‘ Sheffield Mountain Ode ’ for Galway Kinnell is one of the most stunning pieces here – Olds shapes her world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader.

dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been almost exclusively referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L. Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

The ketogenic diet is a natural, non toxic, science based cancer diet which can be used for cancer prevention and treatment. It works because cancer cells are dependent upon a

constant supply of blood sugar (glucose) to stay alive. Normal cells can use ketones as an alternative fuel, cancer cells can't. A ketogenic diet lowers blood glucose while increasing ketone levels, a metabolic state which effectively starves cancer cells while nourishing normal cells. This essential, well referenced book is based on cutting edge research on ketogenic dietary therapies from Dr. Dominic D'Agostino at the University of South Florida and Dr. Thomas Seyfried at Boston College, with their generous permission. The book offers the latest information on:* How and why a low carb, high fat ketogenic diet works to stop cancer cells, how to

implement the diet and how to monitor your progress* Blood glucose and ketone level targets recommended to destroy cancer*What foods to choose and how much to eat *Why certain foods must be restricted*Use of calorie restriction and fasting*Whether alcohol is allowed *The debate between acidity vs alkalinity*Appropriate supplementation and much more.

winner of the Nebula, Hugo, Edgar, Bram Stoker, and many other awards. Originally published in 1962 and updated in later decades with a new introduction, *Wonderland* contains sixteen masterful stories from the author's early career. This collection shows a vibrant young writer with a wide ranging imagination, ferocious creative energy, devastating wit, and an eye for the wonderful and terrifying and tragic. Among the gems are " All the Sounds of Fear, " " The Sky Is Burning, " " The Very Last Day of a Good Woman, " and " In Lonely Lands. " Though they stand tall on their own merits, they also point the way to the sublime stories that followed soon after and continue to come even now, more than fifty years later.
