Lyra Belacqua and her animal daemon live half-wild and carefree among scholars of Jordan College, Oxford. The destiny that awaits her will take her to the frozen lands of the Arctic, where witch-clans reign and ice-bears fight. Her extraordinary journey will have immeasurable consequences far beyond her own world...

[Effective Teaching and Learning for Pupils in Low Attaining Groups](#) UCL Press

Bond No Nonsense English provides clear, straightforward teaching to help boost confidence and ability in English.

A Life Story: Alan Turing Bloomsbury Publishing

Why are girls outperforming boys in literacy skills in the Western education system today? To date, there have been few attempts to answer this question. Literacy and Gender sets out to redress this state of affairs by re-examining the social organization of literacy in primary schools. In studying schooling as a social process, this book focuses on the links between literacy, gender and attainment, the role school plays in producing social difference and the changing pattern of interest in this topic both within the feminist community and beyond. Gemma Moss argues that the reason for girls' relative success in literacy lies in the structure of schooling and in particular the role the reading curriculum plays in constructing a hierarchy of learners in class. Using fine-grained ethnographic analysis of reading in context, this book outlines methods for researching literacy as a social practice and understanding how different versions of what counts as literacy can be created in the same site.

A Study of the Transition from the Foundation Stage to Key Stage 1 Routledge

Presents a collection of questions that help students improve reading comprehension skills for national and state tests.

Creative Teaching: English in the Early Years and Primary Classroom

Scholastic Teaching Resources

Reading for pleasure urgently requires a higher profile to raise attainment and increase children's engagement as self-motivated and socially interactive readers. Building Communities of Engaged Readers highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities. Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the literacy field and illustrated throughout with examples from the project schools, it is essential reading for all those concerned with improving young people's enjoyment of and attainment in reading.

The debate over whether class size matters for teaching and learning is one of the most enduring, and aggressive, in education research. Teachers often insist that small classes benefit their work. But many experts argue that evidence from research shows class size has little impact on pupil outcomes, so does not matter, and this dominant view has informed policymaking internationally. Here, the lead researchers on the world's biggest study into class size effects present a counter-argument. Through detailed analysis of the complex relations involved in the classroom they reveal the mechanisms that support teachers' experience, and conclude that class size matters very much indeed. Drawing on 20 years of systematic classroom observations,

surveys of practitioners, detailed case studies and extensive reviews of research, Peter Blatchford and Anthony Russell contend that common ways of researching the impact of class size are limited and sometimes misguided. While class size may have no direct effect on pupil outcomes, it has, they say, significant force through interconnections with classroom processes. In describing these connections, the book opens up the everyday world of the classroom and shows that the influence of class size is everywhere. It impacts on teaching, grouping practices and classroom management, the quality of peer relations, tasks given to pupils, and on the time teachers have for marking, assessments and understanding the strengths and challenges for individual pupils. From their analysis, the authors develop a new social pedagogical model of how class size influences work, and identify policy conclusions and implications for teachers and schools.

In 1999, Andrew Smith was interviewing Charlie Duke, astronaut and moon walker, for the Sunday Times. During the course of the interview, which took place at Duke's Texan home, the telephone rang and Charlie left the room to answer it. When he returned, some twenty minutes later, he seemed visibly upset. It seemed that he'd just heard that, the previous day, one of his fellow moon walkers, the astronaut Pete Conrad, had died. The more Charlie spoke the more Andrew realised that his grief was something more than the mere fact of losing a friend. 'Now there's only nine of us,' he said. Only nine. Which meant that, one day not long from now, there would be none, and when that day came, no one on earth would have known the giddy thrill of gazing back at us from the surface of the moon. The thought shocked Andrew, and still does. *Moon dust* is his attempt to understand why. The Apollo moon programme has been called the last optimistic act of the 20th Century. Over a strange three year period between 1969 and 1972, twelve men made the longest and most eccentric of all journeys, and all were indelibly marked by it. In *Moon dust* Andrew sets out to interview all the remaining astronauts who walked on the moon, and to find out how their lives were changed for ever by what had happened. 'Where do you go after you've been to the moon?' In addition to this question that would prove hugely troubling to many of the returned astronauts, they also had to deal with the fantasies of faceless millions at their backs, for this was the first truly global media event. The walkers would forever be caught between the gravitational pull of the moon and the earth's collective dreaming.
