Day after bloody day they withstood the terrible onslaught, buying time for the Greeks to rally their forces. Born into a cult of spiritual courage,

physical endurance, and unmatched battle skill, the Spartans would be remembered for the greatest military stand in history—one that would not end until the rocks were awash with blood, leaving only one gravely injured Spartan squire to tell the tale. . . .

Official U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon *Sapiens*, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? *Homo Deus* explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is *Homo Deus*. With the same insight and clarity that made *Sapiens* an international hit and a New York Times bestseller, Harari maps out our future.

The first woman in America to own and operate a circus, Agnes Lake spent thirty years under the Big Top before becoming the wife of Wild Bill Hickok—a mere five months before he was killed. Although books abound on the famous lawman, Agnes' s life has remained obscured by circus myth and legend. Linda A. Fisher and Carrie Bowers have written the first biography of this colorful but little-known circus performer. Agnes originally found fame as a slack-wire walker and horseback rider, and later as an animal trainer. Her circus career spanned more than four decades. Following the murder of her first husband, Bill Lake, she was the sole manager of the " Hippo-Olympiad and Mammoth Circus. " While taking her show to Abilene, she met town marshal Hickok and five years later she married him. After Hickok' s death, Agnes traveled with P. T. Barnum and Buffalo Bill Cody, and managed her daughter Emma Lake' s successful equestrian career. This account of a remarkable life cuts through fictions about Agnes' s life, including her own embellishments, to uncover her true story. Numerous illustrations, including rare photographs and circus memorabilia, bring Agnes' s world to life.

This book brings together recent research on interpersonal relationships in education from a variety of perspectives including research from Europe, North America and Australia. The work clearly demonstrates that positive teacher-student relationships can contribute to student learning in classrooms of various types. Productive learning environments are characterized by supportive and warm interactions throughout the class: teacher-student and student-student. Similarly, at the school level, teacher learning thrives when there are positive and mentoring interrelationships among professional colleagues. Work on this book began with a series of formative presentations at the second International Conference on Interpersonal Relationships in Education (ICIRE 2012) held in Vancouver, Canada, an event that included among others, keynote addresses by David Berliner, Andrew Martin and Mieke Brekelmans. Further collaboration and peer review by the editorial team resulted in the collection of original research that this book comprises. The volume (while eclectic) demonstrates how constructive learning environment relationships can be developed and sustained in a variety of settings. Chapter contributions come from a range of fields including educational and social psychology, teacher and school effectiveness research, communication and language studies, and a variety of related fields. Together, they cover the important influence of the relationships of teachers with individual students, relationships among peers, and the relationships between teachers and their professional colleagues.

The University of Notre Dame Press is pleased to bring Ernst Haas's classic work on European integration, *The Uniting of Europe*, back into print. First published in 1958 and last printed in 1968, this seminal volume is the starting point for anyone interested in the pre-history of the European Union. Haas uses the European Coal and Steel Community (ECSC) as a case study of the community formation processes that occur across traditional national and state boundaries. Haas points to the ECSC as an example of an organization with the "power to redirect the loyalties and expectations of political actors." In this pathbreaking book Haas contends that, based on his observations of the actual integration process, the idea of a "united Europe" took root in the years immediately following World War II. His careful and rigorous analysis tracks the development of the ECSC, including, in his 1968 preface, a discussion of the eventual loss of the individual identity of the ECSC through its absorption into the new European Community. Featuring a new introduction by Haas analyzing the impact of his book over time, as well as an updated bibliography, *The Uniting of Europe* is a must-have for political scientists and historians of modern and contemporary Europe.

This book is the inaugural volume of Notre Dame's new Contemporary European Politics and Society Series.

Bestselling author Gill Paul returns with a brilliant novel about Lady Evelyn Herbert, the woman who took the very first step into the tomb of Pharaoh Tutankhamun, and who lived in the real Downton Abbey, Highclere Castle, and the long after-effects of the Curse of Pharaohs. Lady Evelyn Herbert was the daughter of the Earl of Carnarvon, brought up in stunning Highclere Castle. Popular and pretty, she seemed destined for a prestigious marriage, but she had other ideas. Instead, she left behind the world of society balls and chaperones to travel to the Egyptian desert, where she hoped to become a lady archaeologist, working alongside her father and Howard Carter in the hunt for an undisturbed tomb. In November 1922, their dreams came true when they discovered the burial place of Tutankhamun, packed full of gold and unimaginable riches, and she was the first person to crawl inside for three thousand years. She called it the "greatest moment" of her life—but soon afterwards everything changed, with a string of tragedies that left her world a darker, sadder place. Newspapers claimed it was "the curse of Tutankhamun," but Howard Carter said no rational person would entertain such nonsense. Yet fifty years later, when an Egyptian academic came asking questions about what really happened in the tomb, it unleashed a new chain of

events that seemed to threaten the happiness Eve had finally found.

As insightful and wise today as it was when originally published in 1954, Jacques Ellul's The Technological Society has become a classic in its field, laying the groundwork for all other studies of technology and society that have followed. Ellul offers a penetrating analysis of our technological civilization, showing how technology—which began innocuously enough as a servant of humankind—threatens to overthrow humanity itself in its ongoing creation of an environment that meets its own ends. No conversation about the dangers of technology and its unavoidable effects on society can begin without a careful reading of this book. "A magnificent book . . . He goes through one human activity after another and shows how it has been technicized, rendered efficient, and diminished in the process. ” —Harper's “ One of the most important books of the second half of the twentieth-century. In it, Jacques Ellul convincingly demonstrates that technology, which we continue to conceptualize as the servant of man, will overthrow

everything that prevents the internal logic of its development, including humanity itself—unless we take necessary steps to move human society out of the environment that 'technique' is creating to meet its own needs. ” —The Nation “ A description of the way in which technology has become completely autonomous and is in the process of taking over the traditional values of every society without exception, subverting and suppressing these values to produce at last a monolithic world culture in which all non-technological difference and variety are mere appearance. ” —Los Angeles Free Press

The book will help athletes, entrepreneurs, and innovators working in the sports industry to spot trendsetting technologies, gain deeper insights into how they will affect their activities, and identify the most effective responses to stay ahead of the competition both on and off the pitch.

A tale beautifully, wisely, and masterfully told. ” — Paula McLain, author of The Paris Wife and Circling the Sun From the multiple-award-winning, critically acclaimed author of The Hummingbird and The Curiosity comes a dazzling novel of World War II—a shimmering tale of courage, determination, optimism, and the resilience of the human spirit, set in a small Normandy village on the eve of D-Day. On June 5, 1944, as dawn rises over a small town on the Normandy coast of France, Emmanuelle is making the bread that has sustained her fellow villagers in the dark days since the Germans invaded her country. Only twenty-two, Emma learned to bake at the side of a master, Ezra Kuchen, the village baker since before she was born. Apprenticed to Ezra at thirteen, Emma watched with shame and anger as her kind mentor was forced to wear the six-pointed yellow star on his clothing. She was likewise powerless to help when they pulled Ezra from his shop at gunpoint, the first of many villagers stolen away and never seen again. In the years that her sleepy coastal village has suffered under the enemy, Emma has silently, stealthily fought back. Each day, she receives an extra ration of flour to bake a dozen baguettes for the occupying troops. And each day, she mixes that precious flour with ground straw to create enough dough for two extra loaves—contraband bread she shares with the hungry villagers. Under the cold, watchful eyes of armed soldiers, she builds a clandestine network of barter and trade that she and the villagers use to thwart their occupiers. But her gift to the village is more than these few crusty loaves. Emma gives the people a taste of hope—the faith that one day the Allies will arrive to save them.
