Standard microbiology
practices are usually enough to
protect laboratory workers and
other employees in the

building. These include
mechanical pipetting only (no
mouth pipetting allowed), safe
sharps handling, avoidance of
splashes or aerosols, and
decontamination of all work
surfaces when work is
complete, e.g., daily.

epidemiological applications of microbiology often seem more relevant than its technical details. Thus, the challenge for authors of textbooks and laboratory manuals, and for instructors, is to project microbiology into the clinical set-ting and relate its principles to patient care. The authors of

this manual have emphasized the pur-
