Three Pant-tastic Novels in One (Candlewick Press (MA)

"This splendid work of scholarship . . . sums up with economy and power all that the written record so far deciphered has to tell about the ancient and complementary civilizations of Babylon and Assyria."—Edward B. Garside, New York Times Book Review Ancient Mesopotamia—the

area now called Iraq—has received less attention than ancient Egypt and other long-extinct and more spectacular civilizations. But numerous small clay tablets buried in the desert soil for thousands of years make it possible for us to know more about the people of ancient Mesopotamia than any other land in the early Near East. Professor Oppenheim, who studied these tablets for more than thirty years, used his intimate knowledge of long-dead languages to put together a distinctively personal picture of the Mesopotamians of

some three thousand years ago. Following Oppenheim's death, Erica Reiner used the author's outline to complete the revisions he had begun. "To any serious student of Mesopotamian civilization, this is one of the most valuable books ever written."—Leonard Cottrell, Book Week "Leo Oppenheim has made a bold, brave, pioneering attempt to present a synthesis of the vast mass of philological and archaeological data that have accumulated over the past hundred years in the field of Assyriological research."—Samuel

as well as correct ones. Problems are staged, so there is an element of suspense for the individual...and racing between students to solve the mystery. The topics covered in this book are all appropriate for ages 11-13. The tasks have been used successfully with older pupils too as a reminder of topics covered previously.

They would also be suitable for younger pupils who have met the appropriate language and content. They are likely to take about 40 minutes but this will depend on the ability of the class to coordinate the different aspects of each task. For ages 13-15 see the sister titles *More Mini Mathematical Murder Mysteries*. The book is aimed at both teachers and

parents.

Prepare with confidence for the end

of year SATs tests with Scholastic National Curriculum Tests. Scholastic's practice tests are fully in line with the Year 2 and Year 6 SATs Tests. Each book contains two complete practice tests and a guidance and mark scheme. These practice tests have a similar look to the real test, to help familiarise children with both the content and

format of these tests. The guidance and mark scheme provides advice for parents and carers on how to use the tests and how to support children in preparing for them.
