What if everything you know about raw talent, hard work, and great performance is wrong? Very few people are truly great at what they do. But

why aren't they? Why don't we manage businesses like Warren Buffett, play golf like Tiger Woods or play the violin like Itzhak Perlman? Greatness doesn't come from inborn talent but from 'deliberate practice'. This isn't the kind of hard work that your parents told you about, but more of it equals better performance. Talent is Overrated will change the way you think about your life and work - and will inspire you to achieve more in everything you do. Great performance isn't reserved for a preordained few. *Talent Is Overrated* Mitchell Beazley

The Tiger Math series was designed based on my three beliefs toward elementary math education. 1. It is extremely important to build foundation of math by acquiring a sense of numbers and mastering the four operation skills in terms of addition, subtraction, multiplication, and division. 2. In math, one should go through all steps in order, step by step, and cannot jump from level 1 to 3. 3. Practice math every day, even if only for 10 minutes. The goals of Tiger Math Level D - 4 are 1) to practice changing addition to multiplication and 2) to practice and memorize multiplication of 1 digit number by 1 digit number.

"Prealgebra is designed to meet scope and sequence requirements for a one-semester prealgebra course. The text introduces the fundamental concepts of algebra while addressing the needs of students with diverse backgrounds and learning styles. Each topic builds upon previously developed material to demonstrate the cohesiveness and structure of mathematics. Prealgebra follows a nontraditional approach in its presentation of content. The beginning, in particular, is presented as a sequence of small steps so that students gain confidence in their ability to succeed in the course. The order of topics was carefully planned to emphasize the logical progression throughout the course and to facilitate a thorough understanding of each concept. As new ideas are presented, they are explicitly related to previous topics."--BC Campus website.
