The many strands of trademark and
unfair competition doctrine are
organized into a coherent conceptual
framework consisting of a brief
examination of foundational concepts,
followed by thorough treatments of the

law on (1) the creation of trademark rights; and (2) the scope & enforcement of trademark rights and some related causes of action. The traditional case-and-note format is enhanced by problems that help students understand intricate key topics. Trademarks and Unfair Competition features many issues related to online commerce, such as cybersquatting, keyword advertising, the relationship between trademarks and domain names, and the potential secondary liability of online auction websites such as eBay. International as well as domestic issues are thoroughly explored. Comprehensive coverage of trade dress protection is integrated with issues of word mark protection. New to the 5th Edition: the Tam and Brunetti decisions striking down the scandalousness and disparagement bars to registration extensive coverage of recent case developments on expressive uses of marks in political and artistic contexts the Belmora decision on well-known marks and developments on extraterritorial application of the Lanham Act Key Features: coherent conceptual framework clearly delineating creation of rights and enforcement of rights issues traditional case-and-note format, enhanced by problems thorough coverage of trademark issues arising in online commerce integrated coverage of international and domestic doctrine thorough treatment of trade dress protection, integrated with issues of word mark protection

Reproductive tract infections and other gynaecological disorders among women represent an enormous global health burden. This significant book will help focus research on this important though neglected area. The primary aims of the book are to provide an overview of reproductive tract infections and other gynaecological disorders, to highlight the conceptual and methodological challenges associated with undertaking research on this subject, and to serve as a reference for future research in this area. The book focuses on developing country settings, and recognizes that gathering this sort of information requires a multidisciplinary and culturally sensitive approach. Findings from the research described in this book will undoubtedly assist physicians, social scientists, epidemiologists and public health practitioners in evaluating the magnitude of this problem within the community at large and in identifying potentially effective medical and behavioural interventions to address this problem.

Protecting the Brand, Volume I: Counterfeiting and Grey Markets is a handbook for law practitioners as well as business executives. It is a unique perspective of best practices in addressing issues around counterfeiting and grey markets - from a legal as well as a business point of

view. The authors explore the threats posed by counterfeiting and grey markets to a variety of industries and illuminate what problems these may cause. Before setting forth the range of legal strategies for remedying incidents of counterfeiting and grey markets, the authors outline preventive measures businesses can take to combat the threats, and showcase some of the emerging technologies that can serve as enablers of Brand Protection 's 3 IPR 's (3 I 's= Intelligence, Investigation, Innovation; 3 P 's= Protection, Perseverance, Perpetuation; 3 R 's= Remedy, Recovery, Rehabilitation).

Throughout human history, wars and violence have often been waged in the name of religions and in the name of diverging religious beliefs and belonging. Ironically, though, all religions in their teachings speak of nonviolence and have in common the promotion of

peace and justice, namely the respect of human life and dignity, the institution of human rights, the protection of the poor and vulnerable, the freeing of the oppressed, the active elimination of injustice? It seems therefore, that violence and wars would be antithetical to religions; yet they are so frequently used as their justification. Are we then speaking of different "religions"? "Institutional religions," the ones structured by humans and that are brandished to lead violence and wars, become in fact quite foreign to the essence of the religions as they were established by their founders and that they intend to represent; they actually contribute to their destruction. Wanting to reflect on that point, I embarked, a few years ago, on giving voice to local religious individuals, whom I called "Religious Peacemakers," and who, each by living the essential teachings of their particular faith, contributed by their actions to peace and justice. I wanted to prove that their path, irrespective of their original religion, would be similar, and that their diverse faith, instead of separating them, would on the contrary end up uniting them.
