feminism. Home Sweat Home: Perspectives on Housework and Modern Relationships reveals how widespread the cultural image of "perfect" housewives and the invisibility of household labor were in the past and remain today. In this collection of essays, contributors explore the construction of women as homemakers and the erasure of household labor from the middle-class home in popular representations of housework. They concentrate on such matters as the impact of second-wave feminism on families and gender relations; of popular culture—especially in film, television, magazines, and advertising—on our views of what constitutes home life and gender relations; and of changing views of sexuality and masculinity within the domestic sphere. Home Sweat Home will interest students and scholars of gender, cultural, media, and communication studies; sociology; and American history and appeal to anyone curious about housework, gender relations and popular culture.
