Eva Knox and her quirky Southern family are back in the second in the “intriguing” *culinary mystery series. It’s the pits for the attendees of the annual Farm Family Fare in Abundance, Georgia, when olive oil farmer Eva Knox finds herself in the middle of a murder case... Eva and the residents of Knox Plantation are oozing with excitement over the activities planned for the Farm Family Fare. The weekend event consists of two days of tours, exhibitions, music, tastings, and, most important, cooking demonstrations with celebrity chefs from the Chow Network. The enthusiasm, however, begins to dribble away after one of the star chefs goes missing—and is later found dead in the back of a refrigerated truck. The scandal gets messier after the police discover that Eva’s sister Daphne spent the night with the victim right before he died, making her the prime suspect for his murder. It’s up to Eva, with the help of her other sister, Pep, and her best friend, Precious, to track down the real killer before Daphne finds herself squeezed into handcuffs... INCLUDES RECIPES!

FIELD & STREAM, America's largest outdoor sports magazine, celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for generations.

Field & Stream Penguin

From artificial neural net / game theory / semantic applications, to modeling tools, smart manufacturing systems, and data science research - this book offers a broad overview of modern intelligent methods and applications of

machine learning, evolutionary computation, Industry 4.0 technologies, and autonomous agents leading to the Internet of Things and potentially a new technological revolution. Though chiefly intended for IT professionals, it will also help a broad range of users of future emerging technologies adapt to the new smart / intelligent wave. In separate chapters, the book highlights fourteen successful examples of recent advances in the rapidly evolving area of intelligent systems. Covering major European projects paving the way to a serious smart / intelligent collaboration, the chapters explore e.g. cyber-security issues, 3D digitization, aerial robots, and SMEs that have introduced cyber-physical production systems. Taken together, they offer unique insights into contemporary artificial intelligence and its potential for innovation.

Tales of a Blue Water Cruiser: 50,000 Miles of South Pacific Sailing By: J R Williams
Tales of a Blue Water Cruiser is a true story of J R Williams, a man from the Pocono Mountains of Pennsylvania who ended up as a pilot for Hawaiian Airlines and was talked

into buying a sailboat by one of his early captains when he was about 30 years old. From there he ventured into the open ocean and eventually taught himself celestial navigation and sailed from Hawaii to Tahiti, the Marquesas, and back to Hawaii. He continued open-ocean sailing over the years, ending with a five-year retirement cruise. This is proof that if you try hard enough you can accomplish anything—even if at first you never considered doing it.
