Popular Politics in the History of South Africa, 1400–1948 offers an inclusive vision of South Africa's past. Drawing largely from original sources, Paul Landau presents a history of the politics of the country's people, from the time of their early settlements in the elevated heartlands, through the colonial era, to the dawn of Apartheid. A practical tradition of mobilization, alliance, and amalgamation persisted, mutated, and occasionally vanished from view; it survived against the odds in several forms, in tribalisms, Christian assemblies, and other, seemingly hybrid movements; and it continues today. Landau treats southern Africa broadly, concentrating increasingly on the southern Highveld and ultimately focusing on a transnational movement called the 'Samuelites'. He shows how people's politics in South Africa were suppressed and transformed, but never entirely eliminated.

Long out of print, this Highsmith classic resurfaces with a vengeance. The great revival of interest in Patricia Highsmith continues with the publication of this novel that will give dog owners nightmares for years to come. With an eerie simplicity of style, Highsmith turns our next-door neighbors into sadistic psychopaths, lying in wait among white picket fences and manicured lawns. In A Dog's Ransom, Highsmith blends a savage humor with brilliant social satire in this dark tale of a highminded criminal who hits a wealthy Manhattan couple where it hurts the most when he kidnaps their beloved poodle. This work attesets to Highsmith's reputation as "the poet of apprehension" (Graham Greene).

Preventing recidivism is one of the aims of criminal justice, yet existing means of pursuing this aim are often

poorly effective, highly restrictive of basic freedoms, and significantly harmful. Incarceration, for example, tends to be disruptive of personal relationships and careers, detrimental to physical and mental health, restrictive of freedom of movement, and rarely more than modestly effective at preventing recidivism. Crime-preventing neurointerventions (CPNs) are increasingly being advocated, and there is a growing use of testosterone-lowering agents to prevent recidivism in sexual offenders, and strong political and scientific interest in developing pharmaceutical treatments for psychopathy and anti-social behaviour. Future neuroscientific advances could yield further CPNs; we could ultimately have at our disposal a range of drugs capable of suppressing violent aggression and it is not difficult to imagine possible applications of such drugs in crime prevention. Neurointerventions hold out the promise of preventing recidivism in ways that are both more effective, and more humane. But should neurointerventions be used in crime prevention? And may the state ever permissibly impose CPNs as part of the criminal justice process, either unconditionally, or as a condition of parole or early release? The use of CPNs raises several ethical concerns, as they could be highly intrusive and may threaten fundamental human values, such as bodily integrity and freedom of thought. In the first book-length treatment of this topic, *Treatment for Crime*, brings together original contributions from internationally renowned moral and political philosophers to address these questions and consider the possible issues, recognizing how humanity has a track record of misguided, harmful and unwarrantedly coercive use of neurotechnological 'solutions' to criminality. The Engaging Philosophy series is a new forum for collective philosophical engagement with controversial issues in contemporary society.

bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.

This comparative literature study explores how writers from across Ireland and Latin America have, both in parallel and in concert, deployed symbolic representations of the dead in their various anti-colonial projects. In contrast to the ghosts and revenants that haunt English and Anglo-American letters—where they are largely either monstrous horrors or illusory frauds—the dead in these Irish/Latinx archives can serve as potential allies, repositories of historical grievances, recorders of silenced voices, and disruptors of neocolonial discourse.

This book is about transvestism and the performance of gender in Latin American literature and culture. Ben. Sifuentes-Jáuregui explores the figure of the transvestite and his/her relation to the body through a series of canonical Latin American texts. By analyzing works by Alejo Carpentier, José Donoso, Severo Sarduy and Manuel Puig (author of Kiss of the Spiderwoman), alongside critical works in gender studies and queer theory, Sifuentes-Jáuregui shows how transvestism operates not only to destabilize, but often to affirm sexual, gender, national and political identities.
