This Code of Practice for Victims of Crime forms a key part of the wider Government strategy to transform the criminal justice system by putting victims first, making the system more responsive and easier to navigate. Victims of crime should be treated in a respectful, sensitive and professional manner without discrimination of any kind. They should receive appropriate support to help them, as far as possible, to cope and

recover and be protected from re-victimisation. It is important that victims of crime know what information and support is available to them from reporting a crime onwards and who to request help from if they are not getting it. This Code sets out the services to be provided to victims of criminal conduct by criminal justice organisations in England and Wales. Criminal conduct is behaviour constituting a criminal offence under the National Crime Recording Standard. Service providers may provide support and services in line with this Code on a discretionary basis if the offence does not fall under the National Crime Recording Standard (NCRS) (see the glossary of key terms found at the end of this Code). Non-NCRS offences include drink driving and careless driving. This Code also sets a minimum standard for these services. Criminal justice organisations can choose to offer additional services and victims can choose to receive services tailored to their

The Anarchist Cookbook will shock, it will disturb, it will provoke. It places in historical perspective an era when "Turn on, Burn down, Blow up" are revolutionary slogans of the day. Says the author "This book... is not written for the members of fringe political groups, such as the Weatherman, or The Minutemen. Those radical groups don't need this book. They already know everything that's in here. If the real people of America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book." In what the

---

author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There is detailed advice concerning electronics, sabotage, and surveillance, with data on everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from cattle prods to sub-machine guns to bows and arrows. **Your Executive Image** Lulu Press, Inc

In the corridors of the Vatican on the eve of World War II, American Catholic priest Joseph Patrick Hurley found himself in the midst of secret diplomatic dealings and intense debate. Hurley's deeply felt American patriotism and

fixed ideas about confronting Nazism directly led to a mighty clash with Pope Pius XII. It was 1939, the earliest days of Pius's papacy, and controversy within the Vatican over policy toward Nazi Germany was already heated. This groundbreaking book is both a biography of Joseph Hurley, the first American to achieve the rank of nuncio, or Vatican ambassador, and an insider's view of the alleged silence of the pope on the Holocaust and Nazism. Drawing on Hurley's unpublished archives, the book documents critical debates in Pope Pius's Vatican, secret U.S.-Vatican dealings, the influence of Detroit's flamboyant anti-Semitic priest Charles E. Coughlin, and the controversial case

of Croatias Cardinal Stepinac. The book also sheds light on the powerful connections between religion and politics in the twentieth century.
