This volume addresses the potential for combining large-scale marine aquaculture of macroalgae, molluscs, crustaceans, and finfish, with offshore structures, primarily those associated with energy production, such as wind turbines and oil-drilling platforms. The volume offers a comprehensive overview and includes chapters on policy, science, engineering, and economic aspects to make this concept a reality. The compilation of chapters authored by

internationally recognized researchers across the globe addresses the theoretical and practical aspects of multi-use, and presents case studies of research, development, and demonstration-scale installations in the US and EU.

SPOTLIGHTING CLASSIC

ARTICLES Five decades of landmark original research findings and reviews

Highlighting some of the most important findings reported over the past five decades, this volume features some of the best technical papers published on alumina and bauxite from 1963 to 2011. Papers have been divided into thirteen subject sections for ease of access. Each section has a brief introduction

and a list of recommended articles for researchers interested in exploring each subject in greater depth. Only about fifteen percent of the alumina and bauxite papers ever published in Light Metals were chosen for this volume. Selection was based on a rigorous review process. Among the papers, readers will find landmark original research findings and expert reviews summarizing current thinking on key topics at the time of publication. From basic research to advanced applications, the articles published in this volume collectively represent our body of knowledge in alumina and bauxite. Students, scientists, and engineers should turn to this volume to discover the historical development of alumina and bauxite research as well as the current state of the science and the technology. Moreover, the papers published in this volume will serve as a springboard for future research and discoveries.

"Character" has become a  
front-and-center topic in  
contemporary discourse, but  
this term does not have a fixed  
meaning. Character may be  
simply defined by what  
someone does not do, but a  
more active and thorough  
definition is necessary, one that  
addresses certain vital  
questions. Is character a  
singular characteristic of an  
individual, or is it composed of  
different aspects? Does  
character--however we define  
it--exist in degrees, or is it  
simply something one happens  
to have? How can character be  
developed? Can it be learned?  
Relatedly, can it be taught, and  
who might be the most  
effective teacher? What roles  
are played by family, schools,  
the media, religion, and the  
larger culture? This  
groundbreaking handbook of  
character strengths and virtues

is the first progress report from a  
prestigious group of researchers  
who have undertaken the  
systematic classification and  
measurement of widely valued  
positive traits. They approach  
good character in terms of  
separate strengths--authenticity,  
persistence, kindness, gratitude,  
hope, humor, and so on--each of  
which exists in degrees.  
Character Strengths and  
Virtues classifies twenty-four  
specific strengths under six  
broad virtues that consistently  
emerge across history and  
culture: wisdom, courage,  
humanity, justice, temperance,  
and transcendence. Each  
strength is thoroughly  
examined in its own chapter,  
with special attention to its  
meaning, explanation,  
measurement, causes,  
correlates, consequences, and  
development across the life  
span, as well as to strategies for  
its deliberate cultivation. This  
book demands the attention of  
anyone interested in psychology  
and what it can teach about the  
good life.

From the editor: "71F, or "71

Foxtrot," is the AOC (area of  
concentration) code assigned by  
the U.S. Army to the specialty  
of Research Psychology.  
Qualifying as an Army research  
psychologist requires, first of all,  
a Ph.D. from a research (not  
clinical) intensive graduate  
psychology program. Due to  
their advanced education,  
research psychologists receive a  
direct commission as Army  
officers in the Medical Service  
Corps at the rank of captain. In  
terms of numbers, the 71F  
AOC is a small one, with only  
25 to 30 officers serving in any  
given year. However, the 71F  
impact is much bigger than this  
small cadre suggests. Army  
research psychologists apply  
their extensive training and  
expertise in the science of  
psychology and social behavior  
toward understanding,  
preserving, and enhancing the  
health, well being, morale, and  
performance of Soldiers and  
military families. As is clear  
throughout the pages of this  
book, they do this in many ways  
and in many areas, but always  
with a scientific approach. This  
is the 71F advantage: applying  
the science of psychology to  
understand the human  
dimension, and developing  
programs, policies, and  
products to benefit the person  
in military operations. This  
book grew out of the April 2008  
biennial conference of U.S.  
Army Research Psychologists,  
held in Bethesda, Maryland.  
This meeting was to be my last

as Consultant to the Surgeon General for Research Psychology, and I thought it would be a good idea to publish proceedings, which had not been done before. As Consultant, I'd often wished for such a document to help explain to people what it is that Army Research Psychologists "do for a living." In addition to our core group of 71Fs, at the Bethesda 2008 meeting we had several brand-new members, and a number of distinguished retirees, the "grey-beards" of the 71F clan. Together with longtime 71F colleagues Ross Pastel and Mark Vaitkus, I also saw an unusual opportunity to capture some of the history of the Army Research Psychology specialty while providing a representative sample of current 71F research and activities. It seemed to us especially important to do this at a time when the operational demands on the Army and the total force were reaching unprecedented levels, with no sign of easing, and with the Army in turn relying more heavily on research psychology to inform its programs for protecting the health, well being, and performance of Soldiers and their families." If you are like most people you will flick through and look at the art first. We are proud to feature

gallery prints from iconic photographer Kim Weston. The art editor and I met Kim a few years ago at the Henry Miller Library over dinner, and have been trying to get his beautiful photographs in our magazine ever since. It is thanks to the dogged tenacity of River Tabor that we are able to feature work by an astounding member of the Weston dynasty. Tim Youd did an entire art exhibit based on a passage out of Henry Miller's Tropic of Capricorn. We have a poem by Big Sur visitor and raconteur Richard Brautigan. This poem seems to embody the internal landscape of the author. We are fortunate to have so many talented people in the planisphere that is the Henry Miller Memorial library, and are happy to have so many West Coast writers and artists featured in this issue. The Library is an amazing cultural venue, a local's hang out, a bookstore, a concert venue, and a film theatre, but it is also a fragile watershed. Our commitment to keeping this delicate ecosystem in check is part of why this year we have launched into our capital fundraising campaign, in an effort to retrofit Emil White's little cabin into a place that hosts such acts as Thurston Moore of Sonic Youth. I met Thurston on a damp afternoon at the library. I am not an interviewer per se, but I do love listening to people's stories. Thurston Moore and I talked about poetry and art under a persimmon tree, the interview featured herein is the fruit... The East Coast is always well represented since half of our editors live in Brooklyn, which I like to call the poetry capital of the

I have tried in this revision to incorporate the main lessons of the last sixteen years. These lessons have been considerable. I consider it a real and extensive revision--even though I had to do only a moderate amount of rewriting--because the main thrust of the book has been modified in important ways which I shall detail below.
