The greatest advantage of Kubota engine is
the technology to respond to environmental
requirements and application engineering.
Since receiving the CARB certification of
emission regulations (California Air Resources
Board, USA) for the first time in the world as
small industrial engines in 1993, we have
always conformed to strict emission controls
from around the world as a pioneer of
environmental technology.

Kubota engines are diesel and spark ignition
engines manufactured by Kubota Corporation.
Besides gasoline-fueled for spark ignition
engines, the company produces dual fuel,
LPG-fueled, and natural-gas-fueled engines
as well. The engines are widely used in
various forms, such as: agricultural
equipments, construction equipments,
gensets, tractors, and marine propulsion. Beta
Marine, an international company providing
marine propulsion engines, uses various
Kubota engines for fresh water and sea-g

Kubota manufactures engines according
to Tier 4 standards, which require the use
of advanced control technologies that are
designed to decrease emissions by 90
percent. These technologies include
Diesel Particulate Filter (DPF)*4, Common
Rail System, Exhaust-Gas-Recirculation
Device (EGR)*3, and an electronic fuel
injection system.
