Travelling Light Createspace  
Independent Publishing Platform  
Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

Fundamentals of Differential Equations and Boundary Value Problems Springer Nature  
People around the world and from all walks of life question the origin and vitality of God. If you sincerely want to know if God is real, then this is the right book for you! This is an interesting claim but I believe the information found in this book is credible and should help those reading it

understand that only God could have organized the bible through imperfect men to show forth a perfect work as well as placing the creation in such order that also aligns itself with the writings of these flawed men. The use of biblical numbers and how they relate to God is as old as the biblical languages used to write the text. Christianity embraced most of the Jewish traditions and writings but didn't bring over the mathematics associated with the language. This book helps to make that connection and shows you the reality of God!

Fundamentals of Tractor Design Lex Martin  
An absorbing survey of the history of the Christian church from A.D. 33 to the present, including a comprehensive section on the church in the United States and Canada. An ideal text for secondary schools and Bible institutes.

**An Introduction to Sustainability** Penguin

*Kissing Madeline* BoD – Books on Demand  
New drugs are frequently entering into the market along with the existing drugs. The antibacterial agents can be discussed in five major classes, i.e. classification based on the type of action, source, spectrum of activity, chemical structure and function. Resistance of bacteria to antibiotics is an urgent problem of the humanity, which leads us to the lack of therapy for serious bacterial infections. Development of new antibiotics has almost ceased in the last decades - even when a new antibiotic is launched, very soon the resistance of bacteria appears. Industrial textiles exposed as awnings, screens, tents; upholstery used in large public areas such as hospitals, hotels and stations; fabrics for transports; protective clothing and personal protective equipment; bed sheets and blankets; textiles left wet between processing steps; intimate apparel, underwear, socks and sportswear, disinfection of air and water for white rooms, hospitals

and operating theatres, food and pharma industries, water depuration, drinkable water supplying and air conditioning systems. Many clinicians recommend alternative approaches to using antimicrobial substances. Moreover, the majority of bioagents demonstrate on antibiotics for treatment of a wide range of diseases in human sectors. However, the misuse and mishandling of drugs lead to microbial, particularly bacterial, resistance as well as result in the difficulty of treating microbial diseases. Hence, the proposed book will give more precise information on novel antibacterial compound(s).

Scratch Scratch Lincoln Children's Books  
This volume brings together all related topics for a course on Process Plant Simulation that is offered for undergraduates both in India and abroad. It would also be useful for students pursuing courses like optimisation techniques, mathematical methods in chemical engineering and CAD.

**Illustrated Catalogue [microform]** Legare Street Press

*What You Need to Know about Strategy*

Addison Wesley Publishing Company

Mineral trioxide aggregate (MTA) was developed more than 20years ago to seal the pathways of communication of the root canalsystem. It's currently the preferred material used byendodontists because of its superior properties such as its sealand biocompatibility that significantly improves outcomes ofendodontic treatments. Dr. Torabinejad, who was the principle investigator of the dentalapplications of MTA, and leading authorities on this subjectprovide a clinically focused reference detailing the properties anduses of MTA, including vital pulp therapy (pulp capping,pulpotomy), apexification, pulp regeneration, repair of rootperforations, root end filling and root canal filling.

Lineillustrations and clinical photographs show proper technique. Anaccompanying website features photographs and video presentationsfor selected procedures using MTA. Mineral Trioxide Aggregate: Properties and ClinicalApplications is an ideal book for dental students andendodontic residents learning procedures for the first time as wellas practicing dentists and endodontists who would like to improveoutcomes of endodontic treatments.

**Knowing God by the Numbers** Wiley

This is a story which will make your heart sing - a story for all the family to read together. Young Judy discovers an unexpected package in her grandfather's old study. She has never met her grandfather (Poppy) as he died before she was born, but Judy is the one to unearth the puzzle which Poppy left for his family. To find the treasure which Poppy left, the family must first solve every riddle which he wrote on a beautiful scroll, and carefully wrapped in a a rich purple velvet bag. Unless

they solve the puzzles, they won't find the treasure. See if you can solve the puzzles before the family does. What has Poppy left them as an inheritance? Have fun with the story and enjoy the Omega Prize at the end.

"This is a teeth-chattering, eyes bulging, shuddering-and-shaking, chills-at-the-back-of-your-neck ghost story. I loved it!"—R.L. Stine, author of the Goosebumps series For fans of Small Spaces and the Goosebumps series by R.L Stine comes a chilling ghost story based on real Chicago history about a malevolent spirit, an unlucky girl, and a haunting mystery that will tie the two together. Claire has absolutely no interest in the paranormal. She's a scientist, which is why she can't think of anything worse than having to help out her dad on one of his ghost-themed Chicago bus tours. She thinks she's made it through when she sees a boy with a sad face and dark eyes at the back of the bus. There's something off about his presence, especially because when she checks at the end of the tour...he's gone. Claire tries to brush it off, she must be imagining things, letting her dad's ghost stories get the best of her. But then the scratching starts. Voices whisper to her in the dark. The number 396 appears everywhere she turns. And the boy with the dark eyes starts following her. Claire is being haunted. The boy from the bus wants something...and Claire needs to find out what before it's too late. Pick up Scritch Scratch if you are looking for: A book for middle school students, 5th grade to 9th grade A story with a strong female protagonist that explores bravery, friendship, and family Mystery books for kids 9-12 Chilling ghost stories and ghost books for kids (perfect for Halloween!) Historical mysteries and Chicago history books for kids

H, M, and Cub; the McCormick-Deering -4, -6, and -9; and the Super Series and -TA tractors.

The Omega Prize Dundurn

"Fitrah: Man's Natural Disposition" is a translation of the Persian book "Fi?rat" by the great Muslim thinker and reformer, Ayatollah Murtada Mutahhari. "Fitrah" is the theme of a 10-session lecture series given the martyred thinker in 1976-77. With ample citations from the Qur'an and other traditional Islamic sources, Mutahhari discusses the concept of 'fitrah' or man's natural disposition. The author does not confine himself to Islamic references as he continuously engages with the views of a wide range of philosophers including Plato, William James, Russell, Nietzsche, Marx, Feuerbach, Auguste Comte, Spencer, Will Durant, and Durkheim, among others. Mutahhari's ontological discussion covers a range of issues, including the literal and technical meaning of 'fitrah', sacred inclinations, love and worship, and the evolution of human originality. He also examines materialism and provides a theistic approach to some issues pertaining to the theories on the origin of religion, the evolution of human society, intrinsic and acquired guidance, and intuitive and sensory dispositions. This book lays a significant interconnected and deep foundation in Islamic theology and an understanding of human psychology, sociology and anthropology fully supported by the holy Quran, ahadith, logic and philosophy. The reader will leave with a holistic understanding of Islam and a true connection with the Almighty (SWT) through one own self.

*Me: a Compendium* DC Comics

The definitive book on steak has never been written-until now "Of all the meats, only one merits its own structure. There is no such place as a lamb house or a pork house, but even a small town can have a steak house." So begins Mark Schatzker's ultimate carnivorous quest. Fed up with one too many mediocre steaks, the intrepid journalist set out to track down, define, and eat the perfect specimen. His journey takes him to all the legendary sites of steak excellence-Texas, France, Scotland, Italy, Japan, Argentina, and Idaho's Pahsimeroi Valley-where he discovers the lunatic lengths steak lovers will go to consume the perfect cut. After contemplating the merits of Black Angus, Kobe, Chianina, and the prehistoric aurochs-a breed revived by the Nazis after four hundred years of extinction-Schatzker adopts his own heifer, fattens her on fruit, acorns, and Persian walnuts, and then grapples with ambivalence when this near-pet appears on his plate. Reminiscent of both Bill Bryson's and Bill Buford's writing, *Steak* is a warm, humorous, and wide-ranging read that introduces a wonderful new travel and food writer to the common table.

**The Wills Eye Manual** S. L. Millward

In any career in business, chances are that the time will come when someone will ask you to do a strategy for something. Too often, this will be a cue

for stress at work and sleepless nights. What You Need to Know about Strategy shows that it doesn't have to be like this. Taking you step-by-step through the basics of what you need to know to come up with a great strategy, it shows: That getting the right answers depends on asking the right questions Why priorities matter How to map out your internal and external situation How to deal with uncertainty How to make tough choices What your brain does while you're doing strategy By cutting out the theory, and focusing on the things you need to know and do to come up with a killer strategy, this book means that you never need to panic again.

John Wiley & Sons

First published in 1982, I Remember Sunnyside is a mine of golden memories, bringing back to life an earlier Toronto, only hints of which remain today. Like the city itself, Sunnyside was an everchanging landscape from its heady opening days in the early 1920s to its final sad demolition in the 1950s. The book captures the spirit of the best of times a magical era which can only be recaptured in memory and photographs. It also presents the reality of a newer Toronto where change, although necessary, is sometimes regrettable.

#### *Forest Trees* Springer Science & Business Media

Is secularism a positive force in the modern world? Or does it lead to fragmentation and disintegration? In *Saving Leonardo*, best-selling award-winning author Nancy Pearcey (Total Truth, coauthor *How Now Shall We Live?*) makes a compelling case that secularism is destructive and dehumanizing. Pearcey depicts the revolutionary thinkers and artists, the ideas and events, leading step by step to the unleashing of secular worldviews that undermine human dignity and liberty. She crafts a fresh approach that exposes the real-world impact of ideas in philosophy, science, art, literature, and film--voices that surround us in the classroom, in the movie theater, and in our living rooms. A former agnostic, Pearcey offers a persuasive case for historic Christianity as a holistic and humane alternative. She equips readers to counter the life-denying worldviews that are radically restructuring society and pervading our daily lives. Whether you are a devoted Christian, determined secularist, or don't know quite where you stand, reading *Saving Leonardo* will unsettle

established views and topple ideological idols. Includes more than 100 art reproductions and illustrations that bring the book's themes to life. Praise for *Saving Leonardo*: "A feast for the mind and for the eye. Nancy Pearcey not only is a trustworthy guide for a nuanced discussion on the relationship between culture and the gospel, but she is a gifted teacher as well . . . *Saving Leonardo* is a rare, precious gift to the churches and universities alike." Makoto Fujimura, artist and author of *Refractions: A Journey of Faith, Art, and Culture* "Nancy Pearcey has done it again and better than ever. She has taken the complex sophistication of the best cultural analysis and laid it out for any person to grasp, enjoy and use to live out their daily lives honoring Christ. An astounding accomplishment!" James W. Sire, author of *The Universe Next Door* "G. K. Chesterton said 'the danger when Men stop believing in God is not that they'll believe in nothing; but that they will believe in anything.' Nancy Pearcey understands where believing in anything leads and in this book she reveals where a secular philosophy is taking us. A balanced, fair, and impacting work!" Cal Thomas, syndicated and USA Today columnist "Nancy Pearcey helps a new generation of evangelicals to understand the worldview challenges we now face and to develop an intelligent and articulate Christian understanding . . . *Saving Leonardo* should be put in the hands of all those who should always be ready to give an answer--and that means all of us." R. Albert Mohler, Jr., president, The Southern Baptist Theological Seminary "Nancy Pearcey is an intellectual prophet in our day and one of Evangelicalism's foremost cultural observers. *Saving Leonardo* is a tour de force. In it, Pearcey provides a penetrating analysis of the nature of contemporary secularism, a helpful exposition of how we got to the present situation, and a well-crafted strategy for changing the situation. This is her best effort yet . . . a must read." J. P. Moreland, distinguished professor of Philosophy, Biola University and author of *The God Question* "Nancy Pearcey is unsurpassed in the current generation of Christian thinkers . . . The magic continues with this book. Pearcey's virtues as a writer and thinker are once again fully evident in the range of material that she has mastered, the

encyclopedic collection of data that she presents, and the analytic rigor with which she separates truth from error in worldviews. She is a prophetic voice for contemporary Christians." Leland Ryken, Clyde S. Kilby professor of English, Wheaton College "Brilliant . . . The book brings complex, abstract ideas down-to-earth -- or rather, down-to-life. . . . *Saving Leonardo* bridges the gaps between the arts and the sciences, the theoretical and the practical. The book not only argues for the unity of Christian truth but exemplifies that unity and shows it in action." Gene Edward Veith, provost, Patrick Henry College
