**Physical Geology 101  
Laboratory Manual** Pearson  
Higher Ed

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. This user-friendly, best-selling lab manual examines the basic processes of geology and their applications to everyday life. Featuring contributions from over 170 highly regarded geologists and geoscience educators, along with an exceptional illustration program by Dennis Tasa, *Laboratory Manual in Physical Geology, Ninth Edition* offers a new activities-based approach that gives you a more complete learning experience in the lab.

Lab Manual for Physical  
Geology McGraw-Hill  
Education

This laboratory manual is written for the freshman-

level laboratory course in physical geology. In this lab students study Earth materials, topographic maps, aerial photographs and other imagery from remote sensing, geologic interpretation of topographic maps, aerial photographs and Earth satellite imagery, structural geology and plate tectonics and related phenomena. With nearly 30 exercises, this gives flexibility when developing the syllabus for this course. The ease of use, tremendous selection, and tried and true nature of the labs selected, have made this the leading selling physical geology manual. *Laboratory Manual for Introductory Geology* McGraw-Hill Science, Engineering & Mathematics eBook Version You will receive access to this electronic text via email after using the shopping cart above to complete your

purchase

The Blueprints to Our Home Pearson

This is an introductory-level college laboratory manual to accompany Physical Geology Lab. This book is written for non-science majoring students who are planning to complete their general education courses.

The exercises include simple mathematical unit calculations, generation and reading scientific graphs, reading topographic maps, generating and reading contour diagrams, plate tectonics, minerals, igneous rocks, sedimentary rocks, metamorphic rocks, geologic time, rocks deformation, and geologic maps. The majority of the exercises are self-containing, and require no additional material.

Laboratory Manual for Physical Geology

Missoula, Mont. :

Mountain Press Publishing Company

This laboratory manual is written for the freshman-level laboratory course in physical geology. In this lab students study Earth materials, topographic maps, aerial photographs and other imagery from remote sensing, geologic interpretation of topographic maps, aerial photographs and Earth satellite imagery, structural geology and plate tectonics and related phenomena.

With nearly 30 exercises, this gives flexibility when developing the syllabus for this course. The ease of use, tremendous selection,

and tried and true nature of the labs selected, have made this the leading selling physical geology manual.

Laboratory Manual for Physical Geology

WCB/McGraw-Hill

"The Blueprints to Our Home: A Physical Geology Laboratory Manual introduces the reader to the physical processes governing our planet and demonstrates how the multiple branches of science intersect to describe our world. Developed for a full term of lab work, this supplemental text gives the users hands-on, problem-solving experience by requiring the application of practical

geologic concepts.

Designed to educate students about both academic and applied geology, this laboratory manual addresses issues concerning how our home, the Earth, was built, how it continues to be remodeled, where all of our resources are stored, how to keep our living space clean and healthy, and how to identify and protect ourselves against inherently dangerous areas. The accessible writing style helps readers understand the "why" behind the "what" and provides practical, problem-solving exercises that demonstrate the nature of scientific inquiry and the scientific method.

---

The goal of this publication is to equip students with the knowledge and tools they need to take advantage of the countless benefits our planet offers, while minimizing the risk of encountering potential hazards. As such, developing the necessary skills to read the blueprints of our home will foster an appreciation for the magnificence and complexity with which our planet operates and a desire to preserve and protect it. Elli Pauli completed a double B.S. in Marine Science and Geology at the University of Miami in Coral Gables, FL and was awarded an M.S. in Geochemistry from George Washington University. She is now the laboratory coordinator for the introductory geology courses at George Washington University, and is a professional lecturer in numerous colleges and universities throughout the Washington Metro Area, teaching classes in Environmental Geology, Physical Geology, Physical Geography and Geohazards and Land-use Planning. She has also worked with the Smithsonian Institution Museum of Natural History in the Department of Mineral Sciences and United States Geological Survey. Laboratory Manual in
