More than any other area of regulation, antitrust economics shapes law and policy in the United States, the Americas, Europe, and Asia. In a number of different areas of antitrust, advances in theory and empirical work have caused a fundamental reevaluation and shift of some of the assumptions behind antitrust policy. This reevaluation has profound implications for the future of the field. The Oxford Handbook of International Antitrust Economics has collected chapters from many of the leading figures in antitrust. In doing so, this two volume Handbook provides an important reference guide for scholars, teachers, and practitioners. However, it is more than a merely reference guide. Rather, it has a number of different goals. First, it takes stock of the current state of scholarship across a number of different antitrust topics. In doing so, it relies primarily upon the economics scholarship. In some situations, though, there is also coverage of legal scholarship, case law developments, and legal policies. The second goal of the Handbook is to provide some ideas about future directions of antitrust scholarship and policy. Antitrust economics has evolved over the last 60 years. It has both shaped policy and been shaped by policy. The Oxford Handbook of International Antitrust Economics will serve as a policy and research guide of next steps to consider when shaping the future of the field of antitrust.

Kodak Guide to Digital Photography Legare Street Press
Coeditors Elizabeth Patton and Mimi Choi argue that an in-depth examination of media images of housework from the mid-nineteenth century to the early twenty-first century is long overdue. Modern depictions often imply that certain concerns can be resolved through excessive domesticity, reflecting some of the complicated and unfinished issues of second-wave feminism. *Home Sweat Home: Perspectives on Housework and Modern Relationships* reveals how widespread the cultural image of “perfect” housewives and the invisibility of household labor were in the past and remain today. In this collection of essays, contributors explore the construction of women as homemakers and the erasure of household labor from the middle-class home in popular representations of housework. They concentrate on such matters as the impact of second-wave feminism on families and gender relations; of popular culture—especially in film, television, magazines, and advertising—on our views of what constitutes home life and gender relations; and of changing views of sexuality and masculinity within the domestic sphere. *Home Sweat Home* will interest students and scholars of gender, cultural, media, and communication studies; sociology; and American history and appeal to anyone curious about housework, gender relations and popular culture.

In *Developing Mission*, Joseph W. Ho offers a transnational cultural history of US and Chinese communities framed by missionary lenses through time and space—tracing the lives and afterlives of images, cameras, and visual imaginations from before the Second Sino-Japanese War through the first years of the People's Republic of China. When American Protestant and Catholic missionaries entered interwar China, they did so with cameras in hand. Missions principally aimed at the conversion of souls and the modernization of East Asia, became, by virtue of the still and moving images recorded, quasi-anthropological ventures that shaped popular understandings of and formal foreign policy toward China. Portable photographic technologies changed the very nature of missionary experience, while images that missionaries circulated between China and the United States affected cross-cultural encounters in times of peace and war. Ho illuminates the centrality of visual practices in the American missionary enterprise in modern China, even as intersecting modernities and changing Sino-US relations radically transformed lives behind and in front of those lenses. In doing so, *Developing Mission* reconstructs the almost-lost histories of transnational image makers, subjects, and viewers across twentieth-century China and the United States.
