In 1913, outraged by Henri Matisse's painterly violations of the female body, students of the School of the Art Institute of Chicago found him guilty of "artistic murder" and "rapine" and proceeded to burn in effigy three of his works, including the Blue Nude of 1907. Since that time, Matisse's paintings of women have remained a source of deep controversy. In *Pleasuring Painting*, John Elderfield skillfully picks his way through the knotty politics of painterly pleasure, tracing the development of Matisse's feminine representations from Carmelina of 1903/4 through to the odalisques of the Nice period of the 1920s, offering a startling reinterpretation of some of the artist's best-known works. The author shows that Matisse was not, as his legend suggests, simply a painter of quintessentially male pleasures, but rather one who used his female models as a means of self-analysis and identification.

In this book, Dr. Li and his author team plan to emphasize why mouse models are useful in vivo systems for understanding disease mechanisms and developing therapeutic strategies in blood cancers. The authors do not intend to cover all types of blood cancers; instead, they will focus on some major ones such as leukemias and lymphomas. However, the authors will try to cover as much as they can the cancer types and point out that many blood cancers need to be studied in mouse disease models although they are still not available at present. A major focus in the book will be to show what we can or cannot learn from mouse disease models and to also show the critical contributions of mouse models in therapeutic drug development.

Ernst Ludwig Kirchner's remarkable series of paintings known as the Berlin Street Scenes is a highpoint of the artist's work and a milestone of German Expressionism, widely seen as a metaphor for modernity itself through their depiction of life in a major metropolis. Kirchner moved from Dresden to Berlin in 1911, and it was in this teeming city, immersed in its vitality, decadence and underlying sense of danger posed by the imminent World War I, that he created the Street Scenes in a sustained burst of creative energy and ambition between 1913 and 1915. As the most extensive consideration of these paintings in English, this richly illustrated volume examines the creative process undertaken by the artist as he explores his theme through various mediums, and presents the major body of related charcoal drawings, pen-and-ink studies, pastels, etchings, woodcuts and lithographs he created in addition to the paintings. The volume also investigates the significance of the streetwalker as a primary motif, and provides insight on the series in the context of Kirchner's wider oeuvre.
