Germany 's economic miracle is a widely-known phenomenon, and the world-leading, innovative products and services associated

with German companies are something that others seek to imitate. In *The 'Made in Germany' Champion Brands*, Ugesh A. Joseph provides an extensively researched, insightful look at over 200 of Germany 's best brands to see what they stand for, what has made them what they are today, and what might be transferable. The way Germany is branded as a nation carries across into the branding of its companies and services, particularly the global superstar brands - truly world-class in size, performance and reputation. Just as important are the medium-sized and small enterprises, known as the 'Mittelstand'. These innovative and successful enterprises from a wide range of industries and product / service categories are amongst the World market leaders in their own niche and play a huge part in making Germany what it is today. The book also focuses on German industrial entrepreneurship and a selection of innovative and emergent stars. All these companies are supported and encouraged by a sophisticated infrastructure of facilitators, influencers and enhancers - the research, industry, trade and standards organizations,

the fairs and exhibitions and all the social and cultural factors that influence, enhance and add positive value to the country's image. Professionals or academics interested in business; entrepreneurship; branding and marketing; product or service development; international trade and business development policy, will find fascinating insights in this book; while those with an interest in Germany from emerging industrial economies will learn something of the secrets of German success.

The Wiley Encyclopedia of Packaging

Technology Packaging technology is of vital importance in all manufacturing industries. The Wiley Encyclopedia of Packaging Technology is designed to provide a comprehensive reference

incorporating 188 topics from "Acrylics" to "Zero-Crush Concept" for a wide audience of engineers, technologists, and scientists who seek an introduction to

unfamiliar aspects of the packaging process. In addition to providing an exhaustive reference for packaging engineers, the book is also designed to serve, for example, polymer chemists developing new products. It will also meet a need in all technical libraries for an authoritative basic reference on packaging. The 188 entries have been written by 225 acknowledged experts in academia and industry, and each has been reviewed by other experts in the field for completeness and objectivity. This encyclopedia provides coverage of all stages of the packaging process from raw materials through distribution. Multiple articles are included on all major topics, such as bags, boxes, cans, cartons, coextrusion machinery, decorating, filling machinery, films, plastics, steel, and testing. A significant contribution to packaging literature, this encyclopedia brings together in a single volume expertise from many disciplines. It contains many landmark articles, such as blow molding, corrugated boxes, fabricated cans, steel

cans, economics of packaging, glass container design, glass container manufacturing, indicating devices, multilayer flexible packaging, paper, specifications and quality assurance, and international standards and practices. Numerous bibliographies accompany the articles. In addition, the encyclopedia includes over 200 tables and nearly 600 figures—all prepared with the cooperation of a distinguished Advisory Board. The result is a unique, informative work that will serve the diverse interests and concerns of those in the field of packaging with authoritative, reliable, state-of-the-art information of the subject.
