In *Developing Mission*, Joseph W. Ho offers a transnational cultural history of US and Chinese communities framed by missionary lenses through time and space—tracing the lives and afterlives of images, cameras, and visual imaginations from before the Second Sino-Japanese War through the first years of the People's Republic of China. When American Protestant and Catholic missionaries entered interwar China, they did so with cameras in hand. Missions principally aimed at the conversion of souls and the modernization of East Asia, became, by virtue of the still and moving images recorded, quasi-anthropological ventures that shaped popular understandings of and formal foreign policy toward China. Portable photographic technologies changed the very nature of missionary experience, while images that missionaries circulated between China and the United States affected cross-cultural encounters in times of peace and war. Ho illuminates the centrality of visual practices in the American missionary enterprise in modern China, even as intersecting modernities and changing Sino-US relations radically transformed lives behind and in front of those lenses. In doing so, *Developing Mission* reconstructs the almost-lost histories of transnational image makers, subjects, and viewers across twentieth-century China and the United States.

This book provides a strategic framework for cost efficient engineering of market moving patent portfolios by organizing patent engineering efforts around the problems that innovators solve for their customers and not the technologies developed to solve these problems. Patents are a vital asset in the modern business world. They allow patent holders to introduce new products in to a market while deterring other market players from simply copying innovative features without making comparable investments in research and development. In years past, a few patents may have provided adequate protection. That is no longer the case. In today's world, it is critical that innovative companies protect the features of their products that give them a competitive advantage with a family or portfolio of patents that are strategically generated to protect the market position of the patent holder. A patent portfolio that deters competitors from introducing competitive products in a timely manner can be worth billions of dollars. Anything less than this is an expensive and possibly fatal distraction. This book provides a strategic framework for cost efficient engineering of patent portfolios that protect your investments in research and development and that extend the market advantages that these investments provide. The book illustrates the use of the problem centric framework to enable the efficient creation of individual patents and patent portfolios that have significant value in and by themselves and allow a company to control its product market. It also introduces the concept of a patent engineer whose role it is to organize input from legal, business and technical communities and organize portfolios and patents using the problem centric framework.

Thinking Spanish Translation Jeffrey Frank Jones

Coeditors Elizabeth Patton and Mimi Choi argue that an in-depth examination of media images of housework from the mid-nineteenth century to the early twenty-first century is long overdue. Modern depictions often imply that certain concerns can be resolved through excessive domesticity, reflecting some of the complicated and unfinished issues of second-wave feminism. *Home Sweat Home: Perspectives on Housework and Modern Relationships* reveals how widespread the cultural image of "perfect" housewives and the invisibility of household labor were in the past and remain today. In this collection of essays, contributors explore the construction of women as homemakers and the erasure of household labor from the middle-class home in popular representations of housework. They concentrate on such matters as the impact of second-wave feminism on families and gender relations; of popular culture—especially in film, television, magazines, and advertising—on our views of what constitutes home life and gender relations; and of changing views of sexuality and masculinity within the domestic sphere. *Home Sweat Home* will interest students and scholars of gender, cultural, media, and communication studies; sociology; and American history and appeal to anyone curious about housework, gender relations and popular culture.

Thanks to Facebook and Instagram, our childhoods have been captured and preserved online, never to go away. But what happens when we can't leave our most embarrassing moments behind? Until recently, the awkward moments of growing up could be forgotten. But today we may be on the verge of losing the ability to leave our pasts behind. In *The End of Forgetting*, Kate Eichhorn explores what happens when images of our younger selves persist, often remaining just a click away. For today's teenagers, many of whom spend hours each day posting on social media platforms, efforts to move beyond moments they regret face new and seemingly insurmountable obstacles. Unlike a high school yearbook or a shoebox full of old photos, the information that accumulates on social media is here to stay. What was once fleeting is now documented and tagged, always ready to surface and interrupt our future lives. Moreover, new innovations such as automated facial recognition also mean that the reappearance of our past is increasingly out of our control. Historically, growing up has been about moving on—achieving a safe distance from painful events that typically mark childhood and adolescence. But what happens when one remains tethered to the past? From the earliest days of the internet, critics have been concerned that it would endanger the innocence of childhood. The greater danger, Eichhorn warns, may ultimately be what happens when young adults find they are unable to distance themselves from their pasts. Rather than a childhood cut short by a premature loss of innocence, the real crisis of the digital age may be the specter of a childhood that can never be forgotten.

A beautifully illustrated look at the vogue for night landscapes amid the social, political, and technological changes of modern America. The turn of the 20th century witnessed a surge in the creation and popularity of nocturnes and night landscapes in American art. In this original and thought-provoking book, Hélène Valance investigates why artists and viewers of the era were so captivated by the night. Nocturne examines works by artists such as James McNeill Whistler, Childe Hassam, Winslow Homer, Frederic Remington, Edward Steichen, and Henry Ossawa Tanner through the lens of the scientific developments and social issues that dominated the period. Valance argues that the success of the genre is connected to the resonance between the night and the many forces that affected the era, including technological advances that expanded the realm of the visible, such as electric lighting and photography; Jim Crow-era race relations; America's closing frontier and imperialism abroad; and growing anxiety about identity and social values amid rapid urbanization. This absorbing study features 150 illustrations encompassing paintings, photographs, prints, scientific illustration, advertising, and popular media to explore the predilection for night imagery as a sign of the times.

[Digital Video Pocket Guide](#) CRC Press

Over 1,300 total pages ... To the young man or woman choosing a Navy career field, whether for one enlistment or for 30 years, the journalist rating offers endless avenues for an imaginative, yet mature, thinker. Many of the duties and responsibilities of the journalist rank among Americans' favorite hobbies and pastimes, such as writing, broadcasting and photography. The Navy journalist learns and practices a distinguished profession and becomes an official representative of the Navy in public affairs matters. The first enlisted specialists to work full time in the field of Navy journalism were Naval Reserve personnel selected during the early years of World War II. They were designated Specialist X (Naval Correspondents). In 1948, under a major overhaul affecting almost every enlisted rating, the journalist (JO) rating was established. MAJOR TASKS AND RESPONSIBILITIES LEARNING OBJECTIVE: Identify the major tasks and responsibilities of the Navy journalist, the personal traits required for one to best perform the duties of the rating, the applicable NECs, and the purpose of the JO 3 & 2 training manual (TRAMAN). In our democratic society, government depends on the consent of the governed. This important principle means that, in the long run, the United States government does only what the people want it to do. Therefore, we can have a Navy only if the people know and understand the importance of the Navy and support it. The Navy, like the other services, depends on this country's citizens for the four key tools of its trade — personnel, money, materials and the authority to carry out its mission. As a Navy journalist, your main function will be to make the facts about your Navy available to the Navy's three main publics — the people at your ship or station, Navy people in general and the people of the United States as a whole.

Popular Mechanics Sterling Publishing Company, Inc.

A black and white illustrated user's manual for the Panasonic Lumix DMC FZ1000 camera covering both the basic camera set up in the full auto (intelligent auto) and all the other, semi-automatic and manual modes. [Kodak Master Photoguide](#)

The volume offers an outstanding collection of studies on the interaction of IP and competition policy and is highly recommended for academics, graduate students, and practitioners with an interest in more theoretical studies. Ioannis Lianos, World Competition. Each chapter in the Research Handbook on Intellectual Property and Competition Law is written so lucidly that it will be of great interest to law professors and post graduate students of intellectual property and competition law, as well as those interested in innovation and competition theory, and legal practices in intellectual property and competition law. Madhu Sahni, Journal of Intellectual Property Rights. This is a book that delivers on its promise. With a strong cast of contributors from a variety of countries, economies and disciplines, it makes the reader wonder how any commercially attractive IP ever gets exploited at all. IPKAT. Here it comes: the book that I have been waiting for! This will surely be an inspiring source of knowledge in my Masters Programme in European Intellectual Property Law at Stockholm University. While promoting intellectual property protection as an important means for innovations and cultural developments, a critical analysis and a flexible approach to the needs for free creative space and effective competition is crucial. As this book so well illustrates, this delicate balance is no either/or. Marianne Levin, Stockholm University, Sweden. This comprehensive Handbook brings together contributions from American, Canadian, European, and Japanese writers to better explore the interface between competition and intellectual property law. Issues range from the fundamental to the specific, each considered from the angle of cartels, dominant positions, and mergers. Topics covered include, among others, technology licensing, the doctrine of exhaustion, network industries, innovation, patents, and copyright. Appropriate space is devoted to the latest developments in European and American antitrust law, such as the more economic approach and the question of anti-competitive abuses of intellectual property rights. Each original chapter reflects extensive comments by all other contributors, an approach which ensures a diversity of perspectives within a systematic framework. These cutting edge articles will be of great interest to law professors and postgraduate students of intellectual property and competition law, as well as those interested in innovation and competition theory, and legal practices in intellectual property and competition law.
