The astonishing story of James Hardy Vaux, writer of Australia's first dictionary and first true-crime memoir If you wear 'togs', tell a 'yarn', call someone 'sly', or refuse to 'snitch' on a friend then you are talking like a convict. These words, and hundreds of others, once left colonial magistrates baffled and police confused. So comprehensible to us today, the flash language of criminals and convicts had marine officer Watkin Tench complaining about the need for an interpreter in the colonial court. Luckily, by 1811, that man was at hand. James Hardy Vaux - conman, pickpocket, absconder and thief, born into comfortable circumstances in England - was so drawn to a life of crime he was transported to Australia ... not once, but three times! Vaux's talents, glibness and audacity were extraordinary, and perceiving an opportunity to ingratiate himself with authorities during his second sentence, he set about writing a dictionary of the criminal slang of the colony, which was recognised for its uniqueness and taken back to England to be published. Kel Richards tells Vaux's story brilliantly, with the help of Vaux's own extraordinarily candid memoir of misdeeds - one of the first true-crime memoirs ever published. Kel's book combines two of his favourite subjects: the inventiveness, humour and origins of Australian English, and our history of fabulous, disreputable characters. With echoes of The Surgeon of Crowthorne as well as Oliver Twist, Flash Jim is a ripping read - especially for those who appreciate the power of words and the convict contribution to our idiom. PRAISE 'James Hardy Vaux was a con-man with a talent for words who wrote the first dictionary of Australian English. Kel Richards is a word-man with a talent for telling a stirring story about the con-man. In Flash Jim Kel Richards brings James Hardy Vaux to life as we haven't seen him before' - Emeritus Professor Roland Sussex, School of Languages and Comparative Cultural Studies, University of Queensland 'An engaging tale from a great student of our language about one of the conmen who gave Australia its character - and its distinctive slang' - Andrew Bolt, broadcaster and columnist 'One of the strongest bonds binding the people of Australia together is the Australian language. We speak a dialect of English richer and more colourful than most. When we call someone a "hoon" or invite a friend to a "barbie" we know immediately what we're talking about - but we have to translate for overseas visitors. This powerful cultural bond was, as Kel explains, built on four foundations. And the most colourful of those four was convict slang. The role that it played, and still plays, in the Australian language, and the story of the man who first recorded it is - as we used to say - a "ripping yarn". It makes a page-turning story' - Alan Jones, broadcaster and columnist 'There's never been a more important time to truly understand our Australian history and this book is a great introduction to the richness of our language and a wonderful window onto the real life of colonial Australia from my favourite wordsmith, Kel Richards' - Peta Credlin, broadcaster and columnist

A Kiss Before Dying not only debuted the talent of best-selling novelist Ira Levin to rave reviews, it also set a new standard in the art of mystery and suspense. Now a modern classic, as gripping in its tautly plotted action as it is penetrating in its exploration of a criminal mind, it tells the shocking tale of a young man who will stop at nothing—not even murder—to get where he wants to go. For he has dreams; plans. He also has charm, good looks, sex appeal, intelligence. And he has a problem. Her name is Dorothy; she loves him, and she's pregnant. The solution may demand desperate measures. But, then, he looks like the kind of guy who could

get away with murder. Compellingly, step by determined step, the novel follows this young man in his execution of one plan he had neither dreamed nor foreseen. Nor does he foresee how inexorably he will be enmeshed in the consequences of his own extreme deed.

The beneficial impact of the European communities involvement in scientific research and technology is wide-ranging and pervasive. There are high hopes of major advances in scientific knowledge and technological processes, while the emergence of a genuine tradition of collaborative research holds out great and continuing promise for the future. Close, frequent and long-term cooperation between universities, research centres and industry is already generating new synergies, forging a truly European scientific community. Many of tomorrows industrial developments, destined to be determinant for our economic success and prosperity, will spring from this research. The Concerted European Action on Magnets - CEAM - project is a prime example of collaborative research and development. Financed from the Communities STIMULATION action and implemented with the help of EURAM, the advanced materials programme, CEAM will bestow great benefits on European industrial competitiveness, providing a channel for high quality basic research to find its way into commercial products. This remarkable cooperative enterprise brought t~gether 58 laboratories and more than 120 scientists and engneers in a sustained thirty month effort. It spanned every aspect of new iron-based high performance magnets from theoretical modelling of their intrinsic magnetic properties to the design and construction of novel electrical devices and machines. Besides adding a new European dimension to advanced magnetic technology, CEAM also ensured that a whole new generation of young researchers and technicians have been trained in applied magnetism.
