In July 2010, the National Research Council (NRC) appointed the Committee to Review the 21st Century Truck Partnership, Phase 2, to conduct an

independent review of the 21st Century Truck Partnership (21CTP). The 21CTP is a cooperative research and development (R&D) partnership including four federal agencies—the U.S. Department of Energy (DOE), U.S. Department of Transportation (DOT), U.S. Department of Defense (DOD), and the U.S. Environmental Protection Agency (EPA)—and 15 industrial partners. The purpose of this Partnership is to reduce fuel consumption and

emissions, increase heavy-duty vehicle safety, and support research, development, and demonstration to initiate commercially viable products and systems. This is the NRC's second report on the topic and it includes the committee's review of the Partnership as a whole, its major areas of focus, 21CTP's management and priority setting, efficient operations, and the new SuperTruck program.

By the end of the  
twentieth century  
there were some half-  
million tractors on  
British farms - more  
machines than people  
to drive them. Brian  
Bell's encyclopaedic  
book traces the  
evolution of the farm  
tractor from the days

of starting handle and  
pan seat to current  
4-wheel drive machines  
with air-conditioned  
cabs and computer  
management systems. He  
deals in particular  
with developments of  
the classic period from  
the 1950s to the 1990s.  
The book is arranged  
alphabetically by  
manufacturer from Allis-  
Chalmers to Zetor, one  
hundred marques in  
total. These are all  
machines to be found on  
British farms  
irrespective of their  
country of manufacture.  
Brian runs concisely

through the histories  
of the companies and  
their major models,  
illustrated with a  
wealth of photographs  
and extracts from sales  
literature. He adds  
some special features  
on items such as  
hydraulic systems and  
cold-starting aids. He  
includes a glossary and  
full index. This book  
replaces the author's  
earlier, successful,  
Fifty Years of Farm  
Tractors. Many of the  
photographs are new and  
the text has been  
brought up to date to  
include developments of

the early twenty-first century.
