This book presents an
interdisciplinary selection of
cutting-edge research on
RGB-D based computer
vision. Features: discusses
the calibration of color and
depth cameras, the
reduction of noise on depth
maps and methods for
capturing human
performance in 3D; reviews
a selection of applications
which use RGB-D
information to reconstruct
human figures, evaluate
energy consumption and

obtain accurate action classification; presents an approach for 3D object retrieval and for the reconstruction of gas flow from multiple Kinect cameras; describes an RGB-D computer vision system designed to assist the visually impaired and another for smart-environment sensing to assist elderly and disabled people; examines the effective features that characterize static hand poses and introduces a unified framework to enforce both temporal and spatial constraints for hand parsing; proposes a new classifier architecture for real-time hand pose recognition and a novel hand segmentation and gesture recognition system.

Photographers are always looking for perfect light. Unfortunately, the quality of available light, and the situations in which photos are created, are rarely perfect. This is especially true when photographing weddings or portraits on location. So while finding beautiful existing light is every photographer's ideal,

it isn't always possible. This is the point at which photographers tend to reach for a portable, on-camera flash. Indeed, these intense light sources can prove invaluable, but only if you know how to use them effectively. In the hands of an inexperienced photographer, on-camera flash will produce images that look flat and lifeless—images with harsh shadows, washed-out skin tones, cavernous black backgrounds, and other unappealing visual characteristics. In this book, acclaimed wedding and portrait photographer Neil van Niekerk shows you how to avoid the pitfalls photographers new to speedlights often encounter so that you can produce professional images using on-camera flash. You'll learn to use simple accessories to manipulate the quality of light from your flash and how to improve a lighting scenario by enhancing rather than overwhelming the existing

light. When the available light is too low and too uneven to be combined with flash, he shows you how to override it completely with flash and, with some thought and careful application of specialized techniques, still get results that look great. On-camera flash is one of the most challenging light sources to master, but with the techniques in this book you'll learn to use it with confidence. For wedding and environmental portrait photographers who must work in ever-changing lighting scenarios, this can mean better images and better sales.

The Brinkley Girls

This book, the first retrospective of Hayes' career ever published, features the best of his underground comics output alongside paintings, covers, and artifacts rarely seen by human eyes—as well as astounding, previously unprinted comics from his teenage years and movie

posters for his numerous homemade films. The Comics and Art of Rory Hayes also serves as a biography and critique with a memoir of growing up with Rory by his brother, the illustrator Geoffrey Hayes, and a career-spanning essay by Edward Pouncey. Also included is a rare interview with Hayes himself. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 13.9px Arial; color: #424242}

Computer Vision and Machine Learning with RGB-D Sensors

For over thirty years Nell Brinkley's beautiful girls pirouetted, waltzed, Charlestoned, vamped and shimmied their way through the pages of William Randolph Hearst's newspapers, captivating the American public with their innocent sexuality. This sumptuously designed oversized hardcover collects Brinkley's breathtakingly

spectacular, exquisitely colored full page art from 1913 to 1940. Here are her earliest silent movie serial-inspired adventure series, "Golden Eyes and Her Hero, Bill;" her almost too romantic series, "Betty and Billy and Their Love Through the Ages;" her snappy flapper comics from the 1920s; her 1937 pulp magazine-inspired "Heroines of Today." Included are photos of Nell, reproductions of her hitherto unpublished paintings, and an informative introduction by the book's editor, Trina Robbins. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 13.9px Arial; color: #424242}
