Hock the platinum. Take down the vacation photos. Cancel the joint checking account. There's no question . . . Divorce Sucks. And perhaps no one knows that better than author Mary Jo Eustace, whose ex-husband Dean McDermott married Tori Spelling a mere thirty days after their divorce was finalized. One part tell-all and one part guide to get readers on their feet after a bitter breakup, this hilarious addition to the bestselling Sucks series tells everything readers don't want to know about divorce - from what a phone call with a lawyer will cost; to how to handle your newer, younger replacement; to what Hollywood divorcees are actually thinking when they watch their ex walk the red carpet with a millionairess. Sometimes horrifying, sometimes gratifying, and never merciful, this book will give readers an inside look at one of today's most public divorces while reminding them - hey, it could always be worse.

Power Farming in Australia and New Zealand Technical Manual D.J. Gingery

An astutely argued and elegantly written (and translated) book on the philosophical genealogy and logical implications of the work of Jacques Lacan.--Choice Alcohol Fuel Fox Chapel Publishing

From the bestselling author of Day of Infamy: In the bloodiest island combat of WWII, one group of men kept watch from behind Japanese lines. The Solomon Islands was where the Allied war machine finally broke the Japanese empire. As pilots, marines, and sailors fought for supremacy in Guadalcanal, Bougainville, and the Slot, a lonely group of radio operators occupied the Solomon Islands ' highest points. Sometimes encamped in comfort, sometimes exposed to the elements, these coastwatchers kept lookout for squadrons of Japanese bombers headed for Allied positions, holding their own positions even when enemy troops swarmed all around. They were Australian-born but Solomon-raised, and adept at survival in the unforgiving jungle environment. Through daring and insight, they stayed one step ahead of the Japanese, often sacrificing themselves to give advance warning of an attack. In Lonely Vigil, Walter Lord, the #1 New York Times – bestselling author of A Night to Remember and The Miracle of Dunkirk, tells of the survivors of the campaign and what they risked to win the war in the Pacific.

Application for Employment I refer to the recent death of the Technical Manager at your company and hereby apply for the replacement of the deceased manager. Each time I apply for a job, I get a reply that there is no vacancy but in this case I have caught you red-handed and you have no excuse because I even attended the funeral to be sure that he was truly dead and buried before applying. Attached to my letter is a copy of my CV and his death certificate. Crap CVs is a hilarious compilation of the worst job applications imaginable, including overly-honest cover letters, embarrassing typos, mortifying personal revelations, awkward interview questions, misplaced self-confidence, self-aggrandizing gibberish, blatant truth-twisting and, of course, outright lies.

"This book describes how the genome sequence contributes to our understanding of allopolyploidisation and the genome evolution, genetic diversity, complex trait regulation and knowledge-based breeding of this important crop. Numerous examples demonstrate how widespread homoeologous genome rearrangements and exchanges have moulded structural genome diversity following a severe polyploidy bottleneck. The allopolyploid crop species Brassica napus has the most highly duplicated plant genome to be assembled to date, with the largest number of annotated genes. Examples are provided for use of the genome sequence to identify and capture diversity for important agronomic traits, including seed quality and disease resistance. The increased potential for detailed gene discovery using high-density genetic mapping, quantitative genetics and transcriptomic analyses is described in the context of genome availability and illustrated with recent examples. Intimate knowledge of the highly-duplicated gene space, on the one hand, and the repeat landscape on the other, particularly in comparison to the two diploid progenitor genomes, provide a fundamental basis for new insights into

the regulatory mechanisms that are coupled with selection for polyploid success and crop evolution"--Publisher's description.

Sheet Metal Technology is written in Dave ' s unique style with the beginner or vocational student in mind as he demonstrates how a product idea is conceived, developed and then produced by a single craftsman with basic

tools. Subjects covered are safety in the shop, use of tools, layout and pattern development, various ways of forming and joining metal along with edging methods, corner systems and panel reinforcement. You will be introduced to the basic sheet metal shop where you will learn about various methods of forming sheet metal and in some instances even constructing your own tools including a rather unique and functional 24" sheet metal brake constructed of hardwood. The final chapter opens with a mass production operation set up to demonstrate the efficiency and economy of modern industrial technology. Then further projects are progressively introduced as skill is acquired. Such projects as a dustpan for the shop, a handy tool tote tray as well as plans for single and double hinge tool boxes. By this time you are an advanced student and ready to construct the unique portable charcoal grill and the impressive three drawer tool chest from the plans provided. Dave Gingery brings it all within your grasp and you will be amazed at what can be produced with tin snips, standard measuring tools and a 24" sheet metal brake.
