Provides information on ways to use InfoPath and SharePoint to build business forms, covering such topics as Forms Services, data retrieval and submission, customization, publishing, coding, and workflow.
Psychopathology "O'Reilly

Media, Inc."
Fueled by media reports of gender bias in the schools, the debate over single sex education has been recently renewed. "Voices of Hope" asks for a reconsideration of the framing of that debate. For whom is single sex education better? For the attainment of which goals? What do girls gain by being schooled with male peers? What is lost? In this longitudinal study of more than fifty high school girls at four New England independent schools, Carole B. Shmurak follows their development from ninth grade

through the first year of college. Case studies capture the girls' own voices as they describe their hopes for their futures and the events that subsequently affect those futures.

More than twenty years have
passed since Walter

Auffenberg's monumental Behavioral Ecology of the Komodo Monitor. In the intervening years the populations of Komodo dragons—native only to a handful of islands in southeast Indonesia—have dwindled, sparking intensive conservation efforts. During the last two decades new information about these formidable predators has emerged, and the most important findings are clearly presented here. A memoir from Walter Auffenberg and his son Kurt is followed by the

The latest information on Komodo dragon biology, ecology, population distribution, and behavior. The second part of the book is dedicated to step-by-step management and conservation techniques, both for wild and captive dragons. This successful model is a useful template for the conservation of other endangered species as well, for, as Kurt and Walter Auffenberg note, “The species may well indeed survive in the wild for generations to come while countless other organisms are

lost. ”

It ’ s the Queen ’ s birthday, and the children must work together to create the most amazing machine — a machine that can create 100 apple crumbles by the afternoon tea party. With growing concerns around mental health, and in the wake of a period of uncertainty and change, it is more important than ever to pay attention to how young children express their emotions, and to teach them to articulate their

thoughts in a healthy way. This beautifully illustrated picture book helps children understand the ‘ journey ’ in thinking, exploring the ways in which collaborating, experimenting and changing ideas can open new possibilities. By learning to reframe their memories, children learn that change and transition don ’ t have to be bad things. When it comes to child and adolescent mental health issues, prevention and early intervention are key. The ‘ serve and return ’ format of this book provides a virtual

space where children can explore thoughts and feelings, teaching them to be resilient in the face of change.

This volume is a collection of cutting-edge research papers written by well-known researchers in the field of Romance phonetics and phonology. An important goal of this book is to bridge the gap between traditional Romance linguistics with its long and rich tradition in data collection, cross-

language comparison, and phonetic variation and laboratory phonology work. The book is organized around three main themes: segmental processes, prosody, and the acquisition of segments and prosody. The various articles provide new empirical data on production, perception, sound change, first and second language learning, rhythm and intonation, presenting a state-of-the-art overview of research in laboratory phonology centred on Romance languages. The Romance data are used to test the predictions

of a number of theoretical frameworks such as gestural phonology, exemplar models, generative phonology and optimality theory. The book will constitute a useful companion volume for phoneticians, phonologists and researchers investigating sound structure in Romance languages, and will serve to generate further interest in laboratory phonology. Inpatient units treat some of the most clinically challenging psychiatric patients. Clinicians must carefully balance patients' rights with safety concerns of

violence and suicide. This updated manual is compact and practical, addressing the common questions and issues clinicians face in day-to-day practice. Chapters are organised around the diagnoses found on inpatient psychiatric units, allowing readers to find their area of interest quickly. A user-friendly question and answer format anticipates commonly asked questions, and tables provide easily accessible information, including diagnostic criteria and medication effects. Incorporating advances in the field over the past decade,

chapters review new treatments including ketamine use and chronotherapy, as well as the most recent evidence-based approaches for patients with borderline personality disorder. Drawing on the authors' wealth of experience, their recommendations for best practice and their treatment philosophies will be valuable for all healthcare professionals working in mental health. Komodo Dragons Addison-Wesley Professional A hands-on guide to making valuable decisions from data using advanced data mining methods and techniques This second installment in the Making Sense of

Data series continues to explore a diverse range of commonly used approaches to making and communicating decisions from data. Delving into more technical topics, this book equips readers with advanced data mining methods that are needed to successfully translate raw data into smart decisions across various fields of research including business, engineering, finance, and the social sciences. Following a comprehensive introduction that details how to define a problem, perform an analysis, and deploy the results, Making Sense of Data II addresses the following key techniques for advanced data analysis: Data Visualization reviews principles and methods for

understanding and communicating data through the use of visualization including single variables, the relationship between two or more variables, groupings in data, and dynamic approaches to interacting with data through graphical user interfaces. Clustering outlines common approaches to clustering data sets and provides detailed explanations of methods for determining the distance between observations and procedures for clustering observations. Agglomerative hierarchical clustering, partitioned-based clustering, and fuzzy clustering are also discussed. Predictive Analytics presents a discussion on how to build and assess models, along with a series of predictive analytics that

can be used in a variety of situations including principal component analysis, multiple linear regression, discriminate analysis, logistic regression, and Naïve Bayes. Applications demonstrates the current uses of data mining across a wide range of industries and features case studies that illustrate the related applications in real-world scenarios. Each method is discussed within the context of a data mining process including defining the problem and deploying the results, and readers are provided with guidance on when and how each method should be used. The related Web site for the series (www.makingsenseofdata.com) provides a hands-on data analysis and data mining experience.

Readers wishing to gain more practical experience will benefit from the tutorial section of the book in conjunction with the Traceis™ software, which is freely available online. With its comprehensive collection of advanced data mining methods coupled with tutorials for applications in a range of fields, Making Sense of Data II is an indispensable book for courses on data analysis and data mining at the upper-undergraduate and graduate levels. It also serves as a valuable reference for researchers and professionals who are interested in learning how to accomplish effective decision making from data and understanding if data analysis and data mining methods could

help their organization.

More than 150 spinal radiology cases deliver the best board review possible Part of McGraw-Hill Education's Radiology Case Review Series, this unique resource challenges you to look at a group of images, determine the diagnosis, answer related questions, and gauge your knowledge by reviewing the answer. It all adds up to the best case-based review of spinal imaging available--one that's ideal for certification or recertification, or as an incomparable clinical refresher. Distinguished by a

cohesive 2-page design, each volume in this series is filled with cases, annotated images, questions & answers, pearls, and relevant literature references that will efficiently prepare you for virtually any exam topic. The more than 150 cases cover clinically relevant disorders such as neck and back pain, leg numbness, fibrous dysplasia, Sprengel's deformity, neck mass, spina bifida, and lumbar fusion. Radiology Case Review Series Features More than 150 cases for each volume, which consist of: Precise, state-of-the-art

images accompanied by questions and answers, descriptions of the entities, insightful clinical pearls, and reference lists Intensive coverage of fundamental radiology principles, the latest diagnostic imaging techniques, radiology equipment, new technologies, and more Unique 2-page design for each case, which features: Images with 5 questions on the right-hand page Magnifications, annotations, and detailed answers on the verso page--a benefit that you'll only find in this exceptional series!

Informative, bulleted comments box that provides important additional context for each case Cases organized and coded by difficulty level allowing you to evaluate your proficiency before progressing to the next level. If you're looking for the most complete, well-organized, and efficient case-based review of radiology available--designed to help you ace the boards and optimize patient outcomes--the Radiology Case Review Series belongs on your reference shelf. Although psychoanalytic theory is one of the most potent and influential tools in contemporary literary criticism, to date it has had very little impact on the study of African American literature. Critical methods from the disciplines of history, sociology, and cultural

studies have dominated work in the field. Now, in this exciting new book by the author of *Domestic Allegories: The Black Heroine's Text at the Turn of the Century*, Claudia Tate demonstrates that psychoanalytic paradigms can produce rich and compelling readings of African American textuality. With clear and accessible summaries of key concepts in Freud, Lacan, and Klein, as well as deft reference to the work of contemporary psychoanalytic critics of literature, Tate explores African-American desire, alienation, and subjectivity in neglected novels by Emma Kelley, W.E.B. Du

Bois, Richard Wright, Zora Neale Hurston, and Nella Larsen. Her pioneering approach highlights African American textual realms within and beyond those inscribing racial oppression and modes of black resistance. A superb introduction to psychoanalytic theory and its applications for African American literature and culture, this book creates a sophisticated critical model of black subjectivity and desire for use in the study of African American texts.

A House to Remember

Public Safety Volume 11 Shuttle Bus Safety Bible is written by

Francis E. McIntire; Air Force Academy graduate, fighter pilot, Red Flag and top gun, and assistant professor in the Department of Behavioral Science and Leadership. Master of Science from Vanderbilt University. Sunday School teacher at Royal Air Force Upper Heyford United Kingdom, Mountain Home Air Force Base Idaho, Montgomery Alabama, and the U.S. Air Force Academy. Additional copies are available on Amazon.com by searching "Francis E McIntire" and "Safety Bible". Bulk copies for state and local agencies, and municipalities; churches, civic groups, high schools, prep schools, and guidance counselors available from Frank McIntire, frank@golzup.com (719) 651-7746.

Francis E. McIntire (SDVOSB); DBA Francis E. McIntire Enterprises. DUNS: 088316844. As an Air Force cadet, he served as Squadron Safety Non-Commissioned Officer and Cadet Training Officer specializing in Air Force ground and air safety, as well as sports- and automotive safety. As a commissioned officer, he served as Squadron Safety Officer for the 79th Tactical Fighter Squadron, Upper Heyford, United Kingdom. Follow-on duties included: Air Force fighter pilot, and Assistant Professor of Behavioral Sciences and Leadership at the Academy. As Chief of Operations, Quality Assurance, and the Functional Check Flight branch at Royal Air Force Upper Heyford in the UK,

Frank was the Commanders' advocate for safe operations in the air and on the ground. As Deputy Commander and Deputy Director for Air Force Quality Assurance, Frank led the 80-person global consulting agency for organizational development and business transformation worldwide. Frank inculcated Ground & Air Safety and Security for: the Battle of Britain Airshow (1989-1990); launch of the Air Force Quality Institute (1992-1995); the Quality Air Force Symposium (1993-1995); the Inspector General visit (1994-1995); the Peacekeeper Missile Action Workout (1995-1996); the Total Army Quality launch (1996-1998); the

online Operational Test Program Management system (1999-2002); the Resource Allocation Management Plan (2001-2003); the Fort Carson Strategic Plan (2004); the Oracle National Security Strategic Plan and Conference (2005-2006); Oracle RDBMS, RAC, and ERP Federal Financial projects (2005-2007); the Veterans Affairs financial center (2007-2008); the HHS data center fit out (2007-2010); the ECP management for enterprise IT infrastructure projects (2009-present), and other projects along the way using MS Project and Sciforma Project Scheduler for planning, tracking, and reporting. Frank's leadership in IT systems security and cybersecurity include: DoD and

Intelligence Community system upgrades and implementations for network, storage, and database; and to support imagery deployment and exploitation for U.S. and coalition forces worldwide. These include DoD branches, Defense Intelligence Agency (DIA), Defense Information Systems Agency (DISA), conformance with DISA Security Technical Information Guides (STIGs), Department of State, and the broad U.S. Intelligence Community. At work, McIntire leads the way for must-win and big-win proposals and the development and delivery of Safety Moments for meetings and conference calls large and small. His extensive portfolio of current, new, and innovative Safety Moments

includes robust use of the corporate online database, the wide and varied safety content of the Online University safety curriculum, and vast experience with military and commercial safety lessons-learned and industry best practices. Frank has earned a reputation of delivering Safety Moments that are practical, memorable, and enjoyable. This project-oriented facilities

design and material handling reference explores the techniques and procedures for developing an efficient facility layout, and introduces some of the state-of-the-art tools involved, such as computer simulation. A "how-to," systematic, and methodical approach leads readers through the collection, analysis and development of information to produce a quality functional plant layout. Lean manufacturing; work cells and group technology; time standards; the concepts behind calculating machine and personnel requirements, balancing assembly lines, and

leveling workloads in manufacturing cells; automatic identification and data collection; and ergonomics. For facilities planners, plant layout, and industrial engineer professionals who are involved in facilities planning and design. **Warman's Antiques & Collectibles 2012 Price Guide**
John Wiley & Sons
Once upon a time, he was everything to her, except for one thing: her future Christmas sparkles from every bough and window at the cozy Four Winds Ski Resort, where single mother Eden

Kendall and her eight-year-old son are spending the holiday. A surprise marriage proposal from her boss 's son wasn ' t on her Christmas list, but it ' s the perfect excuse to get away and weigh her options. She never imagined her son ' s ski instructor/Santa impersonator would be the gorgeous, charismatic dreamer she left behind years ago, the one who still owns a piece of her heart. Cole Hagan has never stopped loving Eden and he ' s spent the last eight years proving her wrong on every count about his potential. While he fights

to save the resort that he helped to build by organizing a holiday concert, he decides it ' s about time that Eden puts aside her list-making pragmatism so that she and her skeptical son can experience the true magic of Christmas. Can a not-so-perfect angel help this unlikely pair get a second chance at happily ever after?
