Toward a Science of Consciousness II Springer Science & Business Media
Numerical procedures based on the 2-D and 3-D full potential equations and the 2-D Navier-Stokes equations

were developed to study the effects of leading and trailing edge flap motions on the aerodynamics of parallel airfoil-vortex interactions and on the aerodynamics and acoustics of the more general self-generated rotor blade vortex interactions (BVI). For subcritical interactions, the 2-D results indicate that the trailing edge flap can be used to alleviate the impulsive loads experienced by the airfoil. For supercritical interactions, the results show the necessity of using a leading edge flap, rather than a trailing edge flap, to alleviate the interaction. Results for various

time dependent flap motions and their effect on the predicted temporal sectional loads, differential pressures, and the free vortex trajectories are presented. For the OLS model rotor, contours of a BVI noise metric were used to quantify the effects of the trailing edge flap on the size and directivity of the high/low intensity noise region(s). Average reductions in the BVI noise levels on the order of 5 dB with moderate power penalties on the order of 18 pct. for a four bladed rotor and 58 pct. for a two bladed rotor were obtained. From the bestselling author of *Day of Infamy*: In the bloodiest island combat of WWII, one group of men kept watch from behind Japanese lines. The Solomon Islands was where the Allied war machine finally broke the Japanese empire. As pilots, marines, and sailors fought for supremacy in Guadalcanal, Bougainville, and the Slot, a lonely group of radio operators occupied the Solomon Islands' highest points. Sometimes encamped in comfort, sometimes exposed to the elements, these coastwatchers kept lookout for squadrons of Japanese bombers headed for Allied positions, holding their own positions even

when enemy troops swarmed all around. They were Australian-born but Solomon-raised, and adept at survival in the unforgiving jungle environment. Through daring and insight, they stayed one step ahead of the Japanese, often sacrificing themselves to give advance warning of an attack. In *Lonely Vigil*, Walter Lord, the #1 New York Times – bestselling author of *A Night to Remember* and *The Miracle of Dunkirk*, tells of the survivors of the campaign and what they risked to win the war in the Pacific.

Bulk Material Handling New Society Publishers

Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions

to any problem. The engineer's personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as:

- physical principles of various material handling systems;
- considerations in selecting technically efficient and environmentally friendly equipment;
- best practices in upgrading and optimizing existing bulk material handling

facilities;

- strategies to select proper equipment in the early phases of a new project. Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems.

Ping-Pong Art and Literary
Journal of the Henry Miller
Library 2012
Letter From the Editor,
2012 Dear Reader, Thank you
for picking up this magazine.
Inside you will find a world of
wonders. If you are like most
people you will flick through
and look at the art first. We are
proud to feature gallery prints

from iconic photographer Kim
Weston. The art editor and I
met Kim a few years ago at the
Henry Miller Library over
dinner, and have been trying to
get his beautiful photographs in
our magazine ever since. It is
thanks to the dogged tenacity of
River Tabor that we are able to
feature work by an astounding
member of the Weston
dynasty. Tim Youd did an
entire art exhibit based on a
passage out of Henry Miller's
Tropic of Capricorn. We have
a poem by Big Sur visitor and
raconteur Richard Brautigan.
This poem seems to embody
the internal landscape of the

author. We are fortunate to
have so many talented people
in the planisphere that is the
Henry Miller Memorial library,
and are happy to have so many
West Coast writers and artists
featured in this issue. The
Library is an amazing cultural
venue, a local's hang out, a
bookstore, a concert venue, and
a film theatre, but it is also a
fragile watershed. Our
commitment to keeping this
delicate ecosystem in check is
part of why this year we have
launched into our capital
fundraising campaign, in an
effort to retrofit Emil White's
little cabin into a place that

hosts such acts as Thurston Moore of Sonic Youth. I met Thurston on a damp afternoon at the library. I am not an interviewer per say, but I do love listening to people's stories. Thurston Moore and I talked about poetry and art under a persimmon tree, the interview featured herein is the fruit... The East Coast is always well represented since half of our editors live in Brooklyn, which I like to call the poetry capital of the U.S. of A. We have the wondrous poets Leah Umansky, J. Hope Stein, Joanna Penn Cooper and Angela Wong
