The Movements of the New Left is a documentary history of the movements for fundamental social change and radical democracy that disrupted the United States from their emergence in the 1950s through their dispersion and institutionalization in the early 1970s. Using an inclusive definition of the New Left, Gosse tracks the development and commonalities of the civil rights and black power movements and other struggles of people of color, of the peace, antiwar, and student movements, and of feminism and gay liberation. The introduction presents a solid overview of the history of these movements, combining chronological and thematic approaches against the backdrop of Cold War liberalism. Forty-five documents follow, each with an informative headnote providing context and explanatory footnotes that help students make sense of manifestoes, testimonies, speeches, newspaper advertisements, letters, and book excerpts from the tumultuous era referred to as “the Sixties.” A chronology of the New Left, questions for consideration, a selected bibliography, and an index provide further pedagogical support.

Master's Thesis from the year 2018 in the subject Economics - Foreign Trade Theory, Trade Policy, grade: Excellent, course: Development Economics, language: English, abstract: This study is conducted to investigate Ethiopian exports efficiency by using a stochastic frontier analysis model with panel data to estimate if countries operated at the frontier with its major trading partners. Export efficiency is defined as the ratio of actual exports to the maximum possible volume. In addition, the study investigates the factors of export efficiency, focusing on Ethiopia's exports to its major trading partners during the period 2006 to 2017. The arable land, gross domestic product and population of Ethiopia and of the trade partner's countries, distance between Ethiopia and trade partners' countries, gross capital formation, and

geographical location of trade partner's countries determines the export flows of Ethiopian export. As a result the estimated coefficient of determinants shows that population and gross domestic product have significantly and positively affect the Ethiopian export sector. The empirical results show that the volume of Ethiopian actual exports is far below the estimated efficient level, and that there is considerable room for increasing Ethiopia's exports. The trend of agricultural export efficiency shows some improvement over the stated years while manufacturing sector shows decreases. Those findings imply that Ethiopia should search the redemption policy that enables the country to maximize the efficiency of the sector by using all possible potential.

A comprehensive overview of integrated vehicle system dynamics exploring the fundamentals and new and emerging developments

This book provides a comprehensive coverage of vehicle system dynamics and control, particularly in the area of integrated vehicle dynamics control. The book consists of two parts, (1) development of individual vehicle system dynamic model and control methodology; and (2) development of integrated vehicle dynamic model and control methodology. The first part focuses on investigating vehicle system dynamics and control according to the three directions of vehicle motions, including longitudinal, vertical, and lateral. Corresponding individual control systems, e.g. Anti-lock Brake System (ABS), Active Suspension, Electric Power Steering System (EPS), are introduced and developed respectively. Particular attention is paid in the second part of the book to develop integrated vehicle dynamic control system.

Integrated vehicle dynamics control system is an advanced system that coordinates all the chassis control systems and components to improve the overall vehicle performance including safety, comfort, and economy. Integrated vehicle dynamics control has been an important research topic in the area of vehicle dynamics and control over the past two decades. The research topic on integrated vehicle dynamics control is investigated comprehensively and intensively in the book through both theoretical analysis and experimental study. In this part, two types of control architectures, i.e. centralized and multi-layer, have been developed and compared to demonstrate their advantages and disadvantages. Integrated vehicle dynamics control is a hot topic in automotive research; this is one of the few books to address both theory and practice of integrated systems Comprehensively explores the research area of integrated vehicle dynamics and

The Nehrus are a dynasty without precedent in the modern world; nowhere else and at no other time in recent history has a single family wielded such enduring and pervasive power over the country — and the electorate — they serve. From Jawaharlal Nehru to his daughter, Indira Gandhi, and from there, via Sanjay and Rajiv to — most recently — Sonia, this remarkable family have consistently established both the parameters and rhetoric of India ' s political development. In the eighties, Tariq Ali made several trips to India, meeting a wide range of political and public figures, including Mrs Gandhi, and leaders of both the Congress and Opposition parties. The Nehrus and the Gandhis, first published in 1985, was the result. Now updated to include the most recent chapters in India ' s political history, it remains as relevant as ever, offering an intricate and revealing portrait of power, seen through the continued rise — and eyes — of one family.

This multidisciplinary collection examines the connections between education, migration and translation across school and higher education sectors, and a broad range of socio-geographical contexts. Organised around the themes of knowledge, language, mobility, and practice, it brings together studies from around the world to offer a timely critique of existing practices that privilege some ways of knowing and communicating over others. With attention to issues of internationalisation, forced migration, minorities and indigenous education, this volume asks how the dominance of English in education might be challenged, how educational contexts that privilege bi- and multi-lingualism might be re-imagined, what we might learn from existing educational practices that privilege minority or indigenous languages, and how we might exercise ' linguistic hospitality ' in a world marked by high levels of forced migration and educational mobility. As such, it will appeal to scholars across the social sciences with interests in education, migration and intercultural communication.
