Your chance to relive a little piece of "The Good Old Days" and find the answers to these burning questions: Which future Coast Guard Captain said "Shit, Mal, let's do a 360 and get out of here." Which Coast Guard astronaut said, when asked to describe his scariest moment, "Flying as Malcolm Smith's co-pilot." Which Coast Guard aviator got the blame for putting training wheels and streamers on the commanding officer's and XO's new bicycles. Which Coast Guard aviator threw up in his glove while flying rather than make a mess in the cockpit. This book brings back some of the funniest moments of the Coast Guard during the time period between the "Old Guard" and the new modern Coast Guard. "For more than two decades, Mal has threatened to write a book to chronicle his many colorful experiences during his Coast Guard aviation career. Mal can spin a tale better than any sailor and his exploits in and out of the cockpit are indeed legendary. But the fact is, the closer he gets to the completion of this life-long dream of his, the more nervous I become. I can't wait to read it!" RADM David W. Kunkel, COAST GUARD AVIATOR #1726 "Malcolm Smith is a master storyteller with a flair for finding humor in everyday activities and recounting his observations with entertaining splendor that leaves you thirsting for another. Since meeting him when I was a teenager in Alaska, I have been absorbed by his colorful renditions and have long awaited this composition. I just hope I'm not the subject in one of

his stories." CAPT. E. Darrell Nelson, COMMANDING OFFICER, CGAS KODIAK
Army, Navy, Air Force Journal & Register Food & Agriculture Org. Covering New York, American & regional stock exchanges & international companies.

Detailed, full-color anatomical illustrations have drawn over a million readers to this popular anatomy series. Now Running Anatomy is the ideal resource for fitness runners and competitive runners hoping to improve performance by increasing muscular strength and optimizing the efficiency of the running motion, while minimizing the risk for injury. Anatomical illustrations highlight the muscles in action during effective running exercises and help readers assess and rehab running injuries like plantar fasciitis and ITB syndrome. Original.

Fishery Bulletin

A complete guide to modifying small-block Chevrolet engines used in the powerboat industry. Includes a detailed look at the differences between auto and marine engines, and a breakdown on the marine components of a small-block Chevy. Fully illustrated.

Running Anatomy

Comprehensive troubleshooting guide for most outboard marine engines. Includes detailed diagnostic tips, DVA measurements, engine specific test data, and much more.

Small-block Chevy Marine Performance

Comprehensive manual for understanding and carrying out marine mammal rescue activities for stranded seals, manatees, dolphins, whales, or sea otters.

Marine Engineering and Shipping Review

This paper provides an extensive review of different aspects of five shellfish-poisoning syndromes (paralytic, diarrhoeic, amnesic, neurologic and azapiracid), as well as one fish-poisoning syndrome (ciguatera fish poisoning), and discusses in detail the causative toxins produced by marine organisms, chemical structures and analytical methods of the toxins, habitat and occurrence of the toxin-producing organisms, case studies and existing regulations. Based on this analysis, risk assessments are carried out for each of the toxins, and recommendations are elaborated to improve the management of these risks in order to reduce the harmful effect of these toxins on public health.

Federal Register

AAP Prose Award Finalist 2018/19 For three decades, this book has been acknowledged as the most respected scientific reference specifically devoted to marine mammal medicine and health. Written by approximately 100 contributors who are recognized globally as leaders in their respective fields, the CRC Handbook of Marine Mammal Medicine, Third Edition continues to serve as the essential guide for all practitioners involved with marine mammals including veterinarians, technicians, biological researchers, students, managers, keepers, curators, and trainers. The 45 chapters provide essential information for the practitioner on pathology, infectious diseases, medical treatment, anesthesia, surgery, husbandry, health assessment, species-specific medicine, medically pertinent anatomy and physiology, and global health concerns such as strandings, oil spills, and entanglements of marine mammals. Covers all aspects of marine mammal veterinary practice Written by internationally acknowledged experts Adds new chapters on Ophthalmology, Dentistry, Ethics, Oil Spill Response, Health Assessments, Whale Entanglement Response, Dive Response, and Biotoxins Richly illustrated in color throughout the new edition including updated anatomical drawings and extensive photographs of ocular lesions Provides guidance to websites that regularly present updated information and images pertinent to current marine mammal medicine such as imaging and stranding network contacts Discusses ethics and animal welfare. The book guides the reader through the veterinary care of cetaceans, pinnipeds, manatees, sea otters, and polar bears. In addition to summaries of current knowledge, chapters provide information on those digital resources and websites which present

the latest information as it emerges in the field. The CRC Handbook of Marine Mammal Medicine, Third Edition gives a call to action for scientists to experiment with new endeavors to engage and inspire current and future generations to care for marine mammals and the marine environment, and work together to find solutions. As the most trusted reference for marine mammal conservation medicine and for marine mammal medical facilities around the world, this book needs to be in your library.
