Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths

through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power.

Throughout human history, wars and violence have often been waged in the name of religions and in the name of diverging religious beliefs and belonging.

Ironically, though, all religions in their teachings speak of nonviolence and have in common the promotion of peace and justice, namely the respect of human life and dignity, the institution of human rights, the protection of the poor and vulnerable, the freeing of the oppressed, the active elimination of injustice? It

seems therefore, that violence and wars would be antithetical to religions; yet they are so frequently used as their

justification. Are we then speaking of different "religions"? "Institutional religions," the ones structured by humans and that are brandished to lead violence and wars, become in fact quite foreign to the essence of the religions as they

were established by their founders and that they intend to represent; they actually contribute to their destruction. Wanting to

reflect on that point, I embarked, a few years ago, on giving voice to local religious individuals, whom I called

"Religious Peacemakers," and who, each by living the essential teachings of their particular faith, contributed by

their actions to peace and justice. I wanted to prove that their path, irrespective of their original religion, would be similar, and that their diverse faith, instead of separating them, would on the contrary end up uniting them.

A detailed Reference Guide to Metal Pedal Tractors with full color pictures. Small model toy tractors have been on the market since the 1920's but pedal tractors were not produced until the late 1940's. The first pedal tractor, a John Deere Model A was produced by Eska in 1949. It is prized by collectors and can bring a high price in good condition. Ertl came out with pedal tractors shortly after Eska and continues to produce them today. Scale Models has also manufactured pedal tractors since the 1980's in their U.S. based plant. Since the 1970's pedal tractors have enjoyed renewed popularity mostly due to their collectability. Today approximately sixty percent of all pedal tractors are sold to collectors. The other forty percent are sold for use by children. Collecting and use of these mini tractors as riding toys are not mutually exclusive. Kids can enjoy riding them and the value will still increase over time if they are not abused. Kids love pedal tractors, in part because they are much like the real thing. Children age's three to seven are the perfect age to enjoy these special toy tractors. One popular event at many county fairs is the kiddie tractor pull. These pulls are just like tractor pulls for adults but with pedal tractors they operate under kid power only. The following tractors are included in the new book: Agco Allis, All American, Allis Chalmers, Case, Case International, Caterpillar, Cub Cadet, Duetz-Allis, Farmall, Farmer Boy, Ford, Heisler, Heston, International, John Deere, Kubota, Massey Harris, Massey Ferguson, Minneapolis Moline, New Holland, Oliver, Tractol, White, & White Oliver. Also includes custom models, parts, scale model private issues, trailers, and umbrellas.
