Dr. Westenholz offers an annotated edition of all the known legends of the Akkadian kings, with transliteration, translation, and commentary. Of particular interest to biblical scholars is the inclusion of “ The Birth Legend of Sargon, ” which is often compared to Moses in Exodus.

The Great Betrayal John Wiley & Sons

Akturk discusses how the definition of being German, Soviet, Russian and Turkish radically changed at the turn of the twenty-first century. Germany's ethnic citizenship law, the Soviet Union's inscription of ethnic origins in personal identification documents and Turkey's prohibition on the public use of minority languages, all implemented during the early twentieth century, underpinned the definition of nationhood in these countries. Despite many challenges from political and societal actors, these policies did not change for many decades, until around the turn of the twenty-first century, when Russia removed ethnicity from the internal passport, Germany changed its citizenship law and Turkish public television began broadcasting in

minority languages. Using a new typology of 'regimes of ethnicity' and a close study of primary documents and numerous interviews, Sener Akturk argues that the coincidence of three key factors – counterelites, new discourses and hegemonic majorities – explains successful change in state policies toward ethnicity.

Legends of the Kings of

Akkade Peeters

How we walk, where we walk, why we walk tells the world who and what we are. Whether it's once a day to the car, or for long weekend hikes, or as competition, or as art, walking is a profoundly universal aspect of what makes us humans, social creatures, and engaged with the world. Cultural commentator, Whitbread Prize winner, and author of *Sex Collectors* Geoff Nicholson offers his fascinating, definitive, and

personal ruminations on the literature, science, philosophy, art, and history of walking. Nicholson finds people who walk only at night, or naked, or in the shape of a cross or a circle, or for thousands of miles at a time, in costume, for causes, or for no reason whatsoever. He examines the history and traditions of walking and its role as inspiration to artists, musicians, and writers like Bob Dylan, Charles Dickens, and Buster Keaton. In *The Lost Art of Walking*, he brings curiosity, imagination, and genuine insight to a subject that often strides, shuffles, struts, or lopes right by us.

Stressing the public dimension of worship (the ceremony and symbolism), rather than the texts used (which may not always have been understood by the laity), 14 studies study religious works for an interpretation of their use in cult and devotion. Mathews (fine arts, NYU) considers the processional movements in the early Roman ritual, the parallelism between palace church planning and court liturgy, domestication of the church building in company with a privatization of liturgy, manuscript illumination, fresco decoration, and the symbolism in the decorative program of the Byzantine church. This book examines the
development of identity politics
amongst the Alevis in Europe
and Turkey, which
simultaneously provided the
movement access to different
resources and challenged its
unity of action. While some
argue that Aleviness is a
religious phenomenon, and
others claim it is a cultural or a
political trend, this book
analyzes the various strategies
of claim-making and
reconstructions of Aleviness as
well as responses to the
movement by various Turkish
and German actors. Drawing on
intensive fieldwork, Elise
Massicard suggests that
because of activists' many
different definitions of
Aleviness, the movement is in
this sense an "identity
movement without an identity."

Madly, Deadly "A fast-paced thriller."—Kirkus Reviews "What a ride! Full of twists and turns — including an ending you won't see coming!"—April Henry, New York Times bestselling author of *The Girl Who Was Supposed to Die* [The Byzantine Patriarchate, 451-1204](#) Variorum Publishing U.S. involvement in the Middle East has brought the region into the media spotlight and made it a hot topic in American college classrooms. At the same time, anthropology—a discipline committed to on-the-ground research about everyday lives and social worlds—has increasingly been criticized as "useless" or "biased" by right-wing forces. What happens when the two concerns meet, when such accusations target the researchers and research of a region so central to U.S. military interests? This book is the first academic study to shed critical light on the political and economic pressures that shape how U.S. scholars research and teach about the Middle East. Lara Deeb and Jessica Winegar show how Middle East politics and U.S. gender and race hierarchies affect scholars across their

careers—from the first decisions to conduct research in the tumultuous region, to ongoing politicized pressures from colleagues, students, and outside groups, to hurdles in sharing expertise with the public. They detail how academia, even within anthropology, an assumed "liberal" discipline, is infused with sexism, racism, Islamophobia, and Zionist obstruction of any criticism of the Israeli state.

Anthropology's Politics offers a complex portrait of how academic politics ultimately hinders the education of U.S. students and potentially limits the public's access to critical knowledge about the Middle East.

Bioethics in a Changing World is an introductory textbook for individuals who are new to the study of bioethics. This interdisciplinary field, which encompasses philosophy, religion, sociology, gerontology, psychiatry, biomedical science, law, and nursing (to name a few), has been rapidly growing and developing over the last half-century. In order to get a handle on what "doing" bioethics entails, it is helpful to start with the basic philosophical foundations of bioethical theory and then consider a variety of trenchant issues that arise from the practice of medicine and the provision of

health care services within an age of technology. In constructing this textbook, the central aim has been to guide readers in developing a clear sense of how theory and practice are linked in the dynamic field of bioethics. Though new problems and issues in bioethics are constantly arising, it is important to focus on the persistence of foundational questions that apply to new contexts.

Teaching Social Studies in Early Education

HarperCollins Australia

'A memorable, oddly beautiful book' Wall Street Journal 'A marvellous glimpse of the Japan that rarely peeks through the country's public image' Washington Post One sunny spring morning in the 1970s, an unlikely Englishman set out on a pilgrimage that would take him across the entire length of Japan. Travelling only along small back roads, Alan Booth travelled on foot from Soya, the country's northernmost tip, to Sata in the extreme south, traversing three islands and some 2,000

miles of rural Japan. His mission: 'to come to grips with the business of living here,' after having spent most of his adult life in Tokyo.

The Roads to Sata is a wry, witty, inimitable account of that prodigious trek, vividly revealing the reality of life in off-the-tourist-track Japan.

Journeying alongside Booth, we encounter the wide variety of people who inhabit the Japanese countryside - from fishermen and soldiers, to bar hostesses and school teachers, to hermits, drunks and the homeless. We glimpse vast stretches of coastline and rambling townscapes, mountains and motorways; watch baseball games and sunrises; sample trout and Kilimanjaro beer, hear folklore, poems and smutty jokes. Throughout, we enjoy the wit and insight of a uniquely perceptive guide, and more importantly, discover a new face of an often-misunderstood nation.
