Wanted: Company Daughters. Virtuous young ladies to become the brides of industrious

settlers in a foreign land. The Company will pay the cost of the lady ' s dowry and travel. Returns not permitted, orphans preferred. Amsterdam, 1620. Jana Beil has learned that life rarely provides moments of joy. Having run away from a violent father, her days are spent searching for work in an effort to stay out of the city brothels, where desperate women trade their bodies for a mouthful of bread. But when Jana is hired as a servant for the wealthy and kind Master Reynst and his beautiful daughter Sontje, Jana ' s future begins to look brighter. Then Master Reynst loses his fortune on a bad investment, and everything changes. The house is sold to creditors, leaving Jana back on the street and Sontje without a future. With no other choice, Jana and Sontje are forced to sign with the East India Company as Company Daughters: sailing to a colonial Dutch outpost to become the brides of male settlers they know nothing about. With fear in their hearts, the girls begin their journey – but what awaits them on the other side of the world is nothing like what they ' ve been promised... Some Ether is one of the more remarkable debut collections of poetry to appear in America in recent memory. As Mark Doty has

noted, "these poems are more than testimony; in lyrics of ringing clarity and strange precision, Flynn conjures a will to survive, the buoyant motion toward love which is sometimes all that saves us. Some Ether resonates in the imagination long after the final poem; this is a startling, moving debut."

This book captures information about early childhood education and care (ECEC) policies and practices in different countries and aims to question the degree to which these countries have managed to meet the needs of children, families, and the ECEC workforce. The book illustrates how different countries have adapted different strategies focusing on policy when it comes to quality ECEC. The goal

of the book is twofold. First and foremost, it aims to present key findings and challenges for improving ECEC as a whole. Second, it aims to highlight problems and concerns which the field of ECEC faces, with respect to delivering high-quality care and education to all children. As neither "ECEC" nor "quality" are universal concepts - but are shaped by social-cultural values, as well as national, economic, and political contexts in which ECEC services are provided - this cross-country volume is extremely relevant for fully understanding issues in the

field of ECEC. This book was originally published as a special issue of Early Child Development and Care.

Global Baby Girls Wentworth Press Novel Ideas provides a substantial introduction to the elements of fiction followed by in-depth interviews with successful novelists who speak with candor and insight into the complex process by which a novel is made. This edition includes new and updated interviews as well as writing exercises to enhance its use in the writing classroom.

Dorothy Allison recalls "deliciously self-indulgent" days of writing in her bathrobe, wrapped in misery and exultation; Peter Cameron explains how he made

This supplement to any standard DSP text is one of the first books to successfully integrate the use of MATLAB® in the study of DSP concepts. In this book, MATLAB® is used as a computing tool to explore traditional DSP topics, and

solve problems to gain insight. This greatly expands the range and complexity of problems that students can effectively study in the course. Since DSP applications are primarily algorithms implemented on a DSP processor or software, a fair amount of programming is required. Using interactive software such as MATLAB® makes it possible to place more emphasis on learning new and difficult concepts than on programming algorithms. Interesting practical examples are discussed and useful problems

are explored. This updated second edition includes new homework problems and revises the scripts in the book, available functions, and m-files to MATLAB® V7.
