## **Suzuki GSX-R Performance**

**Projects** Dg Books Publishing  
For years track days have been popular activities for European motorcyclists. In recent years it has become a very popular activity in the U.S. as well. As traffic laws become increasingly draconian, roads become increasingly congested, and motorcycles become increasingly capable, more people are taking their bikes to race tracks. Currently there are a number of organizations catering to people who attend track days.

But many people who want to ride on racetracks don't attend track days because they don't know how to prepare themselves or their motorcycles for the racetrack. This book will provide tell them everything they need to know to hit the racetrack: how to prepare their motorcycles, how to find organizations that sponsor track days, where to attend track days, specific information for the major racetracks in the United States, information on track schools around the country, and much, much more. About the

---

Author Kent Larson, an accomplished racer and a control rider for NESBA, one of the country's leading track day organizations, contributed the chapter on track days to our high performance riding book Total Control. Larson lives in Woodbury, Minnesota.

Vast interior spaces have become ubiquitous in the contemporary city. The soaring atriums and concourses of mega-hotels, shopping malls and transport interchanges define an increasingly normal experience of being 'inside' in a city. Yet such spaces are also subject to intense criticism and claims that they can destroy the quality of a city's authentic life 'on the outside'.

---

Interior Urbanism explores the roots of this contemporary tension between inside and outside, identifying and analysing the concept of interior urbanism and tracing its history back to the works of John Portman and Associates in 1960s and 70s America. Portman – increasingly recognised as an influential yet understudied figure – was responsible for projects such as Peachtree Center in Atlanta and the Los Angeles Bonaventure Hotel, developments that employed vast internal atriums to define a world of possibilities not just for hotels and commercial spaces, but for the future of the American downtown amid the upheavals of the 1960s and 70s. The book analyses Portman's architecture in order to reconsider major contexts of debate in architecture and urbanism in this period, including the massive expansion of a commercial imperative in architecture, shifts in the governance and development of cities amid social and economic instability, the rise of postmodernism and critical urban studies, and the defence of the street and public space amid the continual upheavals of urban development. In this way the book reconsiders the American city at a crucial time in its development, identifying lessons for how we consider the forces at work, and the spaces produced, in cities in the present.

This extensively illustrated all-color book provides a comprehensive reference source for all motorcycle owners and enthusiasts, and is aimed in particular at those who are new or returning to the biking scene. Written by a long-standing motorcycle expert, this book is invaluable to anyone contemplating their first motorcycle, and will improve the reader's overall understanding of their machine without necessarily having to get their hands dirty. The second edition has been revised to bring it fully up to date with current bike technology and model ranges.

It has never been shown that human emissions of the gas of life drive global warming. Large bodies of science that don't fit the narrative have been ignored by IPCC, COP and self-interested scientists paid by taxpayers. A huge subsidised industry of intermittent unreliable

---

wind and solar electricity has been created based on unsubstantiated science. The same hucksters now want subsidised hydrogen, costly inefficient EVs, subsidised mega-batteries and other horribly expensive tried and failed schemes to impoverish people, create unemployment, transfer wealth and enrich China. Germany, Texas, California and the UK had a glimpse of Net Zero with blackouts, astronomically high electricity costs and hundreds of deaths. We once had reliable cheap electricity and now that governments have gone green, we are heading for hard economic times. In this book I

charge the greens with murder. They murder humans who are kept in eternal poverty without coal-fired electricity. They support slavery and early deaths of black child miners. They murder forests and their wildlife by clear felling for mining and wind turbines. They murder forests and wildlife with their bushfire policies. They murder economies producing unemployment, hopelessness, collapse of communities, disrupted social cohesion and suicide. They murder free speech and freedoms and their takeover of the education system has ended up in the murdering of the intellectual and

---

economic future of young people. They terrify children into mental illness with their apocalyptic death cult lies and exaggerations. They try to divide a nation. They are hypocrites and such angry ignorant people should never touch other people's money. The greens are guilty of murder. The sentence is life with no parole in a cave in the bush enjoying the benefits of Net Zero.

Suzuki's GSX-R series revolutionized the sport of motorcycling. While other manufacturers had dabbled with building high-performance motorcycles, the GSX-R series were the first motorcycles to bring state-of-the-art racing technology to the street. Suzuki's GSX-R is an icon, a modern day BSA Gold Star. It is a bike you can ride on the street or race at the track. The GSX-R is a bike ridden by champions and casual racers alike. This book provides the best single resource for improving the performance of these modern-day classics, whether for road use or for racing.
