The Science Focus Second Edition package retains the identified strengths of the highly successful First Edition and includes a number of new and exciting features, improvements and components.

Over 220 of the World's Greatest Tractors Independently Published

In his *Metaphysical Foundations of Natural Science* (1786), Kant accounts for the possibility of an acting-at-a-distance gravitational force, demonstrates the infinite divisibility of matter, and derives analogues to Newtonian laws of motion. The work is his major statement in philosophy of science, and was especially influential in German-speaking countries in the nineteenth century. However, this complex text has not received the scholarly attention it deserves. The chapters of this Critical Guide clarify the accounts of matter, motion, the mathematization of nature, space, and natural laws exhibited in the *Metaphysical Foundations*; elucidate the relationship between its metaphysics of nature and Kant's critical philosophy; and describe the historical context for Kant's account of natural science. The volume will be an invaluable resource for understanding one of Kant's most difficult works, and will set the agenda for future scholarship on Kant's philosophy of science.

i-Science Textbook 2 Penguin

This story about a parent's promise is a perfect way to teach children about the importance of patience and displaying positive emotions in a negative situation. In this mommy and me book, Kennedi really wants to go on her dream vacation to Disney World. But when her mom was hurt in an accident and the trip was delayed, Kennedi became frustrated. However, her passion for princesses led to her resilience in keeping her dream vacation alive.

The Optometric Profession Cambridge University Press

"HOW SWEET IT IS will set your heart on fire" -Robyn Carr, New York Times bestselling author

"One sweet read! Everything I love best: humor, warmth, emotions that pull at the heartstrings, characters that step off the page, and a wonderful love story." -- Mariah Stewart, New York Times bestselling author HOW SWEET IT IS Single mom Lizzie Bea Carpenter learned long ago that no white knight was coming to save her. A hardworking waitress at the local diner, she's raising her daughter to be like the independent women in her "Enemy Club"--high school rivals turned best friends, promising to always tell each other the whole truth and nothing but! Yet part of Lizzie wishes she did have a man's help, just for small stuff, like fixing up the house. Her fairy godmother must have been listening, because Dante "Tay" Giovanni soon appears. He's sexy, kind, and offering assistance--no strings attached. Slowly, steadily, Lizzie's heart opens. But the grip of the past is fierce, and nothing in life is ever really free. Tay has his own tragedies to overcome, but if he can, he'll fix more than Lizzie's home. He'll show her just how sweet it is to be loved by him.

Bucyrus-Erie Company is a name synonymous with moving the earth. From the smallest loader-backhoe to some of

the largest machines ever to move on land, no other company has produced such a wide variety of types and sizes of excavating equipment. With a rich heritage going back 128 years the company, now known as Bucyrus International Inc., is still designing and building some of the world ' s largest shovels and walking draglines. Nothing could be more apt to describe this manufacturing power house than its slogan used in the 1960s " The Longest Line on Earth " . Over 450 spectacular black and white photos combined with detailed captions chronicle and describe all the major equipment product lines from Bucyrus Company, Erie Steam Shovel, Bucyrus-Erie and Ruston-Bucyrus. Every machine model from the extensive lines of cable excavators, hydraulic excavators, walking draglines, stripping shovels and drills is included, plus tables of machine introductions and production. There ' s also detailed coverage of floating dredges, tractor equipment, cranes, bucket wheel excavators and other special machines. This book is sure to satisfy the serious equipment historian as well as the enthusiast.

And Why We Love Them Springer Science & Business Media

It was the closest we ever came to unleashing the Third World War.... The image of that world was so horrible to contemplate that both sides stepped away from that precipice and opted for peace. Fires of October is the exhilarating military history of the Cuban Missile Crisis exploring in detail the strategic plans implemented by American Armed Forces as they headed towards a catastrophic nuclear collision with Cuba and the USSR. Using recently declassified material, Blaine Pardoe systematically recounts the origins of the crisis, from the Berlin Crisis of 1961 and Cuba s military metamorphosis, to the internal disorganization of the US military, which exacerbated tensions between the USA, Cuba, and the USSR. Pardoe reveals that the invasion plans were based on old intelligence, outdated maps, and misconceptions about the size, strength, and composition of the Soviet forces in Cuba; for the first time, and with harrowing results, he scrutinizes the potential fallout had the invasion gone ahead. Gripping and unnerving, Fires of October shows us just how close the world came to nuclear war.

5th International Conference, Porto, Portugal, June 26-28, 2002. Selected Papers and Invited Talks Southwater Publishing

British Opencast Coal is an illustrated history of coal mining by surface methods from 1942 to 1985. Written by Keith Haddock, a leading authority on the subject, this book details the origins of the industry and documents the types of earthmoving machines employed during the first 40 years. The book highlights the importance of surface coal mining operations and site restoration and their necessity for the British economy. Meticulously researched, the facts, figures and data covered are taken from Keith's extensive collection of magazine articles, newspaper cuttings and manufacturers' machine brochures and specifications. They are also drawn from publications by the National Coal Board Opencast Executive and Keith's own research conducted on numerous site visits. The sites included represent a cross section of geologically different locations in England, Scotland and Wales, and those employing the most interesting variety of earthmoving machines, such as Maesgwyn in South Wales, Newman Spinney in Derbyshire, Radar North in Northumberland and Ox-Bow in Yorkshire. The book's 364 historical photographs, many taken for the National Coal Board or British Coal Opencast, provide a nostalgic look at obsolete earthmoving and heavy construction equipment, and form an excellent historical resource for the student, researcher or enthusiast.
