This book on optimization includes forewords
by Michael I. Jordan, Zongben Xu and Zhi-
Quan Luo. Machine learning relies heavily on
optimization to solve problems with its
learning models, and first-order

optimization algorithms are the mainstream
approaches. The acceleration of first-order
optimization algorithms is crucial for the
efficiency of machine learning. Written by
leading experts in the field, this book
provides a comprehensive introduction to,
and state-of-the-art review of accelerated
first-order optimization algorithms for
machine learning. It discusses a variety of
methods, including deterministic and
stochastic algorithms, where the algorithms

can be synchronous or asynchronous, for unconstrained and constrained problems, which can be convex or non-convex. Offering a rich blend of ideas, theories and proofs, the book is up-to-date and self-contained. A passage from the book... It is no common thing to find an artist who, even if he be willing to try, is capable of expressing his aims and ideals with any clearness and moderation. Some people will say that any such capacity is a flaw in the perfect artist, who should find his expression in line and colour, and leave the multitude to grope its way unaided towards comprehension. This attitude is a relic of the days when "l'art pour l'art" was the latest battle cry; when eccentricity of manner and irregularity of life were more important than any talent to the would-be artist; when every one except oneself was bourgeois. The last few years have in some measure removed this absurdity, by destroying the old convention that it was middle-class to be

sane, and that between the artist and the outer-world yawned a gulf which few could cross. Modern artists are beginning to realize their social duties. They are the spiritual teachers of the world, and for their teaching to have weight, it must be comprehensible. Any attempt, therefore, to bring artist and public into sympathy, to enable the latter to understand the ideals of the former, should be thoroughly welcome; and such an attempt is this book of Kandinsky's.

Are you the innovative type, the cook who marches to a different drummer -- used to expressing your creativity instead of just following recipes? Are you interested in the science behind what happens to food while it's cooking? Do you want to learn what makes a recipe work so you can improvise and create your own unique dish? More than just a cookbook, *Cooking for Geeks* applies your curiosity to discovery, inspiration, and invention in the kitchen. Why is medium-rare steak so popular? Why do we bake some things at 350° F/175° C and others at 375° F/190° C? And how quickly does a pizza cook if we overclock an oven to 1,000° F/540° C? Author and cooking geek Jeff Potter provides the answers and offers a unique take on recipes -- from the sweet (a "mean" chocolate chip cookie) to the savory (duck confit sugo). This book is an excellent and intriguing resource for anyone who wants to experiment with cooking, even if you don't consider yourself a geek. Initialize your kitchen and calibrate your tools. Learn about the important reactions in cooking, such as protein denaturation, Maillard reactions, and caramelization, and how they impact the foods we cook. Play with your food using hydrocolloids and sous vide cooking. Gain firsthand insights from interviews with researchers, food scientists, knife experts, chefs, writers, and more, including author Harold McGee, TV personality Adam Savage, chemist Hervé This, and xkcd. "My own session with the book made me feel a lot more confident in my cooking." --Monica Racic, *The New Yorker* "I LOVE this book. It's inspiring, invigorating, and damned fun to spend time inside the mind of 'big picture' cooking. I'm Hungry!" --Adam Savage, co-host of Discovery Channel's *MythBusters* "In his enchanting, funny, and informative book, *Cooking for Geeks* (O'Reilly), Jeff Potter tells us why things work in the kitchen and why

they don't." -- Barbara Hanson, New York Daily News

Throughout human history, wars and violence have often been waged in the name of religions and in the name of diverging religious beliefs and belonging. Ironically, though, all religions in their teachings speak of nonviolence and have in common the promotion of peace and justice, namely the respect of human life and dignity, the institution of human rights, the protection of the poor and vulnerable, the freeing of the oppressed, the active elimination of injustice? It seems therefore, that violence and wars would be antithetical to religions; yet they are so frequently used as their justification. Are we then speaking of different "religions"? "Institutional religions," the ones structured by humans and that are brandished to lead violence and wars, become in fact quite foreign to the essence of the religions as they were established by their founders and that they intend to represent; they actually contribute to their destruction. Wanting to reflect on that point, I embarked, a few years ago, on giving voice to local religious individuals, whom I called "Religious Peacemakers," and who, each by living the essential teachings of their particular faith, contributed by their actions to peace and justice. I wanted to prove that their path, irrespective of their original religion, would be similar, and that their diverse faith, instead of separating them, would on the contrary end up uniting them.

This book explores how Chinese films constructed an image of China in the 1980s through analyzing the characters, composition of space, and conflict patterns of the films. It also examines the relationship between the representations in Chinese cinema and the realities of Chinese society. The study analyzes the imagery, metaphors, and cultural values

of Chinese films in the 1980s to discover the common creative focus of Chinese film directors at the time. It also examines the specific creative elements and cultural significance of Chinese cinema in the 1980s. This book is neither a "period history" of Chinese cinema in the 80s, nor a thematic study of the "fifth generation". Rather, it is an analysis of films as narrative texts that reflected on history. It uses the perspectives revealed by characters, narrative patterns, and conflicts in films of the 1980s to examine how the era was perceived at that time as well as how China's national future and individuals' personal futures were being conceptualized. This title will be a valuable resource for scholars and students of Chinese Studies, Contemporary China Studies, Film Studies, and those who are interested in Chinese culture and society in general.

1903. Thomas Nelson Page, author of short stories, novels, essays, and poetry, is best known for his role as literary spokesman for the glories of the Old South. Gordon Keith begins: Gordon Keith was the son of a gentleman. And this fact, like the cat the honest miller left to his youngest son, was his only patrimony. As in that case also, it stood to the possessor in the place of a good many other things. It helped him over many rough places. He carried it with him as a devoted Romanist wears a sacred scapular next to the heart. See other titles by this author available from Kessinger Publishing.
