In the tradition of Jon Krakauer's *Into Thin Air* and Sebastian Junger's *The Perfect Storm* comes a true tale of riveting adventure in which two weekend scuba divers risk everything to solve a great historical mystery—and make history themselves. For John Chatterton and Richie Kohler, deep wreck diving was more than a sport. Testing themselves against treacherous currents, braving depths that induced hallucinatory effects, navigating through wreckage as perilous as a minefield, they pushed themselves to their limits and beyond, brushing

against death more than once in the rusting hulks of sunken ships. But in the fall of 1991, not even these courageous divers were prepared for what they found 230 feet below the surface, in the frigid Atlantic waters sixty miles off the coast of New Jersey: a World War II German U-boat, its ruined interior a macabre wasteland of twisted metal, tangled wires, and human bones—all buried under decades of accumulated sediment. No identifying marks were visible on the submarine or the few artifacts brought to the surface. No historian, expert, or government had a clue as to which U-boat the men had found. In fact, the official records all agreed that there simply could not be a sunken U-boat and crew at that location. Over the next six years, an elite team of divers embarked on a quest to solve the mystery. Some of them would not live to see its end. Chatterton and Kohler, at first bitter rivals, would be drawn into a friendship that deepened to an almost mystical sense of brotherhood with each other and with the drowned U-boat sailors—former enemies of their country. As the men's marriages frayed under the pressure of a shared obsession, their dives grew more daring, and each realized that he was hunting more than the identities of a lost U-boat and its nameless crew. Author Robert Kurson's account of this quest is at once thrilling and emotionally complex, and it is written with a vivid sense of what divers actually experience when they meet the dangers of the ocean's underworld. The story of *Shadow Divers* often seems too amazing to be true, but it all happened, two hundred thirty feet down, in the deep blue sea. **BONUS:** This edition includes an excerpt from Robert Kurson's *Pirate*

Die inhaltlichen Schwerpunkte des Tagungsbands zur ATZlive-Veranstaltung Heavy-Duty-, On- und Off-Highway-Motoren 2016 liegen unter anderem auf neuen Motoren und Komponenten für Nutzfahrzeuge, Off-Highway sowie Marine und Stationäranlagen, der Schadstoffreduzierung, der Einspritzung sowie Lösungen zur Motor- und Systemoptimierung. Die Berichte der Konferenz zeigen aktuelle und künftige Entwicklungen bei schweren Diesel- und Gasmotoren für verschiedene Anwendungen auf. Die Konferenz ist eine unverzichtbare Plattform für den internationalen Erfahrungsaustausch der

Großmotoren-Experten. Die Steigerung der Effizienz bei gleichzeitiger Reduzierung der Schadstoffe und des Kraftstoffes sind weiterhin wichtige Zielsetzungen bei der Entwicklung neuer Motoren. Hierfür benötigt man einerseits neue, innovative Konzepte und Lösungen, andererseits muss aber auch das Zusammenspiel bestehender einzelner Systeme und Komponenten genau analysiert werden.
