The downfall of the United States of America has been expedited by the recent election of Barack Hussein Obama. The country may not survive his regime, but giving him the benefit of the doubt, author Shawn O'Reilly describes him as The Next-to-Last American President. O'Reilly, a proud conservative who is deeply worried about America's survival, describes a future date when the country no longer exists

in this political satire that is only half joking around. He details the downfall, aftermath, and most importantly, the rebirth of the American people. Its still possible for the country to recover from the economic, social, and moral decay being promoted by Obama and his band of liberals. The new government, however, must resemble what the founding fathers envisioned a land that has few regulations and taxes and no violations of personal freedoms. The end is approaching, and its time to prepare if you want to survive. Take every step necessary to ensure the well being of you and your family with The Next-to-Last American President.

For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time

machinery, the vintage tractor can be a thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a shed since 1927, of the pristine model unearthed at an estate sale, of the broken-down old beauty stashed in a barn where generations of children have made their secret hideaways. These are the classic tractors that are often as hard to find as a needle in a haystack—but far more fun to discover, as all of these delightful stories make abundantly clear.

The need for current and better quality training materials was cited by both certification program instructors and coordinators. In recognition of these shortcomings, the U. S. Department of Agriculture (USDA) funded a major project with Penn State University, The Ohio State University, and the National Safety Council to develop a National Safe Tractor and Machinery Operation Program (NSTMOP).

The result is the NSTMOP Student Manual. This manual, including the task sheets, is the primary curriculum resource developed and designed to be used in a variety of instructional settings. The task sheets are divided into 6 sections: introduction; safety basics; agricultural hazards; the tractor; connecting and using implements with the tractor; and material handling (skid steers, ATV, and utility vehicles). There are a total of 77 task sheets, 48 are identified as core topics. Also included are a skills and driving test layout map and evaluation forms.

Compact Equipment

A collection of sparkling and unpredictable essays ranging across the whole world of gardening, and sometimes slightly beyond, from the acclaimed author of The Transplanted Gardener and The Potting Shed Papers. Tales of great gardeners and heroic plant hunters share space with more personal revelations - exactly why every man needs a tractor, how to deal with woodchucks or a relentless west wind, the challenge of a

knotweed infestation. Botanical frauds and heroic plant hunters, splendid gardens past and present, stirring discoveries and hopeless failures - all these and more fall beneath the writer's amused and endlessly curious eye.

Funny, informative and dependably entertaining, Elliott once again demonstrates why readers from Bill Bryson to Alan Titchmarsh have so enjoyed and praised his work.
